

Dynatrace-Associate Premium Exam | Valid Dynatrace-Associate Mock Test

91%

of surveyed Dynatracers agree that this is a **great place to work**

Source: Great Place to Work® survey of Dynatracers in 2025

If you are still study hard to prepare the Dynatrace Dynatrace-Associate Exam, you're wrong. Of course, with studying hard, you can pass the exam. But may not be able to achieve the desired effect. Now this is the age of the Internet, there are a lot of shortcut to success. PDFDumps's Dynatrace Dynatrace-Associate exam training materials is a good training materials. It is targeted, and guarantee that you can pass the exam. This training matrial is not only have reasonable price, and will save you a lot of time. You can use the rest of your time to do more things. So that you can achieve a multiplier effect.

Dynatrace Dynatrace-Associate Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none"> Reporting and Analysis: Covers tools and methods for analyzing observability data and generating insights to support performance and operational decisions.
Topic 2	<ul style="list-style-type: none"> Dashboards: Covers building and customizing dashboards to visualize and communicate observability data across teams and stakeholders.
Topic 3	<ul style="list-style-type: none"> Log Investigation: Covers querying, filtering, and analyzing log data within Dynatrace to troubleshoot and identify root causes of problems.
Topic 4	<ul style="list-style-type: none"> Foundational Platform Capabilities: Covers the core features and navigation of the Dynatrace platform, including entity relationships, tagging, and how data is collected.
Topic 5	<ul style="list-style-type: none"> Kubernetes Infrastructure: Covers monitoring and observability of Kubernetes clusters, workloads, and containerized environments within Dynatrace.
Topic 6	<ul style="list-style-type: none"> Security: Covers vulnerability detection, security alerting, and how Dynatrace identifies and prioritizes security risks across the environment.
Topic 7	<ul style="list-style-type: none"> Business Analytics: Covers capturing and correlating business metrics with technical data to measure the impact of application performance on business outcomes.
Topic 8	<ul style="list-style-type: none"> Synthetics: Covers the creation and monitoring of synthetic tests to simulate user interactions and proactively detect availability or performance issues.
Topic 9	<ul style="list-style-type: none"> Automation: Covers workflows, event-driven automation, and integrations that enable teams to automate remediation and operational tasks.

Topic 10	<ul style="list-style-type: none"> Traces: Covers distributed tracing and PurePath technology to track and analyze individual transactions end-to-end across services.
Topic 11	<ul style="list-style-type: none"> User Experience Monitoring: Covers real user monitoring (RUM) to track and analyze how end users interact with and experience web and mobile applications.

Pass Guaranteed Quiz 2026 Dynatrace Dynatrace-Associate: Dynatrace Associate Certification Exam Fantastic Premium Exam

We take so much pride in the high pass rate of our Dynatrace-Associate study questions because according to the statistics from the feedbacks of all of our customers, under the guidance of our Dynatrace-Associate exam materials the pass rate has reached as high as 98% to 100%, which marks the highest pass rate in the field. So if you really want to pass the Dynatrace-Associate Exam as well as getting the certification with no danger of anything going wrong, just feel rest assured to buy our Dynatrace-Associate learning guide.

Dynatrace Associate Certification Exam Sample Questions (Q47-Q52):

NEW QUESTION # 47

Which of the following Synthetics simulate an HTTP request to a URL or endpoint?

- A. Single-URL browser monitors
- **B. HTTP monitor**
- C. Ping test
- D. Browser clickpaths

Answer: B

Explanation:

HTTP monitors are designed specifically to simulate HTTP requests to a defined URL or endpoint. They validate response codes, headers, and content, and measure availability and response time from various locations.

* Ping tests only check network-level availability using ICMP and do not perform HTTP requests

* Single-URL browser monitors simulate real browser interactions, including page rendering and JavaScript execution

* Browser clickpaths simulate multi-step user journeys through an application Therefore, HTTP monitors are the correct choice for simulating direct HTTP requests.

Reference: Based on official Dynatrace University training materials on Synthetic Monitoring types.

NEW QUESTION # 48

Which of the following describes a single operation within a Trace?

- A. Span kind
- B. Exporter
- C. Trace
- **D. Span**
- E. Context

Answer: D

Explanation:

A Span represents a single unit of work within a distributed trace.

* A Trace is the full end-to-end transaction

* A Span is one step within that trace

Other options:

* Context carries metadata

* Span kind defines role

* Exporter sends data

Only Span represents a single operation.

Reference: Based on official Dynatrace University training materials on distributed tracing.

NEW QUESTION # 49

In Distributed Traces, how is the trace-id propagated in an environment?

- A. HTTP header
- B. TLS handshake
- C. XML payload
- D. JSON payload

Answer: A

Explanation:

In distributed tracing, Dynatrace follows standard tracing protocols (such as W3C Trace Context), where the trace ID is propagated via HTTP headers between services.

This enables:

- * End-to-end trace continuity across services
- * Correlation of requests across distributed systems
- * Seamless tracking through microservices architectures

The trace context is typically included in headers like traceparent, ensuring each downstream service continues the same trace.

Other options are incorrect because:

- * XML and JSON payloads are not used for trace propagation
- * TLS handshake is unrelated to trace context propagation

Reference: Based on official Dynatrace University training materials covering distributed tracing and W3C trace context.

NEW QUESTION # 50

Select the topology levels that support the viewing of Problems. (Select all that apply)

- A. Synthetics
- B. Host
- C. Process
- D. Application
- E. Data Center
- F. Service

Answer: B,C,D,F

Explanation:

Dynatrace Problems can be viewed across key monitored entities:

- * Processes
- * Hosts
- * Applications
- * Services

These are core topology layers where Davis AI correlates issues.

