Useful Mule-Dev-202 – 100% Free Excellect Pass Rate | Learning Mule-Dev-202 Materials

You can hardly grow by relying on your own closed doors. Our Mule-Dev-202 preparation materials are very willing to accompany you through this difficult journey. You know, choosing a good product can save you a lot of time. And choose our Mule-Dev-202 exam questions will save more for our Mule-Dev-202 learning guide is carefully compiled by the professional experts who have been

in this career for over ten years. So our Mule-Dev-202 practice braindumps contain all the information you need.

Salesforce Certified MuleSoft Hyperautomation Developer Sample Questions (Q40-Q45):

NEW QUESTION # 40
Northern Trail Outfitters must create a near real-time inventory API that can be used within its retail POS systems, across its mobile and online stores, and by its strategic B2B e-commerce partners. The API must provide accurate and up-to-date product inventory levels. The data currently resides in both SAP and NetSuite.
According to best practices, which hyperautomation tool should be used to build this solution?

- A. MuleSoft Composer
- B. Anypoint Platform
- C. Salesforce Flow
- D. MuleSoft RPA

Answer: B

Explanation:
To create a near real-time inventory API that integrates data from SAP and NetSuite and can be used across various platforms and partners, the Anypoint Platform is the most suitable tool:
Anypoint Platform:
Anypoint Platform provides comprehensive integration capabilities, including real-time data processing, API management, and connectivity to various systems like SAP and NetSuite.
It supports building robust, scalable APIs that can handle near real-time data synchronization, ensuring accurate and up-to-date inventory levels across multiple channels.
Best Practices:
Using Anypoint Platform, you can design and manage APIs with fine-grained control over security, performance, and monitoring, adhering to best practices for enterprise integration.

Anypoint Platform Documentation

NEW QUESTION # 41
Which component of Anypoint Platform is responsible for enforcing API policies?

- A. API Runtime
- B. API Gateway
- C. API Manager
- D. API Analytics

Answer: B

Explanation:
The component of Anypoint Platform responsible for enforcing API policies is the API Gateway:
API Gateway:
The API Gateway is a runtime component that enforces policies applied to APIs. It acts as an intermediary that manages API traffic, security, and performance by applying the policies configured in API Manager.
Policies such as rate limiting, security, transformation, and monitoring are enforced at the API Gateway to ensure that APIs are accessed securely and efficiently.

Anypoint Platform API Gateway Documentation

NEW QUESTION # 42
AnyAirlines needs to select a tool for developing an integration between Salesforce and an ERP system in the cloud. The requirements state that the systems must communicate bidirectionally and as close to real time as possible. The ERP system can be accessed via a SOAP-based web service.
Which tool meets the requirements of this integration?

- A. MuleSoft Composer
- B. Anypoint Studio
- C. Orchestrator
- D. MuleSoft RPA

Answer: B

Explanation:
Anypoint Studio is the most suitable tool for developing an integration between Salesforce and an ERP system in the cloud, especially when bidirectional communication in near real-time is required. Here's why:
SOAP-Based Web Services Support:
Anypoint Studio supports SOAP-based web services, which is essential since the ERP system can be accessed via SOAP.
Bidirectional Communication:
Anypoint Studio allows for complex integrations that require bidirectional communication. You can set up flows that handle both inbound and outbound data seamlessly.
Real-Time Integration:
With Anypoint Studio, you can design integrations that process data in near real-time, ensuring timely updates between Salesforce and the ERP system.
Advanced Integration Capabilities:
Anypoint Studio offers advanced capabilities for data transformation, error handling, and connecting various systems, making it ideal for complex integration scenarios.

Anypoint Studio Documentation

NEW QUESTION # 43
Northern Trail Outfitters (NTO) has a complicated process that involves several departments.
How should stages be used in Flow Orchestration to organize this process?

- A. Grouping steps based on the systems and tools that will be used to implement the process.
- B. Assigning individual steps to specific users or groups that interact with the process.
- C. Grouping steps of the process based on hand-offs or key branches of the process.
- D. Organizing individual steps to be run in parallel to one another throughout the process.

Answer: C

Explanation:
In Flow Orchestration, stages should be used to organize a complicated process by grouping steps based on hand-offs or key branches of the process:
Stages in Flow Orchestration:
Stages help structure the overall process by grouping related steps. Each stage can represent a major phase in the process, which might involve a transition of responsibility or a significant decision point.
Grouping by Hand-offs:
Organizing steps by hand-offs ensures that when responsibility shifts from one department to another, the transition is clear and manageable. This approach aligns with the natural flow of work across departments.
Key Branches:
Key branches in the process often represent decision points or significant changes in the workflow. Grouping steps that belong to these branches within specific stages helps in managing and tracking progress more effectively.

Salesforce Flow Orchestration Documentation

NEW QUESTION # 44
AnyAirlines wants to create a new marketing campaign that sends customers special offers every month based on their accrued loyalty points. There is an existing integration for customer data using MuleSoft's API-led three-tier strategy. Loyalty information exists in an external system that can be accessed via an HTTP endpoint provided by the system, but has no current integration. The external ID used will be email address.
The desired output is a CSV file containing customers that includes only the top 10 percent of loyalty point holders.
What is the most efficient way to meet this requirement?

- A. 1. Create a MuleSoft Composer flow that utilizes the current Customer integration to select all customers.2. Create an

additional MuleSoft Composer flow that retrieves all the Loyalty information.3.
Create a MuleSoft Composer flow that combines the two previous results and outputs the top 10 percent to a CSV file.

- B. 1. Have the MuleSoft team develop a new integration that includes a new System API to both the Customer and Loyalty systems.2. Create a Process API to output the final results.3. Create an Experience API for the business consumers to initiate the integration.
- C. 1. Create a Salesforce Flow that retrieves the Contact data.2. Create a Salesforce Flow that retrieves the Loyalty data.3. Create a Flow Orchestration that uses the two flows and outputs the result to a CSV file.
- D. 1. Have the MuleSoft team develop a new integration that includes a System API to the Loyalty system and uses the existing Customer System API.2. Create a Process API to output the final results.3. Create an Experience API for the business consumers to initiate the integration.

Answer: D

Explanation:
Develop System API for Loyalty System:The first step is to develop a new System API that integrates with the Loyalty system. This API will handle communication with the external system via the provided HTTP endpoint.
Reference:MuleSoft API-led Connectivity
Utilize Existing Customer System API:Use the existing System API for customer data to retrieve necessary customer information. Combining these APIs ensures a modular approach and reuse of existing assets.
Reference:API-led Connectivity
Create Process API:Develop a Process API that combines data from both the Customer and Loyalty System APIs. This API will process the data, apply business logic to filter the top 10 percent of loyalty point holders, and format the results.
Reference:Designing Process APIs
Create Experience API:Develop an Experience API to serve the business consumers. This API will provide a user-friendly interface for initiating the integration and retrieving the results as a CSV file.
Reference:API Experience Layer

NEW QUESTION # 45
.....

This helps you save your money and time as the actual Salesforce Certified MuleSoft Hyperautomation Developer Mule-Dev-202 certification exam costs a high fee.
