

# Reliable HPE7-A11 Exam Test & HPE7-A11 Reasonable Exam Price

Normally IT workers have two purposes to test for certification: one is just for certification as of job demand; two is setting one goal for striving. Why do you try our HPE7-A11 new exam guide materials? Our products are valid tested by more than 6000 candidates and can help you clear exam certainly. Forget your puzzled and distressed mood, choosing our HP HPE7-A11 new exam guide materials will help you success without any doubt.

Our website offer standard HPE7-A11 practice questions that will play a big part in the certification exam. Valid HPE7-A11 exam answers and questions are fully guaranteed and enough for you to clear test easily. Free demo of HPE7-A11 Dumps PDF allowing you to try before you buy and one-year free update will be allowed after purchased. Please feel free to contact us if you have any questions about our dumps files.

## Credible HPE7-A11 Exam Dumps bring you the most precise Preparation Questions - UpdateDumps

Are you IT person? Do you want to succeed? If you want to succeed, please do to buy Pass4Tes's HP HPE7-A11 exam training materials. Our training materials have through the test of practice. it can help you to pass the IT exam. With the UpdateDumps's HP HPE7-A11 exam training materials, you will have better development in the IT industry. You can enjoy the treatment of high-level white-collar, and you can carve out a new territory in the interation. Are you still worried about your exam? UpdateDumps's HP HPE7-A11 Exam Training materials will satisfy your desire. We are through thick and thin with you and to accept this challenge together.

## HPE Network Campus Access Professional Architect Exam Sample Questions (Q99-Q104):

### NEW QUESTION # 99

What is the best practice for using VSX at the core of a 3-tier design?

- A. You should implement VSX at the core when the aggregation layer is layer 3 only with OSPF- routed traffic forwarding Between the core and aggregation layers.
- B. You should Implement VSX at the core when the aggregation layer operates at layer 2 only.
- C. You should never implement VSX at the core of a 3-tier redundancy core.
- D. VSX-lags allow the collapsed core to connect directly to services such as gateways and services only so long as spanning tree is used to prevent loops.

**Answer: A**

Explanation:

In a 3-tier network design consisting of core, aggregation, and access layers, the implementation of Virtual Switching Extension (VSX) at the core is considered a best practice when the aggregation layer functions primarily at Layer 3 with routing protocols like

OSPF facilitating traffic forwarding between the core and aggregation layers. This design choice, as verified by Aruba Campus Access documents, leverages the high availability and redundancy features of VSX technology while maintaining efficient and scalable routing at the aggregation layer. Implementing VSX at the core in such a scenario ensures seamless failover and redundancy, minimizing the risk of downtime and ensuring consistent performance across the network. The core layer, equipped with VSX, provides a robust and resilient backbone for the network, facilitating efficient traffic management and routing decisions, which is critical for large-scale enterprise networks.

#### NEW QUESTION # 100

Which documentation resources can be used for finding validated information on HPE Aruba Networking products that assist the architect in building the solution design? (Choose three.)

- A. product reviews (CNET, Network World)
- B. configuration guides
- C. data sheets
- D. Gartner annual reports
- E. competitive documentation
- F. validated Solution Guide

**Answer: B,C,F**

Explanation:

When seeking validated information on Aruba products to assist in building a solution design, the most reliable resources include configuration guides (Option B), datasheets (Option C), and validated Solution Guides (Option F). Configuration guides provide detailed instructions and best practices for setting up and optimizing Aruba products, ensuring their proper integration into the network infrastructure. Datasheets offer concise overviews of product specifications, features, and capabilities, allowing architects to assess product suitability for specific requirements.

Validated Solution Guides compile comprehensive information on deploying Aruba solutions in various scenarios, ensuring that the solution design is based on proven methodologies and recommended practices, thereby enhancing the reliability and performance of the network solution.

#### NEW QUESTION # 101

When designing a high-availability network, which two factors should be prioritized? (Choose two.)

- A. Redundant links and failover mechanisms
- B. Automatic load balancing for traffic distribution
- C. Disabling firewall protections to increase throughput
- D. Using a single network path for all connections

**Answer: A,B**

#### NEW QUESTION # 102

A global cruise line company needs to refresh its current fleet. They will refresh the insides of the ship to be cost-effective and increase their sustainability. They will replace the complete WLAN/LAN hardware of the ship. In this refresh, the company will not refresh its current security requirements. The CIO also wants to limit the number of unused ports in the switches. Future expansion will always mean a refresh of hardware. They start with the smallest ship with a maximum of 800 guests. Each ship has a LAN infrastructure consisting of two core switches, up to 10 redundant distribution switches, and up to 500 access switches (400 cabins, 100 technical rooms). The Core switches are located in the MDF of the ship and the distribution switches are located in the IDFs of the ship. Each cabin and technical room gets one single access switch.

