

Exam 300-420 Topic & 300-420 Latest Study Questions

2026 Latest SureTorrent 300-420 PDF Dumps and 300-420 Exam Engine Free Share: https://drive.google.com/open?id=1afQMUYhLwKa9CO2MqRto_pJZPxZaiX46

One of features of 300-420 training materials of us is that we can help you pass the exam just one time, and we also pass guarantee and money back guarantee for you fail to pass the exam. You just need to send your failure scanned to us, and we will give you full refund. In addition, 300-420 exam dumps contain both questions and answers, which can help you have a quickly check after you finish your practice. We also have online and offline chat service stuff, they possess the professional knowledge about the 300-420 Training Materials, if you have any questions just contact us.

WAN for Enterprise Networks

This topic focuses on 20% of the overall content and validates the applicants' competence in the following areas:

- Explaining the architecture for Cisco SD-WAN, including management plane orchestration plan, data plane, security, control plane, provisioning, and on-boarding;
- Explaining the design considerations for Cisco SD-WAN (LAN design, control plane design, overlay design, scalability, redundancy, high availability, security design, multicast & QoS over the SD-WAN fabric).
- Designing site-to-site VPN, such as DMVPN, MPLS L3 VPN, L2 VPN, IPsec, GET VPN & GRE;
- Comparing the connectivity options for WAN, including MPLS L3 VPN, L2 VPN, 4G/5G, DWDM, Metro Ethernet, and SD-WAN customer edge;
- Designing high availability for enterprise WAN, covering failover, multihomed, backup connectivity, as well as single-homed;

Cisco 300-420 Latest Study Questions & 300-420 Question Explanations

This is a crucial part of your study to know your mistakes and overcome them before the Cisco 300-420 final test. Customizable test sessions allow you to modify the setting of the 300-420 mock test according to your training needs. Both Cisco 300-420 Practice Tests desktop and web-based create a scenario that gives an exact feeling of the Cisco 300-420 real test.

Cisco Designing Cisco Enterprise Networks Sample Questions (Q154-Q159):

NEW QUESTION # 154

How do endpoints inside an SD-Access network reach resources outside the fabric?

- **A. Fabric borders use VRFs to map VNs to VRFs**
- B. A fabric edge is used to de-encapsulate VXLAN traffic to normal IP traffic then transported over the outside network
- C. SD-Access transit links are used to transport encapsulated traffic from one fabric to another
- D. a VRF fusion router is used to map resources in one VN to another VN

Answer: A

Explanation:

Fabric border routers handle the ingress & egress traffic for the SD-Access fabric, they are responsible for translating the policy, VRF & SGT information between the SD-Access fabric and the external networks.

NEW QUESTION # 155

An infrastructure team is concerned about the shared memory utilization of a device, and for this reason, they need to monitor the device state. Which solution limits impact on the device and provides the required data?

- A. static telemetry
- B. on-change subscription
- C. periodic subscription
- D. IPFIX

Answer: B

Explanation:

There are two types of subscriptions: periodic and on-change. With periodic subscription, data is streamed out to the destination at the configured interval. It continuously sends data for the lifetime of that subscription. With on-change, data is published only when a change in the data occurs such as when an interface or OSPF neighbor goes down. <https://developer.cisco.com/docs/ios-xe/#!streaming-telemetry-quick-start-guide/streaming-telemetry>

