Valid JN0-232 Test Topics - JN0-232 Latest Exam Duration

As we all know, it is a must for all of the candidates to pass the exam if they want to get the related JN0-232 certification which serves as the best evidence for them to show their knowledge and skills. If you want to simplify the preparation process, here comes a piece of good news for you. Our JN0-232 Exam Question has been widely praised by all of our customers in many countries and our company has become the leader in this field. Now I would like to give you some detailed information about the advantages of our JN0-232 guide torrent.

Juniper Security, Associate (JNCIA-SEC) Sample Questions (Q119-Q124):

NEW QUESTION # 119

What is the purpose of assigning logical interfaces to separate security zones in Junos OS?

- A. to simplify the configuration of network interfaces
- **B. to control traffic that traverses different VLANs using security policies**
- C. to enable network monitoring through SNMP
- D. to manage routing protocols and updates

Answer: B

Explanation:

In Junos OS, security zones are the foundation of SRX firewall policy enforcement. Logical interfaces must be assigned to zones.

This enables:

- * Separation of traffic by zone boundaries.
- * Enforcement of security policies for traffic traversing between zones.
- * Control of traffic across VLANs, subnets, or functional areas (e.g., trust, untrust, DMZ).

Other options:

- * Zone assignment is not used to simplify interface configuration (A).
- * Routing protocols and updates (B) are handled by routing instances, not zones.
- * SNMP monitoring (D) is enabled under system or services configuration, not zones.

Reference: Juniper Networks - Security Zones and Policy Enforcement, Junos OS Security Fundamentals.

NEW QUESTION # 120

You have a situation where legitimate traffic is incorrectly identified as malicious by your screen options. In this scenario, what should you do?

- A. Increase the sensitivity of the screen options.
- B. Discard the traffic immediately.
- C. Use the alarm-without-drop configuration parameter.
- D. Enable all screen options.

Answer: C

Explanation:

Screen options are used to detect and prevent attacks such as floods, scans, and malformed packets. In some cases, false positives may occur, where legitimate traffic is mistakenly identified as malicious.

* To address this, administrators can configure the alarm-without-drop option (Option D). This setting generates alarms/logs for suspicious traffic without actually dropping it, allowing verification before taking further action.

* Enabling all screen options (Option A) may increase false positives further.

* Discarding traffic immediately (Option B) risks disrupting legitimate communication.

* Increasing sensitivity (Option C) worsens the problem, since false positives would increase.

Correct Action: Use alarm-without-drop to log the traffic without dropping it.

Reference: Juniper Networks - Junos OS Screen Options and Troubleshooting, Junos OS Security Fundamentals.

NEW QUESTION # 121

Click the Exhibit button.

You must ensure that sessions can only be established from the external device.

Referring to the exhibit, which type of NAT is being performed?

- A. destination NAT only
- B. static NAT and source NAT
- C. source NAT only
- D. static PAT only

Answer: A

Explanation:

From the exhibit:

* The internal host (172.25.11.101) is located in the Trust zone.

* The external address (203.0.113.199/30) is used for communication with the ISP.

* The requirement is that sessions can only be initiated from the external device (the ISP or untrust side) toward the internal host.

This requirement matches the behavior of Destination NAT:

* Destination NAT only (Option A): Maps the external/public IP (203.0.113.199) to the internal/private IP (172.25.11.101). This allows inbound connections to be translated and sent to the internal host. The internal host cannot initiate outbound sessions, since the translation only applies to inbound traffic.

* Source NAT only (Option B): Used for outbound sessions from internal private IPs to the Internet.

This does not meet the requirement.

* Static PAT (Option C): Maps a single port of a public IP to a private IP/port. The exhibit does not indicate a port-based translation.

* Static NAT and source NAT (Option D): Would provide bidirectional communication, allowing sessions to be initiated in both directions. This contradicts the requirement.

Correct NAT Type:Destination NAT only

Reference:Juniper Networks -NAT Types (Source NAT, Destination NAT, Static NAT), Junos OS Security Fundamentals.

NEW QUESTION # 122

Which two statements are correct about a Juniper Packet Forwarding Engine? (Choose two.)

- A. The Packet Forwarding Engine creates the routing and switching tables.
- B. The Packet Forwarding Engine manages the Routing Engine.
- C. The Packet Forwarding Engine is responsible for forwarding transit traffic.
- D. The Packet Forwarding Engine is managed by the Routing Engine.

Answer: C,D

Explanation:

The Packet Forwarding Engine (PFE) is responsible for forwarding transit traffic, meaning it handles the actual packet processing and forwarding based on decisions made by the control plane.

The Routing Engine (RE) manages the PFE by installing forwarding tables and controlling its operation, while the PFE executes those forwarding instructions at high speed.

NEW QUESTION # 123

Which security policy component is highlighted in the exhibit?

- A. unique policy name
- B. match criteria
- C. security zone context
- D. policy action

Answer: D

Explanation:

The highlighted section (then { permit; }) defines what action the SRX firewall takes when traffic matches the defined criteria. In this case, the policy action is permit, meaning that matched HTTP traffic from the Trust zone to the Untrust zone will be allowed.

NEW QUESTION # 124

.....

There are rare products which can rival with our products and enjoy the high recognition and trust by the clients like our products. Our products provide the JN0-232 test guide to clients and help they pass the test JN0-232 certification which is highly authorized and valuable. Our company is a famous company which bears the world-wide influences and our JN0-232 Test Prep is recognized as the most representative and advanced study materials among the same kinds of products. Whether the qualities and functions or the service of our product, are leading and we boost the most professional expert team domestically.

Valid JN0-232 Test Topics: <https://www.prepawayete.com/Juniper/JN0-232-practice-exam-dumps.html>

It is highly recommended to go through the JN0-232 practice test software multiple times, Choosing PrepAwayETE as the JN0-232 exam preparation assistance will be a great help for passing the Juniper JN0-232 exam, these Juniper JN0-232 dumps contain very useful information that has helped me on the exam, Juniper JN0-232 Valid Test Practice So please assure that choosing our products is a wise thing for you.

Scaling Tcl Script Distribution, Using Access Code Libraries, It is highly recommended to go through the JN0-232 Practice Test software multiple times, Choosing PrepAwayETE as the JN0-232 exam preparation assistance will be a great help for passing the Juniper JN0-232 exam.

Juniper JN0-232 Dumps [2026] –JN0-232 Exam Questions

these Juniper JN0-232 dumps contain very useful information that has helped me on the exam, So please assure that choosing our products is a wise thing for you.

It is universally acknowledged that there are thousands of JN0-232 sure-pass materials now on the market.
