

# New ISO-14001-Lead-Auditor Exam Objectives | ISO-14001-Lead-Auditor Reliable Exam Simulator

## ISO 14001 Lead Auditor Course Advancing Environmental Management Audit Competence

### Introduction

The ISO 14001 Lead Auditor Course is designed for professionals who wish to develop advanced skills in auditing environmental management systems. ISO 14001 focuses on helping organizations manage environmental responsibilities in a systematic and sustainable manner. Through lead auditor training, participants gain the knowledge and competence required to plan, conduct, and report effective environmental management system audits.

### Overview of ISO 14001 Standard

ISO 14001 is an international standard that provides a framework for establishing and maintaining an environmental management system. It emphasizes environmental protection, compliance with legal requirements, pollution prevention, and continual improvement. Understanding the standard is a core part of the lead auditor course, as auditors must assess how effectively organizations meet these requirements.

### Purpose of the Lead Auditor Course

The primary purpose of the ISO 14001 Lead Auditor Course is to develop professional auditors capable of leading environmental management system audits. The course prepares participants to evaluate conformity, identify nonconformities, and assess environmental performance. It also builds skills in audit planning, communication, and decision-making.

### Key Topics Covered in the Course

The course covers ISO 14001 requirements in detail, along with auditing principles based on ISO 19011. Participants learn about environmental aspects and impacts, compliance obligations, risk-based thinking, operational controls, and emergency preparedness. Practical audit techniques, reporting methods, and corrective action evaluation are also emphasized.

### Audit Planning and Execution Skills

A significant focus of the lead auditor course is on planning and conducting audits effectively. Participants learn how to develop audit programs, prepare checklists, conduct opening and closing meetings, gather objective evidence, and interview personnel. These skills ensure audits are systematic, objective, and value-driven.

### Benefits for Professionals and Organizations

Completing the ISO 14001 Lead Auditor Course enhances professional credibility and career opportunities in environmental management and auditing. Organizations benefit from skilled auditors who can identify improvement opportunities, ensure compliance, and strengthen environmental performance. The course supports both internal and third-party auditing roles.

## PECB Certified EMS ISO 14001 Lead Auditor Exam Sample Questions (Q21-Q26):

### NEW QUESTION # 21

An oil organisation has a natural gas treatment plant on land crossed by several small rivers. On one particular day, after heavy rainfall for 48 hours, some of those rivers burst their banks and flooded the water treatment facilities of the plant. The oil-contaminated water reached some scarcely populated areas nearby.

Soon after, an internal audit was carried out to particularly analyse this event that was considered a nonconformity. There were no records of such heavy rainfall in the past 200 years.

Which three of the following actions are 'corrections'?

- A. Revise the existing emergency plan
- B. Build up some additional protection to the water treatment plant
- C. Clean up the houses of the persons affected
- D. Send the contaminated land for processing
- E. Clean up the affected land
- F. Offer loans to the persons affected to build new houses far from the plant
- G. Relocate the water treatment plant to lower ground
- H. Reinforce the riverbanks with cement

**Answer: C,D,E**

### NEW QUESTION # 22

An organisation has the following environmental policy document displayed in the reception area:

"This organisation is committed to providing electric cables to customers' requirements, in accordance with environmental regulations for their manufacture, use and disposal. The organisation will strive to increase the environmental awareness of its personnel, suppliers, subcontractors and interested parties. Continual environmental improvement is a permanent objective of the organisation. This policy shall be communicated to all employees with the opportunity for them to seek clarification where required. Where required the policy shall be communicated to all interested parties." Referring to the above policy statement, select three options for which the organisation is meeting ISO 14001 requirements.

- A. The organisation satisfies its customers' environmental requirements.
- B. The organisation clearly meets all statutory requirements.
- C. The organisation has a commitment to environmental protection.
- D. The organisation's processes deliver the intended improvement to the environment.
- E. The organisation makes available its environmental policy to interested parties.
- F. The organisation has a good reputation for recycling its waste.
- G. The organisation is committed to continual environmental improvement.
- H. The organisation uses suppliers committed to environmental sustainability.

