Plat-Admn-202 Valid Test Voucher, Valid Plat-Admn-202 Test Notes

In order to provide most comfortable review process and straightaway dumps to those Plat-Admn-202 candidates, we offer you three versions of Plat-Admn-202 exam software: the PDF version, the online version, and software version. There will be one version right for you and help you quickly pass the Plat-Admn-202 with ease, so that you can obtain the most authoritative international recognition on your IT ability.

Salesforce Plat-Admn-202 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Business Logic and Process Automation: This section of the exam measures the skills of Process Automation Specialists and Salesforce Administrators and covers the key tools Salesforce provides to automate and enforce business logic. It focuses on using formula fields, roll-up summary fields, and validation rules to meet defined requirements. Candidates must also understand approval processes and know how to select the right automation tool to prevent conflicts or errors. The domain emphasizes evaluating business requirements and recommending automation solutions that maintain system stability and accuracy.

Topic 2	<ul style="list-style-type: none"> • Data Modeling and Management: This section of the exam measures the skills of Data Analysts and Salesforce Administrators and covers the core principles of designing and maintaining Salesforce data structures. It requires selecting the correct data model in various scenarios and understanding relationship types and how they influence reporting, record access, and the user interface. It also tests knowledge of field data types and the operational impact of changing them. The section includes evaluating the use of Schema Builder and understanding the considerations involved in importing and exporting data across internal and external sources.
Topic 3	<ul style="list-style-type: none"> • User Interface: This section of the exam measures the skills of Salesforce UI Designers and Lightning App Builders and covers the ways in which Salesforce interfaces can be customized to improve usability. It includes understanding available options for UI customization and demonstrating when to apply custom buttons, links, and actions. The domain also distinguishes between declarative and programmatic methods for incorporating Lightning components in applications, ensuring that the right approach is selected for different user interface needs.
Topic 4	<ul style="list-style-type: none"> • Salesforce Fundamentals: This section of the exam measures the skills of Salesforce Administrators and Junior Salesforce Consultants and covers the essential concepts needed to understand how Salesforce works at a foundational level. It focuses on recognizing when to use declarative tools versus programmatic customization, determining when AppExchange apps extend org capabilities, and understanding key methods for managing object, record, and field access. It also evaluates your ability to choose the right sharing model based on business needs and to apply reporting tools effectively, including report types and dashboards. Additionally, the domain reviews how to optimize the mobile experience through actions and layouts, and how Chatter can be used to support collaboration.
Topic 5	<ul style="list-style-type: none"> • App Deployment: This section of the exam measures the skills of Release Managers and Salesforce Administrators and covers the application lifecycle from planning through deployment. It requires determining the appropriate strategy when working with different sandboxes and managing milestones during development. Candidates must know when to use change sets and how to troubleshoot deployment issues. The section also includes understanding the implications of using unmanaged versus managed packages and selecting the correct deployment plan for various business scenarios.

Salesforce Certified Platform App Builder Sample Questions (Q98-Q103):

NEW QUESTION # 98

An app builder needs to change the data type of some custom fields.

Which two limitations should the app builder be aware of when changing the data type of a custom field?

Choose 2 answers

- A. It is not possible to change the data type of a formula field to any data type.
- B. It is not possible to change the data type of field referenced by Apex code,
- C. It is not possible to change the data type of a field used as an External ID from number to text.
- D. It is not possible to change the data type of a Text Area (Long) field to Text.

Answer: A,D

Explanation:

Changing the data type of custom fields in Salesforce has specific limitations that need to be considered to ensure system integrity and prevent errors:

A . It is not possible to change the data type of a formula field to any data type. Formula fields are calculated based on other field values and cannot be converted into a storage data type because they do not store data themselves.

D . It is not possible to change the data type of a Text Area (Long) field to Text. Text Area (Long) fields support up to 131,072 characters, which far exceeds the 255 character limit of standard Text fields. Converting such a field to a smaller capacity field would potentially lead to data truncation or loss.

For official guidance on data type changes, refer to Salesforce's Custom Field Considerations.

NEW QUESTION # 99

universal containers has 20 different workflows on the opportunity object. To ensure that updates are processing properly for all

field updates uc has the re-evaluate workflow rules after field change checkbox checked. Recently after adding a new workflow, users have reported receiving errors about workflow limits. What should a app builder look at so address this?

- A. Workflows on other objects that are being re triggered
- B. Talk to a developer about apex code issues
- **C. Workflows that cause each other to fire back and forth recursively**
- D. Number of workflows per object limits

Answer: C

Explanation:

Workflows that cause each other to fire back and forth recursively can result in workflow limits errors. For example, if workflow A updates a field that triggers workflow B, and workflow B updates a field that triggers workflow A, this can create an infinite loop of workflows that exceed the maximum number of workflow time triggers per hour.

NEW QUESTION # 100

Universal Containers (UC) has a time-sensitive need for a custom component to be built in 4 weeks; UC developers require additional enablement to complete the work and are backlogged by several months. Which option should an app builder suggest to meet this requirement?

- **A. Use an AppExchange solution.**
- B. Build a Lightning record page.
- C. Build a screen flow page.
- D. Use a Boit solution

Answer: A

Explanation:

An AppExchange solution is a pre-built application or component that can be installed from the Salesforce AppExchange, which is an online marketplace for Salesforce products. AppExchange solutions can help you meet your business needs quickly and efficiently, without requiring much development effort or expertise. You can browse and search for AppExchange solutions by category, industry, rating, price, and more.

NEW QUESTION # 101

A business user at Universal Containers wants to update an Account directly from an Opportunity record. What should the app builder create to allow the business user to make these edits?

- A. Opportunity fields updated by a process.
- B. An update record action with a details component
- C. Formula fields displaying the Account fields.
- **D. An update record action with a related record component.**

Answer: D

Explanation:

Salesforce Help - Creating Quick Actions

NEW QUESTION # 102

The sales team receives a list of approximately 800 leads each morning from the marketing team. The marketing team does not know if any of the leads are currently in the pipeline and sends the entire list each morning.

Which tool should be used to import these leads into Salesforce while preventing the duplicates from being inserted?

- A. Manual entry
- **B. Data Import Wizard**
- C. Data Loader
- D. Dataloaderio
