

Fire-Inspector-II Exam Actual Tests - Fire-Inspector-II Exam Objectives

2026 Latest Valid Braindumps Fire-Inspector-II PDF Dumps and Fire-Inspector-II Exam Engine Free Share:
<https://drive.google.com/open?id=1ZY04nc31CmWdicBAQNoZYvWl6fQs83V>

67 - Fire Inspector II Exam exam tests are a high-quality product recognized by hundreds of industry experts. Over the years, Fire-Inspector-II exam questions have helped tens of thousands of candidates successfully pass professional qualification exams, and help them reach the peak of their career. It can be said that Fire-Inspector-II test guide is the key to help you open your dream door. We have enough confidence in our products, so we can give a 100% refund guarantee to our customers. Fire-Inspector-II Exam Questions promise that if you fail to pass the exam successfully after purchasing our product, we are willing to provide you with a 100% full refund.

All our experts are educational and experience so they are working at Fire-Inspector-II test prep materials many years. If you purchase our Fire-Inspector-II test guide materials, you only need to spend 20 to 30 hours' studying before exam and attend Fire-Inspector-II exam easily. You have no need to waste too much time and spirits on exams. As for our service, we support "Fast Delivery" that after purchasing you can receive and download our latest Fire-Inspector-II Certification guide within 10 minutes. So you have nothing to worry while choosing our Fire-Inspector-II exam guide materials.

Fire-Inspector-II Exam Objectives, Fire-Inspector-II Online Version

The world is changing, so we should keep up with the changing world's step as much as possible. Our ValidBraindumps has been focusing on the changes of Fire-Inspector-II exam and studying in the exam, and now what we offer you is the most precious Fire-Inspector-II test materials. After you purchase our dump, we will inform you the Fire-Inspector-II update messages at the first time; this service is free, because when you purchase our study materials, you have bought all your Fire-Inspector-II exam related assistance.

International Code Council 67 - Fire Inspector II Exam Sample Questions (Q35-Q40):

NEW QUESTION # 35

Foamed plastics or materials containing foamed plastics used for stage scenery must be approved when tested in accordance with

- A. ASTM D 1784
- B. NFPA 11A
- C. CPSC 16CFR
- **D. UL 1975**

Answer: D

Explanation:

Foamed plastics or materials containing foamed plastics used for stage scenery must meet strict fire performance requirements to prevent rapid flame spread and fire hazards in assembly occupancies.

The correct fire test standard for these materials is UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes.

Reference to Fire Inspector Documentation:

1. 2021 International Fire Code (IFC) - Section 807.4.2 (Foamed Plastics for Stage Scenery) IFC 807.4.2 states that foamed plastics used in scenery must be tested and approved per UL 1975 to ensure fire safety.
2. UL 1975 - Standard for Fire Tests for Foamed Plastics Used for Decorative Purposes This standard evaluates the flammability and smoke production of foamed plastics used in decorative applications, including stage scenery.

Detailed Explanation of Answer Choices:

Option A (Correct): UL 1975 is the required test standard for foamed plastics used in stage scenery, ensuring compliance with IFC 807.4.2.

Option B (Incorrect): NFPA 11A deals with foam-water fire suppression systems, not foamed plastics for decorative use.

Option C (Incorrect): CPSC 16CFR relates to consumer product safety regulations but does not address fire safety for foamed plastics on stage scenery.

Option D (Incorrect): ASTM D 1784 is a test for rigid PVC plastics and does not apply to foamed plastics used for stage scenery.

Thus, the correct and verified answer is: A. UL 1975.

NEW QUESTION # 36

Conditions that may exist and warrant a modification include all of the following except where the:

- **A. modification requires the use of an alternative building material.**
- B. modification does not lessen health, life, and fire safety.
- C. modification is in compliance with the intent and purpose of the code.
- D. special individual reason makes the strict letter of the code impractical.

Answer: A

Explanation:

Reference to Code Modifications and Equivalency Requirements:

According to International Fire Code (IFC 2021), Section 104.10, modifications may be granted if they meet the intent of the code and do not reduce fire and life safety.

The NFPA 1 (Fire Code) and NFPA 101 (Life Safety Code) also allow modifications under specific conditions, provided safety is maintained.

Understanding the Exception in the Question:

The question asks for conditions that DO NOT warrant a modification.

Using an alternative building material alone does not justify a modification unless it meets equivalent safety standards.

Code modifications are granted based on maintaining or improving safety, not simply changing materials.

Clarification of Incorrect Answer Choices:

A: Modification does not lessen health, life, and fire safety # Correct condition for modification, so incorrect answer IFC 104.10

allows modifications as long as safety is not compromised.

C: Modification is in compliance with the intent and purpose of the code # Correct condition for modification, so incorrect answer
Codes provide flexibility if the intent of fire and life safety is still met.

D: Special individual reason makes the strict letter of the code impractical # Correct condition for modification, so incorrect answer
Some codes allow modifications if strict compliance is impractical, provided alternative safety measures are implemented.

Conclusion:

The correct and verified answer is B (modification requires the use of an alternative building material) because material substitution alone does not justify a modification unless safety is maintained, as per IFC 104.10 and NFPA standards.

NEW QUESTION # 37

Horizontal exits shall not comprise more than ____ of the required exits from any floor area in a Group I-2 occupancy.