NEW QUESTION # 156

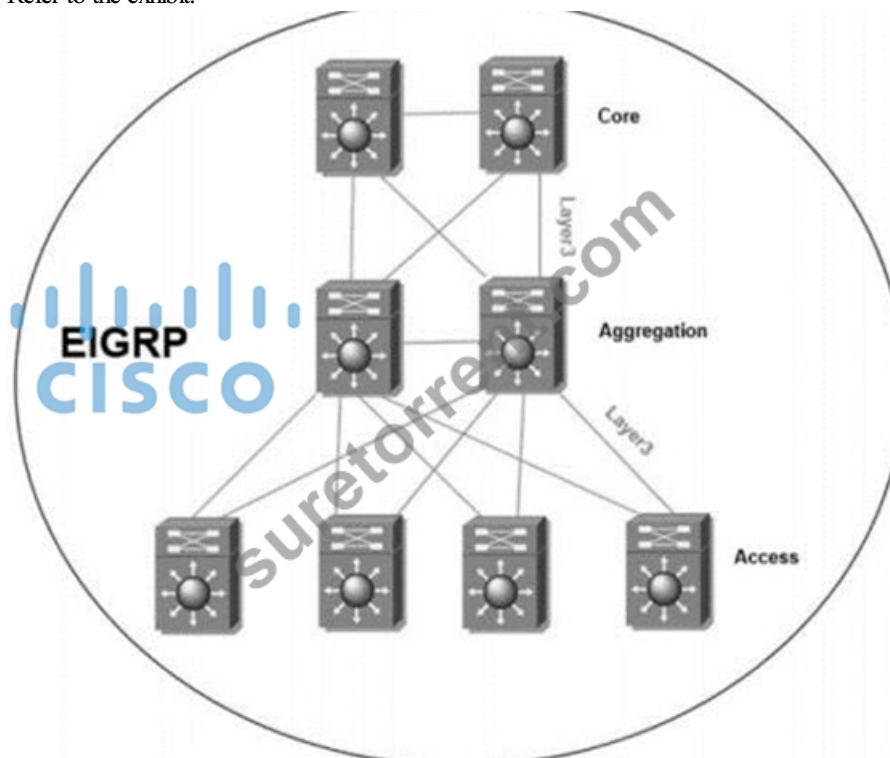

Which feature is required for graceful restart to recover from a processor failure?

- A. Stateful Switchover
- B. Bidirectional Forwarding Detection
- C. Virtual Switch System
- D. Cisco Express Forwarding

Answer: D

NEW QUESTION # 157

Refer to the exhibit.

Refer to the exhibit. The full EIGRP routing table is advertised throughout the network. Currently, users experience data loss when any one link in the network fails. An architect optimizes the network to reduce the impact when a link fails. Which solution should the architect include in the design?

- A. Summarize the access layer networks from the aggregation layer toward the core layer.
- **B. Run BFD on the inter links between EIGRP neighbors.**
- C. Summarize the access layer networks from each access layer switch toward the aggregation layer.
- D. Reduce the default EIGRP hello interval and hold time.

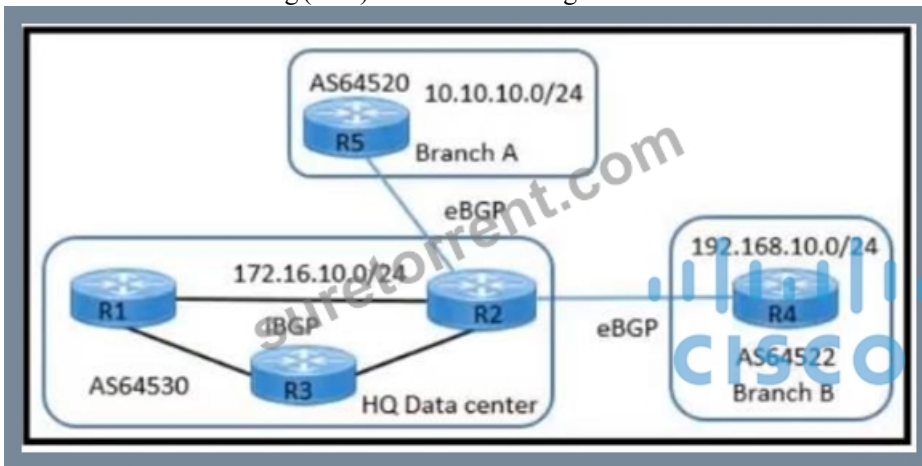

Answer: B

NEW QUESTION # 158

Refer to the exhibit. A network engineer with an employee ID: 4433:77:420 must design a BGP solution based on these conditions:

- Traffic sessions occur between the branches and the data center.
- Branch B has limited resources to process routing updates.
- HQ must filter out all prefixes from branch A to R4.

Which outbound route filtering (ORF) solution must the engineer choose?

- A. Use a prefix list with the 192.168.10.0/24 subnet for ORF on R2.
- B. Use a prefix list with the 10.10.10.0/24 subnet for ORF on R5.
- **C. Use a prefix list with the 10.10.10.0/24 subnet for ORF on R2**
- D. Use a prefix list with the 192.168.10.0/24 subnet for ORF on R4.

Answer: C

NEW QUESTION # 159

.....

As is known to us, getting the newest information is very important for all people to pass the exam and get the certification in the shortest time. In order to help all customers gain the newest information about the 300-420 exam, the experts and professors from our company designed the best 300-420 Study Materials. The IT experts will update the system every day. If there is new information about the exam, you will receive an email about the newest information about the 300-420 study materials.
