NEW QUESTION # 46

Consider the illustration.

What are the items labelled A, B and C?

- A. A-Enterprise Architecture, B-Architecture Building Blocks, C-Solutions Building Blocks
- B. A-Enterprise Strategic Architecture, B-Segment Architecture, C-Solutions Architecture
- **C. A-Enterprise Continuum, B-Architecture Continuum, C-Solutions Continuum**
- D. A-Architecture Vision, B-Business Architecture, C-Information Systems Architecture

Answer: C

Explanation:

The illustration shows the relationship between the Enterprise Continuum, the Architecture Continuum, and the Solutions Continuum, which are key concepts in the TOGAF framework. The Enterprise Continuum is a view of the Architecture Repository that shows how generic foundation architectures can be leveraged and specialized to support the requirements of an individual organization. The Architecture Continuum specifies a structured classification for architectural artifacts, such as models, patterns, and descriptions, that can be reused and adapted across different domains and levels of abstraction. The Solutions Continuum identifies implemented solutions that support various stages of business and IT capability evolution, such as common systems, industry solutions, and organization-specific solutions. The illustration also shows how the architecture context and requirements are influenced by external factors, such as business drivers, stakeholders, and standards, and how they shape the generic and specific architectures and solutions. The illustration also shows how the deployed solutions become part of the architecture context for future iterations of the architecture development cycle. Reference:
