Salesforce Process Automation Accredited Professional Sample Questions (Q158-Q163):

NEW QUESTION # 158

An administrator wants to route an employee's time-off request to their manager for approval. Which tool should the administrator use?

- A. Flow Builder
- B. Process Builder
- C. Workflow Rules
- **D. Approvals**

Answer: D

Explanation:

For routing an employee's time-off request to their manager for approval, the best tool to use is Approvals. Salesforce Approvals provide a framework for defining approval processes, including specifying approvers, setting up approval steps, and determining the actions to take at each stage of the process. This tool is specifically designed to handle use cases involving approval workflows, making it well-suited for managing time-off requests. Which tools are included with the Lightning Flow product?

- A. Lightning Experience and Flow Builder
- B. Lightning App Builder and Process Builder

- C. Process Builder, Flow Builder, and Approvals
- D. Process Builder and Flow Builder

Answer: C

Explanation:

Lightning Flow encompasses several tools designed to automate business processes in Salesforce, including Process Builder, Flow Builder, and Approvals. Process Builder is ideal for creating automated processes based on record changes. Flow Builder provides a more comprehensive platform for building complex workflows with conditional logic and user interactions. Approvals are used to automate the approval process, allowing for record approval requests and tracking. Together, these tools provide a robust set of options for automating business processes within Salesforce. Reference: Salesforce Help - Lightning Flow
