Three Easy-to-Use and Compatible Pass4sures Microsoft AZ-140 Exam Questions

You can first download Pass4sures's free exercises and answers about Microsoft certification AZ-140 exam as a try, then you will feel that Pass4sures give you a reassurance for passing the exam. If you choose Pass4sures to provide you with the pertinence training, you can easily pass the Microsoft Certification AZ-140 Exam.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q82-Q87):

NEW QUESTION # 82

You plan to deploy Windows Virtual Desktop to meet the department requirements shown in the following table.

□ You plan to use Windows Virtual Desktop host pools with load balancing and autoscaling.

You need to recommend a host pool design that meets the requirements. The solution must minimize costs.

What is the minimum number of host pools you should recommend?

- A. 0
- **B. 1**
- C. 2
- D. 3

Answer: B

Explanation:

Reference:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-host-pools-azure-marketplace>

3 Host Pools - The RemoteApp can be joined inside the IT Multi-Session desktop or the Engineering.

<https://docs.microsoft.com/en-us/azure/virtual-desktop/manage-app-groups> The default app group created for a new Azure Virtual Desktop host pool also publishes the full desktop. In addition, you can create one or more RemoteApp application groups for the host pool.

NEW QUESTION # 83

You have an Azure Virtual Desktop deployment that uses Azure Active Directory Domain Services (Azure AD DS). You have the following host pool:

- * Name: Pool1
- * Type: Personal
- * Number of session hosts: 5

You plan to deploy two new session hosts to Pool1. What should you do before you deploy the session hosts?

- A. Create a registration key.
- **B. Precreate a computer account in Azure AD DS.**
- C. Increase the maximum session limit.
- D. Create a scaling plan.

Answer: B

Explanation:

Explanation

This is done by using the Add-AzDomainComputer cmdlet in PowerShell. After the computer accounts have been created, the new session hosts can be deployed. For more information, please refer to the following Microsoft documentation:

<https://docs.microsoft.com/en-us/azure/virtual-desktop/create-session-host-pools#precreate-comp>

NEW QUESTION # 84

You have an Azure subscription that contains an Azure Virtual Desktop deployment. The deployment contains 25 session hosts.

You create two storage accounts as shown in the following table.

□ The storage accounts store Azure Virtual Desktop user profile data.

You plan to deploy FSLogix user Profile Containers that will use Cloud Cache.

You need to configure the FSLogix registry settings for each session host.

How should you complete the registry settings? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

□

Answer:

Explanation:

□ Explanation:

□

NEW QUESTION # 85

-

You have an Azure subscription that contains a user named User1.

The subscription uses the Azure Virtual Desktop host pools shown in the following table.

□

You need to ensure that User1 can create RemoteApp app groups that will be used to stream a suite of custom apps from the host

pools. The solution must meet the following requirements:

- * The apps must be available to the users in all the pools.
- * The principle of least privilege must be followed.
- * Administrative effort must be minimized.

Which role should you assign to User1, and what is the minimum number of app groups that User1 should create? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 86

-

You have an Azure Virtual Desktop deployment and two Azure Active Directory groups named Group1 and Group2.

You create two Conditional Access policies named Policy1 and Policy2. Policy1 is assigned to Group1.

Policy2 is assigned to Group2. Both policies include Azure Virtual Desktop as a cloud app.

You need to meet the following requirements:

- * The users in Group1 must be prompted for multi-factor authentication (MFA) when they connect to Azure Virtual Desktop.
- * The users in Group2 must reauthenticate every eight hours while they are connected to Azure Virtual Desktop.

Which settings should you configure in Policy1 and Policy2? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:
