APICS Certified in Planning and Inventory Management (CPIM 8.0) Sample Questions (Q406-Q411):

NEW QUESTION # 406

One of the most useful tools for analyzing the sustainable footprint is:

- A. SWOT analysis.
- B. lean six sigma.
- C. ISO 9000.
- D. process mapping

Answer: D

Explanation:

Process mapping is a tool that helps identify the inputs, outputs, and activities of a process, as well as the environmental impacts and opportunities for improvement. Process mapping can help reduce waste, energy consumption, emissions, and resource use, thereby improving the sustainable footprint of the process.

Therefore, option A is correct. Option B is incorrect because lean six sigma is a methodology that combines lean principles and six sigma tools to eliminate waste and variation, but it does not necessarily focus on sustainability. Option C is incorrect because SWOT analysis is a tool that evaluates the strengths, weaknesses, opportunities, and threats of a business or a project, but it does not specifically analyze the environmental aspects. Option D is incorrect because ISO 9000 is a set of standards that define the

requirements for quality management systems, but it does not address sustainability issues. References: CPIM Part 2 Exam Content Manual, Version 8.0, Section H: Quality, Continuous Improvement, and Technology, Subsection H.4: Sustainability, p. 86.

NEW QUESTION # 407

An organization's security policy requires sensitive information to be protected when being transmitted to external sources via would be the BEST security solution to choose?

- A. Configure digital signatures to send emails externally.
- **B. Configure the system to utilize to send encrypted emails externally.**
- C. Use e-mail security gateway to send emails externally.
- D. Use spam filters and anti-virus software to send emails externally.

Answer: B

NEW QUESTION # 408

Which of the following is a core subset of The Open Group Architecture Framework (TOGAF) enterprise architecture model?

- A. Availability architecture
- B. Security architecture
- C. Privacy architecture
- **D. Data architecture**

Answer: D

NEW QUESTION # 409

Global outsourcing and shared suppliers serving an industry are drivers of which category of risk?

- A. Forecast inaccuracy
- B. Supply disruptions
- C. Procurement problems
- **D. Loss of intellectual property**

Answer: D

Explanation:

Global outsourcing and shared suppliers serving an industry are drivers of loss of intellectual property risk, which is the risk of losing proprietary information or technology to competitors or other parties. This risk can arise from inadequate protection of data, contracts, patents, or trade secrets, or from intentional or unintentional disclosure by suppliers or employees. Loss of intellectual property can result in reduced competitive advantage, lower market share, or legal disputes. Reference := CPIM Part 2 Exam Content Manual, Version 8.0, ASCM, 2021, p. 11. CPIM Part 2 Learning System, Version 8.0, Module 1, Section A, Topic 4.

NEW QUESTION # 410

Which of the following measurements indicates there may be bias In the forecast model?

- **A. Tracking signal**
- B. Variance
- C. Mean absolute deviation (MAD)
- D. Standard deviation

Answer: A

Explanation:

The tracking signal is a measurement that indicates there may be bias in the forecast model. The tracking signal is the ratio of the cumulative forecast error to the mean absolute deviation (MAD). It measures how well the forecast is tracking the actual demand over time. A tracking signal of zero means that the forecast is perfectly accurate. A tracking signal within the range of -4 to +4 is
