## Pass OGA-031 Guaranteed, OGA-031 Top Questions

Almost everyone is trying to get ArchiMate 3 Part 1 Exam (OGA-031) certification to update their CV or get the desired job.

Nowadays, everyone is interested in taking the ArchiMate 3 Part 1 Exam (OGA-031) exam because it has multiple benefits for the future. Every candidate faces just one problem, and that is not getting updated ArchiMate 3 Part 1 Exam (OGA-031) practice questions.

## The Open Group ArchiMate 3 Part 1 Exam Sample Questions (Q70-Q75):

### NEW QUESTION # 70

Consider the following symbol, which represents information about a transformation project.

What concept does this symbol represent?

- A. A constraint
- B. A goal
- C. A principle
- D. A requirement

**Answer: C**

Explanation:

According to the ArchiMate 3.2 Specification<sup>1</sup>, a principle defines a general property that applies to any system in a certain context. A principle is a normative property of all systems in a given context that expresses a fundamental value or property<sup>1</sup>. Therefore, the correct answer is A. A principle.

### NEW QUESTION # 71

Consider the diagram showing a Claim Assessment and a Claim Settlement together with a relationship between them labeled "decision." What type of relationship is "decision"?

- A. Access
- B. Trigger
- C. Influence
- D. Flow

**Answer: B**

Explanation:

Comprehensive and Detailed In-Depth Explanation:

The Trigger relationship in ArchiMate models causality between behaviors. It represents a cause-effect relationship where one behavior initiates or enables another behavior to occur.

Understanding the Diagram:

\* The Claim Assessment activity leads to or triggers the Claim Settlement activity.

\* The relationship is labeled "decision," implying that the completion of Claim Assessment determines whether a Claim Settlement process should be initiated.

\* In ArchiMate 3.2, a Trigger relationship is represented with a dashed arrow (#) as seen in the diagram.

Analysis of Answer Choices:

#A. Flow##Incorrect

\* Flow relationships represent the transfer of information, data, or resources rather than a causal effect.

\* ArchiMate 3.2 Specification, Section 6.4.4, states that a Flow relationship is about communication or material flow, which is not the case here.

#B. Influence##Incorrect

\* Influence relationships indicate that one element affects another in a non-deterministic way (e.g., policies, motivations, or strategies).

\* ArchiMate 3.2 Specification, Section 6.4.5, states that Influence does not necessarily imply direct causation.

\* Since "decision" suggests a clear causal dependency, Trigger is the better choice.

#C. Trigger##Correct Answer

\* Trigger relationships explicitly show that one behavior initiates or causes another behavior.

\* ArchiMate 3.2 Specification, Section 6.4.3, states that a Trigger relationship models a causal dependency between two behaviors.

\* A Claim Assessment leading to a Claim Settlement fits this pattern perfectly.

#D. Access##Incorrect

\* Access relationships describe how a behavioral element reads, writes, or manipulates an object (e.g., data access).

\* ArchiMate 3.2 Specification, Section 6.4.7, states that Access is used for information retrieval or modification, which is not relevant here

#C. Trigger References:

\* ArchiMate 3.2 Specification: Sections 6.4.3 (Trigger), 6.4.4 (Flow), 6.4.5 (Influence), and 6.4.7 (Access).

\* Archi User Guide: Behavioral relationships and dependency modeling.

**NEW QUESTION # 72**

Consider the following diagram which shows part of the ArchiInsurance Claims Administration:

Which of the following correctly describes this diagram?

- A. Business event Claim Filed triggers a business process Accept Claim which in turn triggers an Assign Claim process.
- B. The information that flows from Claim Filed to Accept Claim and then to Assign Claim is reviewed by the Customer Service Representative role.
- C. The event Claim Filed triggers the Accept Claim process which is serviced by the Customer Service Representative role before the Assign Claim process.
- D. The Claim Filed event assigns the Customer Service Representative to participate in the Accept Claim and Assign Claim processing.

**Answer: A**

Explanation:

The correct answer is D. Business event Claim Filed triggers a business process Accept Claim which in turn triggers an Assign Claim

process. This is because the diagram shows a business event (Claim Filed) that initiates a business process (Accept Claim) which is performed by a business role (Customer Service Representative). The business process then triggers another business process (Assign Claim) which is also performed by the same business role. The diagram does not show any information flow or assignment relationships between the elements.

#### NEW QUESTION # 73

In the Application Layer metamodel, what is the relationship type from an application service to a data object?

- A. Access
- B. Aggregation
- C. Composition
- D. Realization

**Answer: A**

#### NEW QUESTION # 74

Within the context of Enterprise Architecture, what are the layers that can be modeled with the ArchiMate language?

- A. Infrastructure, Operations, and Security
- B. Business, Application, and Technology
- C. Strategy, Portfolio, and Segment
- D. Data, Information, and Technology

**Answer: B**

Explanation:

Comprehensive and Detailed in Depth Explanation: The ArchiMate framework consists of three core layers:

\* Business Layer: Represents business processes, services, roles, and actors.

\* Application Layer: Describes software applications and their interactions.

\* Technology Layer: Represents infrastructure elements like servers, networks, and storage.

The ArchiMate 3.2 Specification defines these three core layers as the primary structure of Enterprise Architecture modeling.
