GARP Sustainability and Climate Risk Sample Questions (Q108-Q113):

NEW QUESTION # 108

An international hotel chain reviews progress on sustainability goals in preparation for an Earth Day marketing campaign. A sustainability director suggests the hotel highlight how its energy and food sustainability initiatives align with UN SDG targets. Which of the following correctly describes an SDG target that the hotel could align with?

- A. By 2030 reduce GHG emissions to half of 2000 levels.
- B. By 2050 double the share of renewables in the energy mix.
- C. By 2030 double the rate of energy efficiency improvements.
- **D. By 2050 reduce per capita food waste by half.**

Answer: D

NEW QUESTION # 109

A timber products company in the southeastern US plants, manages, and harvests a species of trees with a 30- year growth cycle.

Prior to a planting cycle, the risk management team measures company exposure to stranded asset risk. Which of the following will the team most likely use to measure stranded asset exposure risk to the company?

- A. Timeframe before timber assets are written off
- B. Projected quality of timber products at forest maturity
- C. Short-term consumer preference shifts toward alternative products
- **D. Stringency of carbon regulations in timber farm locations**

Answer: D

NEW QUESTION # 110

A climate risk consultant advises an Eastern European central bank. In response to regulatory changes, the bank will incorporate climate-related risks into bank policies. The consultant writes a summary on how central banks incorporated climate-related risks into policies. The summary highlights the Bank of England (BoE) example to demonstrate how the BoE integrated climate-related risks within the bank supervisory scope.

Which of the following BoE practices will the consultant recommend?

- A. Integrate climate-related risks into bank monetary policy before attempting to integrate climate into other areas of bank operations.
- **B. Require banks and insurers include all material exposures relating to financial risks from climate change under capital adequacy and solvency assessments.**
- C. Adopt a policy that requires firms to submit climate risk disclosures that precisely follow NGFS guidelines.
- D. Obligate firms to allocate responsibility for climate-related risks using a bottom-up approach where the risk team assesses climate risks while the board of directors approves or denies.

Answer: B

NEW QUESTION # 111

A credit loan officer at a commercial bank reviews a loan application from a company engaged in coal-fired power generation. The loan officer examines transition risks associated with the company's business strategy.

What policy risk driver should the loan officer identify?

- A. Activists and advocacy organizations increasingly file lawsuits against fossil fuel-based power companies.
- B. Lending to a coal-fired power plant will hurt the bank's public image.
- **C. A government proposes legislation to mandate closure of all coal-fired power plants by 2035.**
- D. Prices of solar photovoltaic panels have declined since 2015.

Answer: C

NEW QUESTION # 112

A risk manager at an investment bank works on a climate disclosure project for a bank portfolio. To understand the climate impacts on the investment portfolio, the risk manager evaluates different metrics to measure climate risk exposure. The manager selects a metric that can be easily applied across asset classes.

While the metric is sensitive to outliers, calculating the metric is simple and easy to communicate to investors.

Which metric did the manager most likely select to measure climate risk exposure?

- A. Carbon intensity
- B. Carbon footprint
- **C. Weighted average carbon intensity**
- D. Total carbon emissions

Answer: C

NEW QUESTION # 113

.....