The cabling structure of the ship will not be refreshed. Each IDF is connected to the MDF by SMF, of which two pairs are available for the interconnect between the core and distribution. The length of SM fiber between MDF and IDF is less than 300 meters (930 ft) and the type used is OS1. Each cabin is connected by a single OM2 pair to the IDF, the maximum length is 60 meters (200 ft).

Each technical room is connected by a single OM2 pair to the IDF, with lengths between 100 and 150 meters (320 and 500 ft).

For each cabin/technical room the customer is looking to replace their current fan-less 2530/2540 without changing the requirements, except they need to upgrade the uplink to distribution switch to 10GbE to handle the increased network traffic, and the technical rooms need redundant power.

The WLAN infrastructure will be 1:1 refreshed without new cabling or new AP locations. Their WLAN Infrastructure is based on

the 200/300 series Indoor and outdoor APs running instantOS (less than 300 APs), the customer has no change in WLAN requirements.

The cruise line company will replace its current Internet connection before the LAN/WLAN refresh. The new Internet connection will provide a 99.8% uptime, which is needed to ensure the paid guest Wi-Fi is always operational. With this new internet connection, the CIO of the cruise line wants to base the design on the ESP architecture from Aruba because Internet connection is guaranteed. Based on the best practices and customer requirements, what is the correct WUN approach?

- A. Aruba OS10 AP only deployment \_\_\_\_\_
- **B. Instant OS 6 deployment**
- C. Aruba 0510 AP and gateway deployment
- D. Aruba OSS campus deployment

**Answer: B**

Explanation:

Given the customer's specific requirements to refresh their WLAN infrastructure without changing the cabling or AP locations and their existing infrastructure based on the 200/300 series Indoor and outdoor APs running InstantOS, the most appropriate WLAN approach is an Instant OS 6 deployment. This choice aligns with the need to upgrade without significant changes to the existing WLAN setup. InstantOS is specifically designed for Aruba Instant APs, offering a streamlined, controller-less architecture that is ideal for the customer's scenario, ensuring ease of deployment, management, and scalability. This approach supports the customer's objectives for a cost-effective and sustainable refresh, providing robust and reliable wireless connectivity for guests while adhering to the current security requirements and infrastructure constraints.

#### NEW QUESTION # 103

What are two concerns for C-level executives and managerial stakeholders? (Choose two.)

- A. What management tool would enable simplified access to network resources?
- **B. How to minimize the total cost of ownership which considering proposals for network expansion?**
- **C. What is the projected growth for the company and how will this affect critical business requirements?**
- D. Which CX supported routing protocols can scale the network during an upcoming building addition to the campus?
- E. How to address admin support staff concerns with the additional training required for a non-homogeneous vendor approach?

**Answer: B,C**

Explanation:

C-level and managerial stakeholders focus on strategic and financial considerations, such as anticipated business growth and how it impacts requirements, as well as minimizing total cost of ownership when evaluating solutions.

#### NEW QUESTION # 104

.....

Whatever may be the reason to leave your job, if you have made up your mind, there is no going back. By getting the HP HPE7-A11 Certification, you can avoid thinking about negative things, instead, you can focus on the positive and bright side of taking this step and find a new skill set to improve your chances of getting your dream job.

**HPE7-A11 Reasonable Exam Price:** <https://www.updatedumps.com/HP/HPE7-A11-updated-exam-dumps.html>

If you have some other questions about HP HPE7-A11 dumps torrent, ask for our customer service staff, they will contact you 24/7 online for you soon, so you can place your order assured and trusted, HP Reliable HPE7-A11 Exam Test Actualtests Succeed easily, HP Reliable HPE7-A11 Exam Test According to the survey, we have got to know that a majority of the candidates for the exam are office workers or students who are occupied with a lot of things, and they do not have enough to prepare for the exam, HP Reliable HPE7-A11 Exam Test The average preparing time of our candidates is 20-30 hours, which means you only need about two days to get yourself prepared for the exam.

During his career, Sandro has worked on a variety of projects, Exam HPE7-A11 Duration with different languages, technologies, and across many different industries, They come with incredible libraries.

If you have some other questions about HP HPE7-A11 Dumps Torrent, ask for our customer service staff, they will contact you 24/7 online for you soon, so you can place your order assured and trusted.
