Confused About Where to Start Your Fortinet FCP_FMG_AD-7.6 Exam Preparation? Here's What You Need to Know

As for ourselves, we are a leading and old-established FCP - FortiManager 7.6 Administrator firm in a very excellent position to supply the most qualified practice materials with competitive prices and efficient obtainment. They can be obtained within five minutes. Our FCP_FMG_AD-7.6 practice materials integrating scientific research of materials, production of high quality

FCP_FMG_AD-7.6 training engine and considerate after-sales services have help us won a prominent position in the field of materials.

Fortinet FCP_FMG_AD-7.6 Exam Syllabus Topics:

Topic	Details
Topic 2	<ul style="list-style-type: none"> This section of the exam measures the skills of System Administrators and focuses on resolving problems at different levels of FortiManager. Candidates must troubleshoot deployment scenarios, imports, installations, and both device-level and ADOM-level issues, as well as identify and resolve system problems effectively.
Topic 3	<ul style="list-style-type: none"> Administration: This section of the exam measures the skills of System Administrators and covers the essential features of FortiManager. It includes the initial configuration process and the setup of administrative domains (ADOMs), ensuring smooth system management.
Topic 5	<ul style="list-style-type: none"> Device Manager: This section of the exam measures the skills of Network Security Engineers and focuses on registering devices within ADOMs and handling device configurations. Candidates also learn how to install changes through scripts and diagnose issues using the revision history.
Topic 6	<ul style="list-style-type: none"> Advanced Configuration: This section of the exam measures the skills of Network Security Engineers and includes knowledge of high availability (HA), FortiGuard service configuration, and global database ADOM settings. These advanced functions help strengthen system reliability and streamline management at a large scale.
Topic 7	<ul style="list-style-type: none"> Policy and Objects: This section of the exam measures the skills of System Administrators and evaluates their ability to manage policies and objects within FortiManager. It involves ADOM revisions, workspace mode, and policy imports and installations, emphasizing consistent policy control across networks.

Fortinet FCP - FortiManager 7.6 Administrator Sample Questions (Q25-Q30):

NEW QUESTION # 25

Refer to the exhibit. What are two results from the configuration shown in the exhibit? (Choose two.)

```
FortiManager # config system global
(global)# set workspace-mode normal
(global)# end
FortiManager #
```

- A. Multiple administrators can lock and work on separate ADOMs at the same time.
- B. Concurrent read-write access to an ADOM is disabled.
- C. All changes must be approved before they can be installed on a device.
- D. The same administrator can lock more than one ADOM at the same time.

Answer: A,D

Explanation:

The CLI command `set workspace-mode normal` configures FortiManager to use normal workspace mode, which allows:

- A single administrator to lock multiple ADOMs simultaneously, since there's no restriction on per-user ADOM access in this mode.
- Multiple administrators to work concurrently on different ADOMs, each locking their own ADOM as needed.

NEW QUESTION # 26

What allows FortiManager to run CLI scripts on FortiGate devices without prompting for SSH authentication each time?

- A. The secure management tunnel between FortiManager and FortiGate devices.
- B. The script on the FortiManager device database.
- C. FortiGate devices using the legacy login method.
- D. The script using the Remote FortiGate Directly (via CLI) option.

Answer: A

Explanation:

FortiManager uses a secure management tunnel (TCP port 541) to communicate with managed FortiGate devices. This tunnel allows FortiManager to run CLI scripts, push configuration changes, and retrieve information without prompting for SSH authentication each time, as trust is already established through device authorization and certificate exchange.

NEW QUESTION # 27

An administrator configures a new BGP peer in the FortiManager device-level database of FortiGate. They reinstall the policy package to the managed FortiGate device without any errors.

However, when the administrator logs in to FortiGate, they do not see the BGP configuration changes. What is the most likely reason why FortiManager did not push the BGP peer changes to FortiGate?

- A. The administrator must use the Install Wizard and select Install device settings only to push BGP settings
- B. Fortigate has a BGP template assigned on the FortiManager database.
- C. The FortiGate firmware version is different from the FortiManager ADOM version.
- D. The administrator must run a sanity check on FortiManager to make sure the database is not corrupted.

Answer: A

Explanation:

If you change BGP in FortiManager and only reinstall the policy package, the change will NOT reach FortiGate because BGP is a device setting. You must install device settings.

