献身と熱意を持ってAP-211ガイド資料を段階的に学習する場合、Salesforce必死に試験に合格することを保証します。学習資料の権威あるプロバイダーとして、潜在顧客からより多くの注目を集めるために、常に同等のテストと比較してAP-211模擬テストの高い合格率を追求しています。それ以外の場合、残念ながら、AP-211学習教材で試験に合格しなかった場合、製品費用はすぐに全額返金されます。AP-211研究トレントは、高い合格率でより魅力的で素晴らしいものになります。

Salesforce AP-211 認定試験の出題範囲:

トピック	出題範囲
トピック 1	設計: この領域には、ベストプラクティスを用いたヘルスクラウドソリューションの設計、適切なオブジェクトを用いた医療機関のモデリング、使用する具体的な機能の決定、成功指標とレポートの定義、セキュリティとコンプライアンスの実装、統合戦略の開発、データ移行計画の作成が含まれます。
トピック 2	発見: この領域では、顧客ペルソナとステークホルダーの特定、ユースケースからの必要な機能の定義、望ましいビジネス成果を達成するための機能要件と技術要件の収集を行います。
トピック 3	実装: この領域では、Health Cloudのインストール、アプリケーションとOmniStudioコンポーネントの設定、機能のカスタマイズ、統合とAPIの実装、セキュリティルールの設定、およびレポート機能の確立に重点を置きます。
トピック 4	展開: このドメインでは、特定のユースケースとヘルスクラウド機能に関する展開前および展開後の手順、ならびにモバイルアプリ機能による技術的な側面の管理について説明します。

AP-211試験感想 & AP-211合格内容

GoShikenのSalesforceのAP-211問題集の内容の正確性に対して、私たちは最適な水準に達するのを追求します。GoShikenが提供した問題と解答はIT領域のエリートたちが研究して、実践して開発されたものです。それは十年過ぎのIT認証経験を持っています。GoShikenは他のネットサイトより早い速度で、君が簡単にSalesforce

のAP-211試験に合格することを保証します。

Salesforce Health Cloud Accredited Professional 認定 AP-211 試験問題 (Q55-Q60):

質問 # 55

Bloomington Caregivers want to offer its patients remote monitoring to bring data from patient devices into Health Cloud. Which set of records should an administrator populate to implement this functionality?

- **A. Units of Measure, Remote Monitoring Device Types, Care Observations, Code Sets**
- B. Code Sets, Biometrics, Care Observations, Chart Metrics
- C. Code Sets, Units of Measure, Care Metric Targets, Care Observations
- D. Units of Measure, Code Sets, Remote Monitoring Device Types, Care Episodes

正解: A

解説:

In Salesforce Health Cloud, the Remote Monitoring capability enables healthcare providers to capture and analyze patient-generated health data (from devices such as glucose monitors, blood pressure cuffs, or fitness trackers).

To implement this functionality, the following records must be populated:

Units of Measure - Defines the measurement units (e.g., mmHg, bpm, mg/dL) for device readings.

Remote Monitoring Device Types - Represents the categories of patient devices (e.g., heart rate monitor, glucose meter).

Care Observations - Stores the actual readings (vital signs, measurements) coming from the devices.

Code Sets - Provides standardized medical coding (e.g., LOINC, SNOMED, ICD) for interoperability and classification of device data.

Together, these records form the Remote Monitoring data model.

Why not the others?

B . Units of Measure, Code Sets, Remote Monitoring Device Types, Care Episodes Care Episodes are for tracking episodes of care, not device data.

C . Code Sets, Units of Measure, Care Metric Targets, Care Observations Care Metric Targets are for goal setting, not required for capturing device data.

D . Code Sets, Biometrics, Care Observations, Chart Metrics

"Biometrics" and "Chart Metrics" are not the correct Health Cloud objects for Remote Monitoring; instead, Remote Monitoring Device Types + Care Observations are used.

Salesforce Health Cloud Reference:

Salesforce Health Cloud - Remote Patient Monitoring:

"Use Remote Monitoring Device Types, Units of Measure, Code Sets, and Care Observations to capture and store data from connected health devices."

質問 # 56

A provider would like to create Salesforce reports to analyze patient outcomes and patient referrals.

Which three steps should a consultant recommend as part of the reporting setup to ensure the provider can view this report appropriately?

Choose 3 answers

- **A. Enable the enhanced Analytics for Healthcare setting in Setup.**
- B. Adjust template care management reports and dashboards.
- **C. Create custom report types for clinical objects.**
- D. Leverage the Patient Referral Management unmanaged package.
- **E. Assign appropriate permissions to internal users.**

正解: A、C、E

解説:

To ensure a provider can create and view Salesforce reports analyzing patient outcomes and referrals, the following steps are required:

A . Create custom report types for clinical objects.

Health Cloud clinical data (e.g., patient outcomes, referrals, care plans) resides in custom objects.

To report on them, you must create custom report types.

D . Enable the enhanced Analytics for Healthcare setting in Setup.

This setting provides preconfigured reports and dashboards tailored for healthcare, such as referrals, utilization, and outcomes reporting.

E . Assign appropriate permissions to internal users.

Providers need the correct Health Cloud and reporting permissions to access and run these reports.

Without appropriate object-level and FLS permissions, reports won't display the necessary data.

Why not the others?

B . Leverage the Patient Referral Management unmanaged package - Referral management is now native in Health Cloud. The unmanaged package was used in early versions but is deprecated and not recommended.

C . Adjust template care management reports and dashboards - These are useful but do not provide referral and outcome reporting by themselves. Customization and proper report type setup are still required.

Salesforce Health Cloud Reference:

Salesforce Health Cloud Implementation Guide - Reports and Dashboards:

"Enable Enhanced Analytics for Healthcare to access out-of-the-box reports and dashboards for referrals, utilization management, and patient outcomes."

"Create custom report types for Health Cloud clinical objects to extend reporting capabilities."

"Ensure users have the appropriate object and field permissions to run reports."

質問 # 57

A payer needs to triage provider and care team inquiries around member plan benefits and member care. The agents also need to be informed about changes in records that require attention.

Which three permission set licenses should a consultant assign to the security model for these users?

- A. CRM Content User permission set license
- B. OmniStudio User permission set license
- C. Health Cloud Platform permission set license
- D. Contact Center for Health Cloud permission set license
- E. Service Cloud User permission set license

正解: B、C、D

質問 # 58

Bloomington Caregivers would like to share patient medication information with an external pharmacy as soon as it is updated in Bloomington Caregivers' Health Cloud system. It would also like to receive an immediate confirmation about any medication Interactions from the pharmacy.

Which two Integration patterns should a consultant recommend?

Choose 2 answers

- A. Platform Event
- B. Industries ETL
- C. OmniStudio Integration Procedure
- D. Apex HTTP Callout

正解: A、D

解説:

The requirement is:

Push patient medication updates to an external pharmacy immediately → This is an event-driven use case.

Receive immediate confirmation about medication interactions from the pharmacy → This requires a synchronous call/response pattern.

The correct integration patterns are:

A . Platform Event

Best for real-time, event-driven notifications when medication information is updated in Health Cloud.

Ensures the pharmacy receives updates as soon as they occur.

D . Apex HTTP Callout

Supports synchronous communication with external systems.

Allows Health Cloud to send a request and receive an immediate confirmation/response about medication interactions from the pharmacy.

Why not the others?

B . Industries ETL - This is for batch, large-volume data movement, not real-time event-driven updates or immediate confirmations.

"Use Apex callouts when Salesforce must send a request and wait for an immediate response."
