

# Free PDF Quiz 2026 Marvelous SPLK-3002: Splunk IT Service Intelligence Certified Admin Test Practice

What's more, part of that GetValidTest SPLK-3002 dumps now are free: <https://drive.google.com/open?id=1RplxqWLinxNw8JFEdKIy95wCu94qS6>

As you see, all of the three versions are helpful for you to get the SPLK-3002 certification: the PDF, Software and APP online. So there is another choice for you to purchase the comprehensive version which contains all the three formats, it is the Value Pack. Besides, the price for the Value Pack is quite favorable. And no matter which format of SPLK-3002 study engine you choose, we will give you 24/7 online service and one year's free updates on the SPLK-3002 practice questions.

To prepare for the SPLK-3002 certification exam, candidates can take advantage of Splunk's official training courses and other resources, such as online documentation, user groups, and forums. The official Splunk IT Service Intelligence Fundamentals course is recommended as a prerequisite for the exam. Additionally, candidates can gain hands-on experience by setting up and configuring ITSI environments, and by working on real-world ITSI projects.

To pass the Splunk SPLK-3002 exam, candidates must demonstrate their proficiency in various areas, including ITSI architecture and deployment, data onboarding and management, service analysis and troubleshooting, and advanced configuration and customization. SPLK-3002 Exam consists of 60 multiple-choice questions that must be completed within 90 minutes, and candidates must score at least 70% to pass. Successful candidates will receive the Splunk IT Service Intelligence Certified Admin certification, which is a valuable credential that is recognized by IT organizations around the world.

## Splunk IT Service Intelligence Certified Admin Sample Questions (Q92-Q97):

### NEW QUESTION # 92

How do you automatically restrict a KPI to only the entities in its service, and generate KPI values for each entity?

- A. Select "No" for both "Split by Entity" and "Filter to Entities in Service".
- B. Select "Yes" for "Split by Entity" and "No" for "Filter to Entities in Service".
- C. Select "No" for "Split by Entity" and "Yes" for "Filter to Entities in Service".
- D. **Select "Yes" for both "Split by Entity" and "Filter to Entities in Service".**

**Answer: D**

### NEW QUESTION # 93

There are two departments using ITSI. Finance and Sales. Analysts in each department should not be allowed to see each other's services. What are the role configuration steps required to accomplish this?

- A. itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_analyst.
- B. itoa\_finance\_admin, inherited from itoa\_team\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_analyst.
- C. **itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_analyst; itoa\_sales\_analyst, inherited from itoa\_team\_analyst.**
- D. itoa\_finance\_admin, inherited from itoa\_admin; itoa\_sales\_admin, inherited from itoa\_team\_admin; itoa\_finance\_analyst, inherited from itoa\_team\_analyst; itoa\_sales\_analyst, inherited from itoa\_team\_analyst.

**Answer: C**

### NEW QUESTION # 94

Which capabilities are enabled through "teams"?

- A. Teams restrict searches against the itsi\_notable\_audit index.
- B. Teams allow searches against the itsi\_summary index.
- C. **Teams allow restrictions to service content in UI views.**
- D. Teams restrict notable event alert actions.

**Answer: C**

Explanation:

D is the correct answer because teams allow you to restrict access to service content in UI views such as service analyzers, glass tables, deep dives, and episode review. Teams also control access to services and KPIs for editing and viewing purposes. Teams do not affect the ability to search against the itsi\_summary index, restrict notable event alert actions, or restrict searches against the itsi\_notable\_audit index. Reference: Overview of teams in ITSI

### NEW QUESTION # 95

When working with a notable event group in the Notable Events Review dashboard, which of the following can be set at the individual or group level?

- A. Severity, comments, service.
- B. Service, status, owner.
- C. Severity, status, service.
- D. **Severity, status, owner.**

**Answer: D**

Explanation:

In the Notable Events Review dashboard within Splunk IT Service Intelligence (ITSI), when working with a notable event group, users can set or adjust certain attributes at the individual event level or at the group level. These attributes include:

Severity: The importance or impact level of the notable event or group, which can be adjusted to reflect the current assessment of

the situation.

Status: The current state of the notable event or group, such as "New," "In Progress," or "Resolved," indicating the progress in addressing the event or group.

Owner: The user or team responsible for managing and resolving the notable event or group.

These settings allow for effective management and tracking of notable events, ensuring that they are appropriately prioritized, acted upon, and resolved by the responsible parties.

## NEW QUESTION # 96

How can admins manually control groupings of notable events?

- A. Correlation searches.
- B. notable\_event\_grouping.conf
- **C. Aggregation policies.**
- D. Multi-KPI alerts.

**Answer: C**

Explanation:

In Splunk IT Service Intelligence (ITSI), administrators can manually control the grouping of notable events using aggregation policies. Aggregation policies allow for the definition of criteria based on which notable events are grouped together. This includes configuring rules based on event fields, severity, source, or other event attributes. Through these policies, administrators can tailor the event grouping logic to meet the specific needs of their environment, ensuring that related events are grouped in a manner that facilitates efficient analysis and response. This feature is crucial for managing the volume of events and focusing on the most critical issues by effectively organizing related events into manageable groups.
