Reliable SPLK-1004 Reliable Test Pattern & Passing SPLK-1004 Exam is No More a Challenging Task

Taking Fast2test Splunk Core Certified Advanced Power User (SPLK-1004) practice test questions are also important. These Splunk SPLK-1004 practice exams include questions that are based on a similar pattern as the finals. This makes it easy for the candidates to understand the Splunk Core Certified Advanced Power User (SPLK-1004) exam question paper and manage the time. It is indeed a booster for the people who work hard and do not want to leave any chance of clearing the SPLK-1004 exam with brilliant scores.

Splunk Core Certified Advanced Power User Sample Questions (Q90-Q95):

NEW QUESTION # 90

When using the bin command, which argument sets the bin size?

- A. max
- B. volume
- C. mazDataSizeMB
- **D. span**

Answer: D

Explanation:

When using the bin command in Splunk, the span argument is used to set the size of each bin (Option D). The span argument determines the granularity or width of each bin when segmenting data over a time range or numerical field, which is essential for time series analysis, histogram generation, or other aggregated data visualizations.

NEW QUESTION # 91

Which element attribute is required for event annotation?

- A. `<search type="annotation">`
- B. `<search type=$annotation$>`
- C. `<search type="event_annotation">`
- D. `<search style="annotation">`

Answer: A

Explanation:

In Splunk dashboards, event annotations are used to add informative overlays on timeline visualizations to mark significant events. The required element attribute to define an event annotation within a dashboard panel is `<search type="annotation">` (Option D). This attribute specifies that the search within this element is intended to generate annotations, which are then overlaid on the timeline based on the time and information provided by the search results.

NEW QUESTION # 92

When running a search, which Splunk component retrieves the individual results?

- A. Master node
- B. Search head
- C. Universal forwarder
- D. Indexer

Answer: B

Explanation:

The Search head (Option B) in Splunk architecture is responsible for initiating and coordinating search activities across a distributed environment. When a search is run, the search head parses the search query, distributes the search tasks to the appropriate indexers (which hold the actual data), and then consolidates the results retrieved by the indexers. The search head is the component that interacts with the user, presenting the final search results.

NEW QUESTION # 93

What is a performance improvement technique unique to dashboards?

- A. Using report acceleration
- B. Using global searches
- C. Using stats instead of transaction
- D. Using datamodel acceleration

Answer: A

Explanation:

Using report acceleration (Option C) is a performance improvement technique unique to dashboards in Splunk. Report acceleration involves pre-computing the results of a report (which can be a saved search or a dashboard panel) and storing these results in a summary index, allowing dashboards to load faster by retrieving the pre-computed data instead of running the full search each time. This technique is especially useful for dashboards that rely on complex searches or searches over large datasets.

NEW QUESTION # 94

How can a lookup be referenced in an alert?

- A. Upload a lookup file directly to the alert.
- B. Use the lookup dropdown in the alert configuration window.
- C. Run a search that uses a lookup and save as an alert.
- D. Follow a lookup with an alert command in the search bar.

Answer: C

Explanation:

In Splunk, a lookup can be referenced in an alert by running a search that incorporates the lookup and saving that search as an alert. This allows the alert to use the lookup data as part of its logic.

NEW QUESTION # 95

.....

Fast2test has created reliable and up-to-date SPLK-1004 Questions that help to pass the exam on the first attempt. The product is easy to use and very simple to understand ensuring it is student-oriented. The Splunk Core Certified Advanced Power User dumps consist of three easy formats; The 3 formats are Desktop-based practice test software, Web-based practice exam, and PDF.
