New Esri EAPA_2025 Test Pattern - Reliable EAPA_2025 Test Topics

In this fast-changing world, the requirements for jobs and talents are higher, and if people want to find a job with high salary they must boost varied skills which not only include the good health but also the working abilities. We provide timely and free update for you to get more EAPA_2025 Questions torrent and follow the latest trend. The EAPA_2025 exam torrent is compiled by the experienced professionals and of great value.

Esri EAPA_2025 Exam Syllabus Topics:

Topic	Details
Topic 1	• Accounting: This section of the exam measures skills of Payroll Accountants and covers the financial principles tied to payroll reporting. It includes the preparation of payroll journal entries, application of accounting principles, and accurate financial reporting of payroll expenses. Candidates must ensure the integrity of payroll data within the organization's accounting systems and support financial audits through proper reconciliation and documentation.
Topic 2	• Payroll Process and Supporting Systems and Administration: This section of the exam measures skills of Payroll Systems Administrators and covers the operational and technical aspects of payroll management. It focuses on maintaining employee master files, understanding payroll system functionalities, and ensuring business continuity through effective technology use. Candidates must also demonstrate knowledge of system upgrades, maintenance, and project implementation within payroll environments.
Topic 3	• Audits: This section of the exam measures skills of Payroll Auditors and covers the internal and external auditing processes of payroll operations. It focuses on implementing internal controls, ensuring system integrity, and maintaining compliance with audit policies and procedures. Candidates must understand how to assess third-party controls and coordinate audit activities to safeguard payroll accuracy and financial accountability.

Esri ArcGIS Pro Associate 2025 Sample Questions (Q37-Q42):

NEW QUESTION # 37
A GIS specialist has a street feature class and wants to add curves to show rounded curbs. The specialist wants to specify a fixed radius to make sure that all curbs are similar for the dataset.
Which Modify Features tool should the specialist use?

- A. Fillet
- B. Reshape
- C. Continue Feature

Answer: A

Explanation:
The Fillet tool creates a rounded arc (curved corner) between two line segments using a specified radius. This ensures consistency in curb radius across all intersections or turns.
* Reshape (Option A) modifies segments but does not create consistent curves.
* Continue Feature (Option C) adds new segments to existing features but does not round or smooth curves.
Therefore, the correct answer is B.

NEW QUESTION # 38
A GIS analyst is creating a spatial map series based on the name field for a given feature. The analyst wants to automate the map sheet's title based on that feature name.
Which tag using dynamic text will provide the desired result?

- A. Page Name
- B. Layout Name
- C. Map Name

Answer: A

Explanation:
The Page Name dynamic text tag references the current index feature's value (such as the feature name field) when creating a spatial map series. This allows the title to update automatically based on the feature used for each map sheet.
* Layout Name (Option A) references the name of the layout itself.
* Map Name (Option C) references the map's name, not the page name from the map series.

Therefore, the correct answer is B.
-

NEW QUESTION # 39
A land surveyor downloads an Excel sheet from the city website that contains the updated land cover codes with over 30 classes.
Which tool will help the surveyor update their existing land cover data to the new codes?

- A. Reclass By Table
- B. Classify Raster
- C. Reclassify Field

Answer: A

Explanation:
The Reclass By Table tool allows the surveyor to import a lookup table (such as an Excel sheet) that contains the old and new land cover codes. This is the most efficient method for batch reclassification when many classes are involved.
* Classify Raster (Option A) is used for unsupervised or supervised classification.
* Reclassify Field (Option C) is not a valid ArcGIS Pro tool for raster data reclassification.
Therefore, the correct answer is B.

NEW QUESTION # 40
A GIS analyst is working with LAS data with 17 million points on the map. The points are too big and cover the underlying areas completely. The analyst needs to change the dimensions of the points.
Which action should the analyst take to meet this requirement?

- A. Increase the point density
- B. Decrease the display limit
- C. Decrease the symbol scale

Answer: C

Explanation:
Symbol scale determines the size of points when displayed. When LAS points appear too large, decreasing the symbol scale (making symbols smaller) will reduce the visual footprint of each point and prevent them from obscuring underlying map content.
* Increasing point density (Option A) adds more points but doesn't reduce size.
* Decreasing display limit (Option B) reduces how many points are drawn but does not solve the issue of size.
* Decreasing symbol scale directly reduces the size of each point.
Therefore, the correct answer is C.
-

NEW QUESTION # 41
A GIS analyst has a feature class and a non-spatial table stored in the same geodatabase. The analyst needs to create a composite relationship to ensure data integrity.
Which association type should the analyst apply?

- A. Attribute join
- B. Relationship class
- C. Spatial join

Answer: B

Explanation:
A relationship class defines a permanent association between a feature class and a table or between two feature classes in a geodatabase. Composite relationship classes enforce referential integrity, ensuring that related records remain consistent (e.g., when a parent record is deleted, related child records are also removed).
* Attribute join (Option A) is temporary and does not enforce integrity.
* Spatial join (Option B) requires spatial relationships and applies only between spatial datasets.
* Relationship class (Option C) allows managing relationships between spatial and non-spatial tables with referential integrity.

Therefore, the correct answer is C.

-

NEW QUESTION # 42

......

Our EAPA_2025 learning materials are carefully compiled by industry experts based on the examination questions and industry trends in the past few years. The knowledge points are comprehensive and focused. You don't have to worry about our learning from EAPA_2025 exam question. We assure you that our EAPA_2025 learning materials are easy to understand and use the fewest questions to convey the most important information. As long as you follow the steps of our EAPA_2025 quiz torrent, your mastery of knowledge will be very comprehensive and you will be very familiar with the knowledge points. This will help you pass the exam more smoothly. The EAPA_2025 learning materials are of high quality, mainly reflected in the adoption rate. As for our EAPA_2025 Exam Question, we guaranteed a higher passing rate than that of other agency. More importantly, we will promptly update our EAPA_2025 quiz torrent based on the progress of the letter and send it to you. 99% of people who use our EAPA_2025 quiz torrent has passed the exam and successfully obtained their certificates, which undoubtedly show that the passing rate of our EAPA_2025 exam question is 99%. So our product is a good choice for you. Choose our EAPA_2025 learning materials, you will gain a lot and lay a solid foundation for success.
