Latest AI-900 Exam Experience, AI-900 Reliable Exam Topics

Dedication and solid preparation from a reliable Microsoft Campaign Certification AI-900 practice test material is needed to earn the Microsoft AI-900 credential. To do the successful and quick preparation, Free4Torrent actual Microsoft Campaign Certification AI-900 PDF Questions and practice tests should be your top priority. Free4Torrent is one of the few trusted brands that has been helping candidates crack the AI-900 test since its beginning. We have assisted hundreds of AI-900 certification applicants in clearing their Microsoft AI-900 exams. They all prepared with our valid, real, and updated Microsoft Azure AI Fundamentals Expert AI-900 exam questions of Free4Torrent. Now they all have become Microsoft Campaign Certification AI-900 certified and currently working in reputed firms at well-paid job posts.

Microsoft Azure AI Fundamentals Sample Questions (Q298-Q303):

NEW QUESTION # 298

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Answer Area		Microsoft	
	Statements	Yes	No
	Labelling is the process of tagging training data with known values.	<input type="radio"/>	<input type="radio"/>
	You should evaluate a model by using the same data used to train the model.	<input type="radio"/>	<input type="radio"/>
	Accuracy is always the primary metric used to measure a model's performance.	<input type="radio"/>	<input type="radio"/>

Answer:

Explanation:

Answer Area		Microsoft	
	Statements	Yes	No
	Labelling is the process of tagging training data with known values.	<input checked="" type="radio"/>	<input type="radio"/>
	You should evaluate a model by using the same data used to train the model.	<input type="radio"/>	<input checked="" type="radio"/>
	Accuracy is always the primary metric used to measure a model's performance.	<input type="radio"/>	<input checked="" type="radio"/>

NEW QUESTION # 299

You deploy the Azure OpenAI service to generate images.

You need to ensure that the service provides the highest level of protection against harmful content.

What should you do?

- A. Configure the Content filters settings.
- B. Customize a large language model (LLM).
- C. Configure the system prompt
- D. Change the model used by the Azure OpenAI service.

Answer: A

Explanation:

The correct answer is A. Configure the Content filters settings.

When using the Azure OpenAI Service for text or image generation, Microsoft provides built-in content filtering to help detect and block potentially harmful or unsafe outputs. These filters are part of Microsoft's Responsible AI framework and are designed to prevent the generation of offensive, violent, sexual, or otherwise restricted content.

To ensure the highest level of protection, you can configure content filter settings within the Azure OpenAI deployment. This allows you to define stricter policies based on your organization's safety requirements. For image generation models such as DALL E, enabling or strengthening these filters ensures that inappropriate or unsafe images are not generated or returned.

* B (Customize an LLM): Customization affects behavior but not safety filtering.

* C (Configure the system prompt): Adjusts response style but doesn't guarantee content safety.

* D (Change the model): Different models have similar filter systems; protection level depends on filter configuration, not the model

itself.

NEW QUESTION # 300

You are authoring a Language Understanding (LUIS) application to support a music festival.

You want users to be able to ask questions about scheduled shows, such as: "Which act is playing on the main stage?" The question "Which act is playing on the main stage?" is an example of which type of element?

- A. an utterance
- B. an intent
- C. a domain
- D. an entity

Answer: A

Explanation:

Explanation

Utterances are input from the user that your app needs to interpret.

NEW QUESTION # 301

A medical research project uses a large anonymized dataset of brain scan images that are categorized into predefined brain haemorrhage types.

You need to use machine learning to support early detection of the different brain haemorrhage types in the images before the images are reviewed by a person.

This is an example of which type of machine learning?

- A. classification
- B. clustering
- C. regression

Answer: A

NEW QUESTION # 302

Match the services to the appropriate descriptions.

To answer, drag the appropriate service from the column on the left to its description on the right. Each service may be used once, more than once, or not at all.

NOTE: Each correct match is worth one point

Services

- Azure Storage
- Language Understanding (LUIS)
- QnA Maker
- Speech

Answer Area

- Enables the use of natural language to query a knowledge base.
- Enables the real-time transcription of speech-to-text.

Microsoft

Answer:

Explanation:

Services

- Azure Storage
- Language Understanding (LUIS)
- QnA Maker
- Speech

Answer Area

- QnA Maker Enables the use of natural language to query a knowledge base.
- Language Understanding (LUIS) Enables the real-time transcription of speech-to-text.