**Answer: A,E,G**

#### NEW QUESTION # 23

You work for a certification body. In two months, you will have to lead an audit of a pharmaceutical organisation, ABC, that manufactures vaccines to combat a pandemic. When planning the audit team, you select one of the certification body auditors who is professionally qualified in Biochemistry and Pharmacy.

However, she is not fully aware of all legal applicable requirements. You recommend the certification body hire a compliance expert to assist the audit team. In which two clauses of ISO 14001:2015 would you consider that auditors may need the help of the expert?

- A. 9.2 Internal audits
- B. 9.1.2 Compliance obligations
- C. 4.2 Understanding needs and expectations of interested parties
- D. 5.1 Leadership
- E. 5.2 Environmental Policy
- F. 7.1 Resources

**Answer: B,C**

Explanation:

According to ISO 14001:2015:

Clause 4.2:

The organization must understand the needs and expectations of interested parties, which includes regulatory bodies and applicable legal requirements. Legal expertise may be necessary to fully assess this.

Clause 9.1.2:

The organization must evaluate compliance obligations, which requires understanding applicable legal requirements.

Legal compliance evaluation often requires specialized legal or regulatory knowledge, especially in highly regulated sectors like pharmaceuticals.

Reference: ISO 14001:2015 Clauses 4.2 and 9.1.2.

#### NEW QUESTION # 24

An organisation has ISO 14001 EMS certification from a third-party certification body. Which one of the following represents an advantage of having accredited certification?

- A. Clarity of the audit report.
- B. An increase in the marketing price of the organisation's products.
- C. Recognition of the credibility of the certification process.
- D. An increase in the number of clients.

**Answer: C**

Explanation:

Accredited certification under ISO 14001 refers to certification that has been issued by a certification body that is itself accredited by a national accreditation body. This provides formal recognition that the certification body is competent to perform audits and issue certifications in accordance with ISO/IEC 17021 standards.

According to guidance in ISO 14001 Lead Auditor training materials and ISO/IEC 17021, one of the key benefits of accredited certification is:

"Recognition of the credibility, impartiality, and technical competence of the certification process and the certification body issuing the certificate." This recognition:

Increases stakeholder confidence (e.g., regulators, clients, the public), Supports market access and tender qualifications, Confirms that audits are performed in accordance with international best practices.

Option D correctly reflects the most strategic and system-level benefit of accredited certification.  
The other options (A, B, and C) may result indirectly or are not directly linked to the purpose of accreditation.

Reference:

ISO/IEC 17021:2015 - Requirements for bodies providing audit and certification of management systems ISO 14001 Lead Auditor Course Guide - Module on Certification and Accreditation ISO 14001:2015 - Clause 3.1.1 & 3.1.2 (definition of EMS and system credibility)

### NEW QUESTION # 25

An audit team leader arrives at a steel fabrication organisation that manufactures fire escape stairs to carry out a Stage 2 certification audit. At a meeting with the EMS Manager, she is told that they have won their biggest contract from a construction organisation to manufacture and install fire escape stairs. They appointed a subcontractor to perform the installation work. The EMS Manager wants the ISO 14001 audit extended to cover the installation site.

Select which one of the options is the correct response by the auditor.

- A. Would you write to my audit programme manager with this request?
- B. Can you arrange to bring the installation team here so that we can include this in the audit?
- C. We have used all our allocated time in preparation for this audit so how can we extend the audit scope?
- **D. Do you realise that this involves an extension to the scope of the audit and will require an application process?**

**Answer: D**

Explanation:

According to ISO/IEC 17021-1:2015 Clause 9.3.1 and ISO 19011:2018 Clause 5.4.1:

Any change in scope requires formal review and approval through certification body's application process.

The auditor cannot unilaterally extend the scope during the audit.

The correct course of action is to inform the auditee that scope changes require an application process.

Reference: ISO/IEC 17021-1:2015 Clause 9.3.1; ISO 19011:2018 Clause 5.4.1.