Other options:

* Synthetics and Data Center are not primary topology levels for problem views Reference: Based on official Dynatrace University training materials on Smartscape and problem analysis.

NEW QUESTION # 51

Welcome to the Practical section of your exam!

This portion of the exam requires you to configure and analyze various components within Dynatrace and is open book using Dynatrace documentation ONLY by opening a new tab. The Dynatrace Operator is already deployed for you in a Kubernetes environment (Linux host) in Cloud-Native Full-Stack. The easyTrade and easyTravel applications are also already deployed for you. You will most likely only interact with the Dynatrace Environment (SaaS Platform). For a majority of these questions: paste or attach your screen captures directly to the question using the image control.

Information for connecting to exam components is provided in Dynatrace University in your event classroom. Open the Associate Exam Event / Classroom and go to the Environments tab, <https://university.dynatrace.com/account/events>

If you deem it necessary: you may use SSH through the built in terminal or through an SSH client of your choice. Use the IP address and credentials provided to log in to the Linux virtual machine running your Kubernetes cluster. When you SSH to the public IP and are presented with the credential prompt, enter the provided username and then the provided password.

Review these and additional instructions for connecting to your environment and creating screenshots by clicking 'View all questions' and then the 'Info' icon.

easyTravel Information

easyTravel is a multi-tier application implemented in .Net and Java. It provides a web portal which allows users to log in, search for journeys to various destinations, select promotional journeys that are offered, and to book a journey using credit card details.

Additionally, a Business-to-Business (B2B) web portal for travel agencies is provided where travel agencies can manage the journeys that they offer and can review reports about created bookings.

easyTrade Information

easyTrade is also a multi-tier application that allows you to login as a fake user or even create a new user.

After which point, you are able to buy and sell stocks or deposit money into your balance using fake information. These interactions will create transactions in Dynatrace for you to analyze. However, there is a load generator running which means that interacting with this page should not be necessary to answer the questions.

Tips for completing tasks:

1. Read each task carefully and fully before starting, and then follow the instructions to complete each task.
2. Be sure your screen captures match the requirements stated and are readable.
3. To create your screen captures, you can zoom your screen, or take multiple screenshots to show all the areas requested. You can attach multiple images to the same question. It is recommended to provide more proof than necessary and document your steps. When in doubt, the old saying "show your work", comes in handy.
4. Use a screen capture tool to create and then copy to your clipboard and paste screen captures directly into the file upload control. To upload a file, allowed file types for the upload are: Jpg, jpeg, and .png.
5. When saving your images for upload into the test be sure that your image titles do not contain the following characters:!,-,_.,",',(,).
6. To access the web portal, use the links found in the SSH terminal. They will be listed as soon as you login.

Tasks1:

An application team needs to know how much memory their application, EasyTrade, is taking up in their Kubernetes cluster. They have to see the memory usage for all the pods running in the 'easytrade' namespace, summed up into a single metric. Use a Dashboard in the new Platform interface (not Dashboards Classic) to show this information to the team and set the timeframe for this data to look at the last 30 minutes. Call this dashboard "EasyTrade memory usage".

Screen capture(s) required:

Upload image(s) that show the following:

1. A dashboard "EasyTrade memory usage".
2. The tile used to display memory usage for all pods in the "easytrade" namespace as well as its configuration.

Answer:

Explanation:

See the solution below

Explanation:

Objective

Create a dashboard in the new Dynatrace platform (NOT Classic) that shows:

- * Memory usage
- * For all pods
- * In easytrade namespace
- * Summed into a single metric
- * Timeframe = Last 30 minutes
- * Dashboard name = EasyTrade memory usage

STEP-BY-STEP EXECUTION

Step 1: Open Dashboards (New Platform)

* Go to: # Dashboards & Notebooks

* Click: # Dashboards

* Click: # Create Dashboard

Step 2: Name the Dashboard

* Set name exactly as: # EasyTrade memory usage

Match spelling exactly (case-sensitive matters sometimes)

Step 3: Add a Tile

* Click: # Add Tile

* Select: # Data Explorer
 # Step 4: Select the Correct Metric
 In the metric selector:
 # Choose:
 * Kubernetes container memory usage
 Typical metric:
 builtin:kubernetes.container.memory.usage
 # Step 5: Apply Namespace Filter
 * Add filter: # Kubernetes Namespace = easytrade
 ## This is CRITICAL (without this # wrong answer)
 # Step 6: Aggregate Data (MOST IMPORTANT STEP)
 * Set: # Aggregation = SUM
 # This ensures:
 All pods memory = ONE combined value
 # Step 7: Remove Splitting
 * Ensure: # No Split by anything (pod/container/etc.)
 ## If you see multiple lines # YOU DID IT WRONG
 # Step 8: Choose Visualization
 Pick one:
 * # Single value tile (BEST for exam)
 * OR simple graph (no split)
 # Step 9: Set Timeframe
 Top right of dashboard:
 # Set:
 * Last 30 minutes
 # Step 10: Save Dashboard
 * Click: # Save
 □

NEW QUESTION # 52

.....

Closed cars will not improve, and when we are reviewing our qualifying Dynatrace-Associate examinations, we should also pay attention to the overall layout of various qualifying examinations. For the convenience of users, our Dynatrace-Associate learn materials will be timely updated information associated with the qualification of the home page. Our Dynatrace-Associate Certification material get to the exam questions can help users in the first place. Users can learn the latest and latest test information through our Dynatrace-Associate test preparation materials. What are you waiting for?
