Topic 4	<ul style="list-style-type: none">Performance: Performance measurement and system debugging are covered here. This topic also includes reviewing log files to distinguish system and performance events.
Topic 5	<ul style="list-style-type: none">User Experience: Creating and authenticating Pega Web Mashups is the focus of this brief topic.
Topic 6	<ul style="list-style-type: none">Application Development: This topic covers the creation and structure of enterprise-class applications. It includes understanding rule resolution, circumstancing, and the use of the New Application wizard.
Topic 7	<ul style="list-style-type: none">Data and Integration: Data validation, keyed data pages, and data exchange are key sub-topics. This topic also includes the management of integration settings and addressing connector errors for seamless data transfer. Exposing applications through web services is also covered.

TestPDF Exam PEGACPSSA23V1 Voucher/Download Instantly

TestPDF made an absolute gem of study material which carries actual Pegasystems PEGACPSSA23V1 Exam Questions for the students so that they don't get confused in order to prepare for Pegasystems PEGACPSSA23V1 exam and pass it with a good score. The Pegasystems PEGACPSSA23V1 practice test questions are made by examination after consulting with a lot of professionals and receiving positive feedback from them. The Certified Pega Senior System Architect 23 (PEGACPSSA23V1) practice test questions prep material has actual Pegasystems PEGACPSSA23V1 exam questions for our customers so they don't face any hurdles while preparing for Pegasystems PEGACPSSA23V1 certification exam.

Pegasystems Certified Pega Senior System Architect 23 Sample Questions (Q22-Q27):

NEW QUESTION # 22

A budgeting application uses a job scheduler to automatically email customers once a week with a breakdown of their weekly expenses. Due to the international usage of the application, stakeholders require peak performance at all hours. Which solution addresses this performance concern?

- A. Ensure that customers use a common access group.
- **B. Dedicate and classify a node for the job scheduler.**
- C. Configure the job scheduler to run at off-hours.
- D. Limit the number of operators who can access the application.

Answer: B

Explanation:

Dedicating and classifying a node for the job scheduler allows the job scheduler to run on a node that is optimized for batch processing. This ensures that resource-intensive jobs do not impact the performance of the user nodes, thus maintaining peak performance at all hours. Reference: Pega Platform Help - Job Schedulers.

NEW QUESTION # 23

In your purchasing application, you use a decision table with vendor discount codes. You want to delegate the decision table. In which ruleset do you save the decision table to allow delegation?

- A. Application
- **B. Production**
- C. Integration
- D. Organization

Answer: B

Explanation:

To allow delegation of a decision table, you should save it in a Production ruleset. Production rulesets are designed to hold rules that business users can modify directly in a production environment, which includes delegated rules. Reference: Pega official documentation on ruleset types and rule delegation.

NEW QUESTION # 24

A global application with infrastructure nodes located throughout the world requires certain operations to start executing at midnight GMT.

Select two possible designs for this use case. (Choose Two)

- A. Use the Run in background step in the case life cycle and design a dedicated queue processor.
- B. Use the Run in background step in the case life cycle and design a standard queue processor.
- **C. Use the Queue-For-Processing method in an activity and design a standard queue processor.**
- **D. Use the Queue-For-Processing method in an activity and design a dedicated queue processor.**

Answer: C,D

Explanation:

To start operations at a specific GMT time regardless of where the server is located, you would use the Queue-For-Processing method in an activity. This method adds a task to a queue to be processed either by a standard or a dedicated queue processor. A dedicated queue processor can be configured to operate on a schedule, so it can start processing at midnight GMT. Reference: Pega SSA course materials on queue processors and timed events.

NEW QUESTION # 25

University admission application cases automatically advance in the case life cycle if the applicant's standardized test scores are above a certain threshold. The threshold is determined each year based on the provided national average score.

Which two configurations, when applied together, support this requirement? (Choose Two)

- A. Configure a process with a decision shape that continues if the TestThreshold Configuration setting is less than the applicant's test score.
- B. Configure a process with a decision shape that continues if the TestThreshold Configuration setting is greater than the applicant's test score.
- C. Configure a TestThreshold Configuration setting with the national average for the test score threshold.
- D. Configure a TestThreshold Configuration setting that calculates the national average for the test score threshold.

Answer: A,C

Explanation:

* A: Configuring a process with a decision shape that continues if the TestThreshold Configuration setting is less than the applicant's test score supports the requirement for automatic case advancement based on
* standardized test scores.

* B: Configuring a TestThreshold Configuration setting with the national average for the test score threshold allows for the necessary comparison to determine if a case should advance automatically.

References: Pega official documentation on decision shapes and configuration settings.

NEW QUESTION # 26

Drag the error type on the left to its description on the right.

□

Answer:

Explanation:

□

Explanation:

□

The correct match for each error type to its description is:

* Transient Errors -> These errors usually correct themselves over time.

* Permanent Errors -> These errors are typically due to a configuration error or an error in the remote application logic.

NEW QUESTION # 27

.....

The series of PEGACPSSA23V1 measures we have taken is also to allow you to have the most professional products and the most professional services. I believe that in addition to our PEGACPSSA23V1 study materials, you have also used a variety of products. What kind of services on the PEGACPSSA23V1 training engine can be considered professional, you will have your own judgment. But I would like to say that our products study materials must be the most professional of the PEGACPSSA23V1 Exam simulation you have used. And you will find that our PEGACPSSA23V1 exam questions is worthy for your time and money.
