Latest PL-600 Test Practice & Interactive PL-600 Testing Engine

On the one hand, Microsoft Power Platform Solution Architect test torrent is revised and updated according to the changes in the syllabus and the latest developments in theory and practice. On the other hand, a simple, easy-to-understand language of PL-600 test answers frees any learner from any learning difficulties - whether you are a student or a staff member. These two characteristics determine that almost all of the candidates who use PL-600 Guide Torrent can pass the test at one time. This is not self-determination. According to statistics, by far, our PL-600 guide torrent has achieved a high pass rate of 98% to 99%, which exceeds all others to a considerable extent. At the same time, there are specialized staffs to check whether the Microsoft Power Platform Solution Architect test torrent is updated every day.

Microsoft Power Platform Solution Architect Sample Questions (Q198-Q203):

NEW QUESTION # 198

A medium-size company is evaluating Microsoft Power Platform functionality to enhance its business processes. The company currently uses a mix of spreadsheet tools and an outdated CRM system

The company requires the following business solutions:

- * bidirectional data sync between the outdated system and a new custom app
- * improved efficiency of data transfers
- * comprehensive real-time sales data displays

You need to configure the solution components for each requirement

Which components should you configure? To answer, move the appropriate solution components to the correct requirements. You may use each solution component once, more than once, or not at all. You may need to move the split bar between panes or scroll

to view content.

NOTE: Each correct selection is worth one point.

Solution components

- Power Apps
- Power Automate
- Power BI
- Power Platform dataflows

NEW QUESTION # 199

A company plans to integrate Microsoft Power Platform with existing systems, including Microsoft Dynamics 365 Omni channel for Customer Service.

You need to recommend a solution for each requirement.

Which components should you recommend for the requirements?

To answer, drag the appropriate solutions to the correct requirements. Each solution may be used once, more than once, or not at all. You may need to drag the split bar between panes or scroll to view content.

Solutions

- Custom API
- Custom pages
- Microsoft Power Virtual Agent

Answer Area

Requirement

- Display information about the contact in the Omnichannel app.
- Ensure only tables needed are exposed for integration purposes.
- Display data hierarchy from other systems within Dynamics 365 without saving the data within Microsoft Dataverse.

Solution

NEW QUESTION # 200

You design a Power Platform solution for a customer. The solution uses Microsoft Dataverse as the data store.

You are managing the go-live process for the solution.

The customer reports the following performance issues:

Form load time is much slower than it was during testing.

Overall system performance has been significantly slower than it was during testing.

You need to recommend how to troubleshoot system performance.

Which actions should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Performance issue	Action
Slow form load times	<ul style="list-style-type: none">Review workflows associated with the form events.Review QuickFind properties for the fields on the form.Review the fields that are on the form.
Overall slow system performance	<ul style="list-style-type: none">Change all security roles from global read permissions to business unit permissions.Review one to many relationships to verify whether cascade settings are necessary.Change security roles from global read access to business unit to provide better performance.

Answer:

Explanation:

Performance issue	Action
Slow form load times	<ul style="list-style-type: none">Review workflows associated with the form events.Review QuickFind properties for the fields on the form.Review the fields that are on the form.
Overall slow system performance	<ul style="list-style-type: none">Change all security roles from global read permissions to business unit permissions.Review one to many relationships to verify whether cascade settings are necessary.Change security roles from global read access to business unit to provide better performance.

Explanation

Performance issue	Action
Slow form load times	<ul style="list-style-type: none">Review workflows associated with the form events.Review QuickFind properties for the fields on the form.Review the fields that are on the form.
Overall slow system performance	<ul style="list-style-type: none">Change all security roles from global read permissions to business unit permissions.Review one to many relationships to verify whether cascade settings are necessary.Change security roles from global read access to business unit to provide better performance.

Box 1: Review the fields that are on the form

Keep the number of table columns (fields) to a minimum.

The more table columns (formerly referred to as fields) you have in a form, the more data that needs to be downloaded to view each record.

Box 2: Review one to many relationships to verify whether cascade settings are necessary.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/model-driven-apps/optimize-form-performance>

NEW QUESTION # 201

You are designing a database table for a client.

You have the following requirements:

Maintain a comprehensive list of colors and their corresponding RGB values and hexadecimal values.

Prevent the addition of duplicate colors based on the hexadecimal value for the color.

You need to recommend a design for the table.

Which two actions should the client perform after the table is created? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Configure and schedule a recurring bulk record deletion job.
- **B. Mark the RGB value column as business required.**
- C. Mark the hex value column as business required.
- **D. Create alternate keys for the table.**

Answer: B,D

Explanation:

Explanation

B: Setting a column to Business Required means that the default behavior of a model-driven or canvas app will enforce this requirement in the app.

C: With alternate keys you can now define a column in a Dataverse table to correspond to a unique identifier (or unique combination of columns) used by the external data store. This alternate key can be used to uniquely identify a record in Dataverse in place of the primary key. You must be able to define which columns represent a unique identity for your records. Once you identify the columns that are unique to the table, you can declare them as alternate keys through the customization user interface (UI) or in the code.

Reference:

<https://docs.microsoft.com/en-us/powerapps/maker/data-platform/create-edit-field-portal>

<https://docs.microsoft.com/en-us/powerapps/developer/data-platform/define-alternate-keys-entity>

NEW QUESTION # 202

A company has a list of contacts in a Microsoft Excel file. The company wants to load the contact information into a Power Platform solution.

You need to recommend a data-loading solution.

What should you recommend?

- A. Add to an existing list of contacts in a static worksheet.
- **B. Use the Excel Template feature.**
- C. Use the import from Excel feature.

Answer: B

Explanation:

Import data that's stored somewhere else into your model-driven app using the import feature in Power Apps.

Every table has required columns that must exist in your input file. It's recommended that you download an Excel template, add your data, and then import the file to your app. The template saves time and effort. Don't add or modify columns in the template to avoid issues during the import.

Note:

Step 1: Download an Excel template

To avoid mapping issue, it's recommended that you use an Excel template that you can download from your app. Once the template is downloaded add your data and then import the file back to your app. Remember don't add or modify columns in the template to avoid issues during the import process.

Step 2: Import your data

Use the template that you downloaded in the previous step (modified with your data) and import the file to your app.