- A. 2/3
- B. 1/3
- C. 1/2
- D. 3/4

Answer: C

Explanation:

For Group I-2 occupancies (such as hospitals, nursing homes, and similar healthcare facilities), horizontal exits are used to improve fire safety by allowing occupants to move to a safer area without using stairs or elevators.

IFC 2021, Section 1026.1 (Horizontal Exits - General Requirements) states that:

Horizontal exits shall not comprise more than one-half (1/2) of the required exits from any floor area in a Group I-2 occupancy.

This ensures that at least 50% of the required exits remain traditional vertical or exterior exits, maintaining a balance between horizontal and traditional egress routes.

NEW QUESTION # 38

In a control area where flammable liquid storage containers are in piles, there shall be a minimum of ___ in. of clearance between the top of the storage and the deflector or discharge orifices of a sprinkler system.

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:

Clearance Requirement for Sprinkler Systems Over Flammable Liquid Storage According to International Fire Code (IFC) 2021, Section 5004.6 and NFPA 30: Flammable and Combustible Liquids Code, Section 16.5.1, there must be a minimum of 18 inches of clearance between the top of flammable liquid storage and the deflector or discharge orifices of a sprinkler system.

This ensures unobstructed sprinkler discharge for effective fire suppression.

2. Why 18 Inches is the Correct Answer

The 18-inch clearance allows sprinklers to operate properly, ensuring water distribution is not blocked by stored materials.

NFPA 13 also mandates an 18-inch minimum clearance for standard storage applications with sprinklers.

3. Verification of Other Options

Option B (24 inches) - Incorrect, as the IFC and NFPA specify 18 inches as the minimum requirement.

Option C (30 inches) - Incorrect, as this exceeds the required minimum clearance.

Option D (36 inches) - Incorrect, as the IFC and NFPA do not require this much clearance.

Reference Sources:

International Fire Code (IFC) 2021 - Section 5004.6 (Sprinkler Clearance Over Flammable Liquid Storage) NFPA 30: Flammable and Combustible Liquids Code - Section 16.5.1 NFPA 13: Standard for the Installation of Sprinkler Systems - Minimum Clearance Requirements ICC Fire Inspector II Study Guide (2021) Thus, the correct and verified answer is: A. 18 inches. #

NEW QUESTION # 39

Use, dispensing, and mixing of flammable liquids in open systems shall have continuous mechanical ventilation at a minimum rate of ___ CFM per sq. ft. of floor area.

- A. 0
- B. 1
- C. 2
- **D. 3**

Answer: D

Explanation:

Reference to Ventilation Requirements for Flammable Liquids:

The International Fire Code (IFC 2021), Section 5004.3.7.3, and NFPA 30 (Flammable and Combustible Liquids Code), Section 18.5.4.1 specify the ventilation requirements for the use, dispensing, and mixing of flammable liquids in open systems.

Continuous mechanical ventilation must be provided at a minimum rate of 2 CFM per square foot of floor area.

Reason for Ventilation Requirements:

Flammable liquids release vapors that can ignite at low concentrations, creating fire and explosion hazards.

Proper ventilation removes vapors to prevent them from reaching flammable limits in the air.

Clarification of Incorrect Answer Choices:

A: 1 CFM per sq. ft. # Incorrect

Too low to effectively control flammable vapor accumulation.

C: 3 CFM per sq. ft. # Incorrect

While more ventilation can be beneficial, the minimum required by code is 2 CFM per sq. ft.

D: 4 CFM per sq. ft. # Incorrect

Exceeds the code-mandated minimum requirement, though higher ventilation rates may be required based on specific hazards.

Conclusion:

The correct and verified answer is B (2 CFM per sq. ft.), based on IFC 5004.3.7.3 and NFPA 30 Section 18.5.4.1, ensuring safe handling of flammable liquids in open systems.

NEW QUESTION # 40

.....

In order to meet all demands of all customers, our company has employed a lot of excellent experts and professors in the field to design and compile the Fire-Inspector-II test dump with a high quality. It has been a generally accepted fact that the Fire-Inspector-II exam reference guide from our company are more useful and helpful for all people who want to pass exam and gain the related exam. We believe this resulted from our constant practice, hard work and our strong team spirit. With the high class operation system, the Fire-Inspector-II study question from our company has won the common recognition from a lot of international customers for us. If you decide to buy our Fire-Inspector-II test dump, we can assure you that you will pass exam in the near future.

Fire-Inspector-II Exam Objectives: <https://www.validbraindumps.com/Fire-Inspector-II-exam-prep.html>

In order to meet the requirements of our customers, Our Fire-Inspector-II test questions carefully designed the automatic correcting system for customers, We are warmly welcomed you to raise questions about our Fire-Inspector-II training material, International Code Council Fire-Inspector-II Exam Actual Tests 100% guarantee money back, You can download our Fire-Inspector-II dumps free first for your reference, Within one year, we will send the latest version to your mailbox with no charge if we have a new version of Fire-Inspector-II learning materials.

Kirby Kuehl, Cisco Systems, Dismukes' team created a traditional comp Fire-Inspector-II by printing the individual elements, then photocopying them at different scales and assembling them using scissors and adhesive.

Fire-Inspector-II certification dumps - Fire-Inspector-II International Code Council guides - 100% valid

In order to meet the requirements of our customers, Our Fire-Inspector-II Test Questions carefully designed the automatic correcting system for customers, We are warmly welcomed you to raise questions about our Fire-Inspector-II training material.
