Nutanix Certified Associate v6.10 Sample Questions (Q39-Q44):

NEW QUESTION # 39
What is the easiest way to get a call back from Nutanix Support on an open ticket?

- A. Select Escalate within the existing ticket.
- B. Select Reply within the existing ticket.
- C. Send an email to the technician.
- D. Open a new ticket with Nutanix Support.

Answer: A

Explanation:
The correct answer is D. Select Escalate within the existing ticket.
When working with Nutanix Support, the most effective and structured way to request a callback or faster response is to use the "Escalate" function available in the Support Portal for the specific support case. This formally flags the case for priority handling, prompting action such as:
* A direct call back from support.
* Assignment of a higher-tier engineer.
* Accelerated SLA response.
Clarifications:
* A. Emailing the technician may go unnoticed or be delayed.
* B. Opening a new ticket introduces duplication and delays.
* C. Replying within the case does not prompt immediate re-evaluation unless escalation is used.

* My Nutanix Support Portal Guide - Case Management
* Excerpt: "Use the 'Escalate' option within an open case to notify Nutanix Support that a higher level of engagement is required."

NEW QUESTION # 40
What is the minimum number of nodes required in a cluster for enabling Erasure Coding?

- A. 0
- B. 1
- C. 2
- D. 3

Answer: C

Explanation:
The correct answer is C. 4
Erasure Coding (EC-X) in Nutanix is a data efficiency feature that replaces multiple replicas with parity data to reduce storage overhead while still protecting against failures. The minimum node requirement for enabling Erasure Coding is 4 nodes, due to the need to distribute data and parity across multiple failure domains.
Details:
* RF2 with EC-X requires at least 4 nodes.
* RF3 with EC-X require at least 6 or 8 nodes, depending on configuration.
Prism UI Navigation Path:
Storage > Storage Containers > Enable EC-X
Official Reference:

* Excerpt: "A minimum of 4 nodes is required in a Nutanix cluster to enable Erasure Coding (EC-X) with RF2."

NEW QUESTION # 41

Which Nutanix Disaster Recovery component or feature provides the best Recovery Time Objective (RTO)?

- A. Metro Availability
- B. Async
- C. Availability Zone
- D. NearSync

Answer: A

Explanation:
Nutanix Metro Availability provides the best Recovery Time Objective (RTO) because it enables synchronous replication between two sites. In the event of a failure at one site, VMs can be instantly restarted on the other site with minimal disruption. This setup ensures zero data loss and near-instantaneous recovery.
* A. Async:Provides high RPO (Recovery Point Objective) but has a longer RTO compared to synchronous replication methods.
* B. Availability Zone:This term refers to a general site setup, not specific to recovery objectives.
* C. Metro Availability:Correct, as it uses synchronous replication for near-zero RTO.
* D. NearSync:Provides better RPO than Async but does not match the RTO of Metro Availability.

- B. Use third party tools.
- C. Use the Recycle Bin.

* NutanixSupportcan assist in recovering the VM in itsmost up-to-date state.
* No snapshots or backups are required for this recovery mechanism.
* TheRecycle Bin is enabled by defaultin recent AOS versions.
UI Path (for visibility):
This functionality is internal and requires Support engagement for recovery.
Clarification:
