hybrid clouds.

# CompTIA Cloud Essentials+ Certification Exam Sample Questions (Q98-Q103):

**NEW QUESTION # 98**
As part of a critical SaaS application, one of the contractual statements by the cloud provider is a requirement to perform scheduled maintenance. This has a direct impact on which of the following?

- A. Service operation
- B. Service design
- C. Service strategy
- D. Service transition

**Answer: A**

**NEW QUESTION # 99**
Which of the following documents has the sole purpose of outlining a professional services engagement that governs a proposed cloud migration?

- A. Feasibility study
- B. Statement of work
- C. Service level agreement
- D. Gap analysis

**Answer: C**

**NEW QUESTION # 100**
A company has a perpetual license for a database application. Which of the following is the MOST cost-effective option when moving to the cloud?

- A. EULA
- B. BYOL
- C. Fixed
- D. Subscription

**Answer: B**

**NEW QUESTION # 101**
After a cloud migration, the company's Chief Information Officer (CIO) is evaluating the use of a multicloud strategy to avoid:

- A. cloud threats.
- B. storage cost.
- C. data sanitization.
- D. vendor lock-in.

**Answer: D**

Explanation:
A multicloud strategy is used to avoid vendor lock-in, which occurs when a company becomes overly dependent on a single cloud service provider. By using multiple cloud providers, the company can reduce the risk of being restricted to one vendor's ecosystem, giving it more flexibility and leverage in choosing services and negotiating pricing.

**NEW QUESTION # 102**
A DevOps administrator wants to use a preconfigured copy of an operating system that has the necessary agents and software already installed. Which of the following best describes this system?

- **A. Template**
- B. Microservice
- C. Container
- D. Baseline

**Answer: A**

Explanation:
A template is a preconfigured copy of an operating system or environment that includes the necessary agents, software, and configurations already installed. Templates are commonly used to quickly provision new systems or virtual machines, ensuring consistency and reducing setup time. This would be the best option for the DevOps administrator to use a ready-made configuration for deployment.

## NEW QUESTION # 103