NEW QUESTION # 28

Refer to the exhibit. Which statement about the environment shown in the exhibit is correct?

SN	Mode	IP	Enable	Module Data Synchronized	Pending Module Data
FMG-VMQA16000566	Primary	10.3.106.63		0.0 KB	0.0 KB
FMG-VMQA17002226	Secondary	10.3.106.64	✓	0.0 KB	0.0 KB

Cluster Settings

Fallover Mode: Manual VRRP
Operation Mode: Standalone Primary Secondary
Peer IP and Peer SN: IP Type IPv4 Peer IP 10.3.106.64 Peer SN FMG-VMQA17002226
Cluster ID: 1 (1-64)
Group Password: [Empty]
File Quota: 4096 (2048-20480) MB
Heart Beat Interval: 10 Seconds
Failover Threshold: 30 (1-255)
VIP: [Empty]
VRRP Interface: [Empty]
Priority: 1 (1-253)
Unicast: [Off]
Monitored IP: IP [Empty] Interface [Empty]
Download Debug Log: [Download]
[Apply]

- A. No FortiGuard packages have been synchronized between the cluster members yet.
- B. You must restart the secondary unit if you promote it to become the primary.

- C. FortiAnalyzer features are not enabled on this FortiManager device.
- D. A failover will take place after five minutes without receiving heartbeat packets.

Answer: C

Explanation:

If FortiAnalyzer features are enabled, you cannot add FortiAnalyzer to FortiManager. You will also not be able to configure FortiManager high availability (HA).

NEW QUESTION # 29

Refer to the exhibits. Which IP/netmask will be present in the LAN firewall address object on the Remote-Firewall?

The screenshot shows the FortiManager device database interface. It includes a search bar, a left-hand navigation menu, and two donut charts. The 'Connectivity' chart shows 4 devices with a green segment representing 'Connection ...' and a grey segment representing 'Model Device'. The 'Device Config...' chart shows 4 devices with a green segment representing 'Synchronized' and a grey segment representing 'Unknown'. Below the charts is a table with columns for Device Name, Config Status, Provisioning Templates, Policy Package Status, and Firmware.

Device Name	Config Status	Provisioning Templates	Policy Package Status	Firmware
BR1-FGT-1	✓ Synchronized	✓ default	BR1-FGT-1	FortiGa
HQ-NGFW-1	✓ Synchronized		HQ-NGFW-1	FortiGa
Local-Firewall	⊗ Unknown		✓ Central	FortiGa
Remote-Firewall	⊗ Unknown		✓ Central	FortiGa

FortiManager address object

Edit Address - LAN

Category: Address

Name: LAN

Color:

Type: Subnet

IP/Netmask: 10.0.0.0/255.255.255.0

Interface: any

Static Route Configuration:

Comments:

Add To Groups:

Advanced Options >

Per-Device Mapping ▾

<input type="checkbox"/>	Mapped Device ⇅	Details ⇅	<input type="button" value="Settings"/>
<input type="checkbox"/>	BR1-FGT-1 [root]	IP/Netmask: 192.168.1.0/255.255.255.0	
<input type="checkbox"/>	HQ-NGFW-1 [root]	IP/Netmask: 172.16.0.0/255.255.255.0	
<input type="checkbox"/>	Local-Firewall [root]	IP/Netmask: 172.16.10.0/255.255.255.0	

3

FORTINET

- A. 172.16.0.0/255.255.255.0
- **B. 10.0.0.0/255.255.255.0**
- C. 192.168.1.0/255.255.255.0
- D. 172.16.10.0/255.255.255.0

Answer: B

Explanation:

In FortiManager, the "Per-Device Mapping" section allows for overriding the default object value for specific devices. The Remote-Firewall is not listed in the Per-Device Mapping table.

Therefore, it will use the default value defined in the top portion of the address object, which is 10.0.0.0/255.255.255.0.

NEW QUESTION # 30

.....

Do you want to pass the FCP_FMG_AD-7.6 exam and get the certificate? If you want to pass the exam easily, come to learn our FCP_FMG_AD-7.6 study materials. Our FCP_FMG_AD-7.6 learning guide is very excellent, which are compiled by professional experts who have been devoting themselves to doing research in this career for over ten years. I can say that no one can know more than them. So they know every detail of the FCP_FMG_AD-7.6 Exam Questions, and they will adopt the advices of our loyal customers to make better.
