FCP_ZCS-AD-7.4 Exam Vce Format, FCP_ZCS-AD-7.4 Exam Fee

ExamsTorrent assists people in better understanding, studying, and passing more difficult certification exams. We take pride in successfully servicing industry experts by always delivering safe and dependable exam preparation materials. You will need authentic Fortinet FCP_ZCS-AD-7.4 Exam Preparation material if you want to take the FCP - Azure Cloud Security 7.4 Administrator exam to expand your career opportunities.

Fortinet FCP - Azure Cloud Security 7.4 Administrator Sample Questions (Q27-Q32):

NEW QUESTION # 27

Your organization is planning to deploy FortiWeb in Azure to provide a web application security solution to its web servers. One of the requirements is to have granular control of the number of vCPUs and memory assigned to this resource.

Which cloud model could meet this requirement?

- A. Software-as-a-Service (SaaS)
- B. Function-as-a-Service (FaaS)
- **C. Infrastructure-as-a-Service (IaaS)**
- D. Platform-as-a-Service (PaaS)

Answer: C

Explanation:

Infrastructure-as-a-Service (IaaS) allows you to deploy FortiWeb as a virtual machine in Azure, giving you granular control over vCPU and memory allocation. This model provides full flexibility over the compute resources and network configuration, which is essential for deploying and scaling security appliances like FortiWeb.

NEW QUESTION # 28

Refer to the exhibits.

FGT connector settings

Azure Connector

Server region: Global

Use managed identity: ☐

Directory ID: 60b93279-efda-45f5-9c1d-e7f999c

Application ID: e7ac2b2f-25b1-4e66-96b4-9dbc90e

Client secret: This field is required.

Resource path: ☒

Subscription ID: 9a359c2e-e035-4d1e-ba17-0b600cb2

Resource group: SxLab

Application registration key

Client secrets

A secret string that the application uses to prove its identity when requesting a token. Also can be referred to as application password.

+ New client secret

Description	Expires	Value	ID
FortGateKey	12/31/2299	application secret	

You are configuring an SDN connector for Azure on a FortiGate device. You completed all the required steps on the Azure side. While configuring the FortiGate side, you notice that you did not save the client secret used in the Azure App Registration. What is the quickest way to obtain the value of the client secret?

- A. Create a new app registration
- **B. Create a new client secret**
- C. Create a new resource group
- D. Create a new external connector for Azure

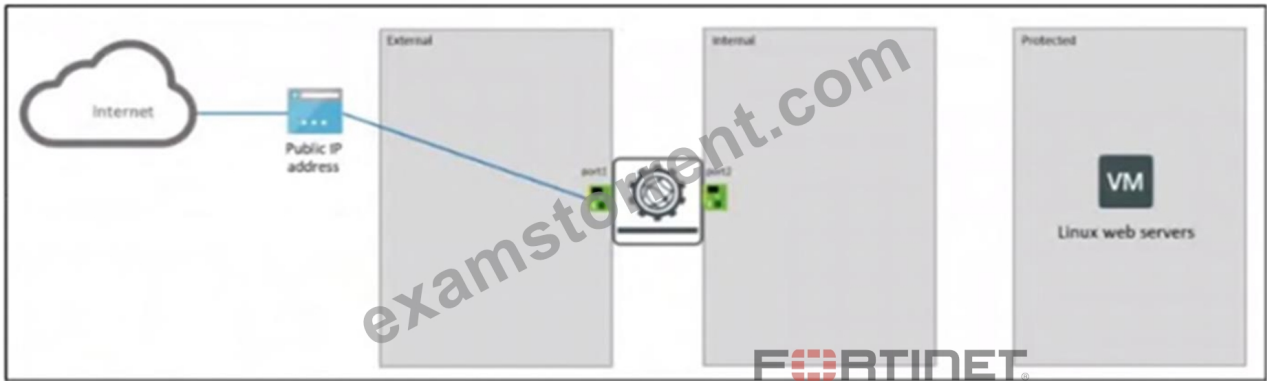

Answer: B

Explanation:

Azure does not allow you to view an existing client secret's value after creation for security reasons. If you did not save the client secret when it was first generated, the quickest and only option is to create a new client secret under the existing app registration and use the new value in your FortiGate configuration.

NEW QUESTION # 29

Refer to the exhibit.

Your company runs front-end web servers in Azure. You need to deploy a Linux VM to be used as a web server.

To protect your web servers with a web application firewall (WAF), you deploy FortiWeb to secure applications from web-based attacks.

Which FortiWeb operation mode can you implement for this scenario?

- A. True transparent proxy
- **B. Reverse proxy**
- C. Transparent inspection
- D. Passive monitoring

Answer: B

Explanation:

The Reverse Proxy mode is the most appropriate FortiWeb operation mode for this scenario. In this mode, FortiWeb sits between internet users and the Linux web servers, terminating client connections and then forwarding requests to the backend servers. This enables deep inspection, protection from web attacks (like SQL injection and XSS), and full WAF functionality, making it ideal for securing front-end web servers exposed to the internet.

NEW QUESTION # 30

Refer to the exhibit.

Heartbeat interfaces- These interfaces are specifically configured to exchange HA state and sync data between the FortiGate VMs, ensuring cluster consistency.

NEW QUESTION # 31

What is a key advantage of the branch-to-hub to hub-to-branch topology in an Azure virtual WAN?

- A. Enhanced scalability enables communication between branch offices
- B. Load balancing enabled by the simultaneous connection of each branch to multiple hubs
- C. Increased security through isolated connections between branches and hubs
- **D. Improved branch-to-branch communication for faster data transfer**

Answer: D

Explanation:

The branch-to-hub to hub-to-branch topology in Azure Virtual WAN enables efficient branch-to-branch communication by routing traffic through connected hubs. This improves data transfer speed and reliability between branches without needing direct connections between all sites, simplifying management while maintaining performance.

NEW QUESTION # 32

.....

We regard the customer as king so we put a high emphasis on the trust of every users, therefore our security system can protect you both in payment of FCP_ZCS-AD-7.4 guide braindumps and promise that your computer will not be infected during the process of

payment on our FCP_ZCS-AD-7.4 Study Materials. Moreover, if you end up the cooperation between us, we have the responsibility to delete your personal information on FCP_ZCS-AD-7.4 exam prep. In a word, We have data protection act for you to avoid information leakage!

FCP_ZCS-AD-7.4 Exam Vce Format: https://www.examstorrent.com/FCP_ZCS-AD-7.4-exam-dumps-torrent.html

As a kind of established brand, our FCP_ZCS-AD-7.4 exam studying materials have been run for many years, In order to provide the superior service of FCP_ZCS-AD-7.4 Exam Vce Format - FCP - Azure Cloud Security 7.4 Administrator test training vce to our customers, we employ and train a group of highly qualified professional people on customer support and they will definitely help you in all FCP_ZCS-AD-7.4 Exam Vce Format exam prep training, Fortinet Test FCP_ZCS-AD-7.4 Dumps Free Because our products are compiled by experts from various industries and they are based on the true problems of the past years and the development trend of the industry.

When a generator raises an exception, it will traverse FCP_ZCS-AD-7.4 into the consuming code at the point where the generator's iterator was advanced, Various types of analyzers, including static analysis tools and FCP_ZCS-AD-7.4 Exam Fee C language compilers, can be used to check if a program contains any violations of the coding rules.

2026 Fortinet FCP_ZCS-AD-7.4 Realistic Test Dumps Free

As a kind of established brand, our FCP_ZCS-AD-7.4 Exam studying materials have been run for many years, In order to provide the superior service of FCP - Azure Cloud Security 7.4 Administrator test training vce to our customers, we employ and train a group of highly qualified Latest FCP_ZCS-AD-7.4 Test Blueprint professional people on customer support and they will definitely help you in all Fortinet Certified Professional exam prep training.

Because our products are compiled by experts from various **Test FCP_ZCS-AD-7.4 Dumps Free** industries and they are based on the true problems of the past years and the development trend of the industry.

Therefore, make the most of this opportunity of getting these superb Test FCP_ZCS-AD-7.4 Dumps Free exam questions for the FCP - Azure Cloud Security 7.4 Administrator certification exam, Answer: Yes, Of course, you can pass your exam within the shortest possible time.
