Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 2	<ul style="list-style-type: none">• Plan a Deployment: This section of the exam measures the skills of an MDM Specialist and covers the purpose and function of Apple’s built-in MDM framework. It evaluates the foundational understanding needed to support the deployment of Apple devices at scale using MDM protocols and tools.
Topic 3	<ul style="list-style-type: none">• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 4	<ul style="list-style-type: none">• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 5	<ul style="list-style-type: none">• Device Enrollment: This section of the exam measures the skills of an MDM Specialist and covers the three main enrollment methods for Apple devices, their core concepts, and their properties. It prepares candidates to make appropriate choices based on organizational needs.
Topic 6	<ul style="list-style-type: none">• Device Security: This section of the exam measures the skills of an MDM Specialist and covers encryption on Apple platforms, FileVault operations, and the importance of key management. It focuses on protecting sensitive data on managed devices.
Topic 7	<ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 8	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.

Apple Deployment and Management Exam Sample Questions (Q21-Q26):

NEW QUESTION # 21

What can you use to supervise devices and apply additional restrictions?

- A. Managed Apple IDs
- B. Apple Business Manager
- C. Apple Configurator
- D. Apple School Manager

Answer: C

Explanation:

Apple Configurator, a macOS application, allows administrators to supervise Apple devices (iOS, iPadOS, tvOS) by connecting them via USB. Supervision enables additional restrictions and management capabilities (e.g., blocking app removal) beyond standard MDM. Apple Business Manager (option A) and Apple School Manager (option C) manage enrollment and content but don't supervise devices directly. Managed Apple IDs (option D) are accounts, not supervision tools. The Apple Platform Deployment Guide highlights Apple Configurator's role in supervision.

Reference: Apple Platform Deployment Guide (Chapter: Supervision with Apple Configurator).

NEW QUESTION # 22

Which feature in macOS allows IT administrators to manage software updates?

- A. Apple Configurator
- B. Terminal
- **C. MDM**
- D. System Preferences

Answer: C

Explanation:

Mobile Device Management (MDM) solutions provide IT administrators with the ability to manage software updates on macOS devices remotely. Through MDM, administrators can defer updates, enforce specific versions, or schedule installations, ensuring compliance and security across an organization's fleet. Apple Configurator (option A) is primarily for iOS/iPadOS/tvOS devices, not macOS update management. System Preferences (option C) allows individual users to manage updates locally, not administrators remotely. Terminal (option D) can script updates but lacks the centralized control of MDM. The MDM Protocol Reference details MDM's software update management capabilities for macOS.

NEW QUESTION # 23

What Return to Service benefit gives you the ability to quickly redeploy devices to users?

- A. Automatic creation of an Apple Account
- B. Interactive authentication during enrollment
- C. Automatic software updates
- **D. Automatic progression to the Home Screen after erasing**

Answer: D

Explanation:

Auto Advance skips setup. The Apple Configurator User Guide states, "Return to Service with Auto Advance automatically progresses to the Home Screen after erasing, speeding up redeployment." References: Apple Configurator User Guide, "Return to Service" section. Apple Platform Deployment Guide, "Device Redeployment" section.

NEW QUESTION # 24

Which feature can you use with Shared iPad?

- A. Universal Control
- B. Continuity Camera
- C. Sidecar
- **D. AirDrop**

Answer: D

Explanation:

AirDrop works with Shared iPad. The iOS Deployment Reference states, "Shared iPad supports features like AirDrop that don't require a single user's Apple ID, unlike Continuity features such as Universal Control or Sidecar." Reference: iOS Deployment Reference, "Shared iPad Features" section. Apple Platform Deployment Guide, "Shared iPad" section.

NEW QUESTION # 25

What's required to use Lost Mode on a device?

- **A. An MDM solution**
- B. A passcode
- C. iCloud enabled
- D. Find My enabled
