P.S. Free & New DEP-2025 dumps are available on Google Drive shared by DumpsActual: <https://drive.google.com/open?id=1U2Hxg2QheEEKrNj8ksLcoDpXcd6E7EKb>

Time is nothing; timing is everything. Stop hesitating. DEP-2025 VCE dumps help you save time to clear exam. If you choose valid exam files, you will pass exams one-shot; you will obtain certification in the shortest time with our Apple VCE dumps. If you complete for a senior position just right now, you will have absolutely advantage over others. Now, don't wasting time again, just start from our DEP-2025 VCE Dumps. Excellent & valid VCE dumps will make you achieve your dream and go to the peak of your life ahead of other peers.

We have free demos of our DEP-2025 learning braindumps for your reference, as in the following, you can download which DEP-2025 exam materials demo you like and make a choice. Therefore, if you really have some interests in our DEP-2025 Study Guide, then trust our professionalism, we will give you the most professional suggestions on the details of the DEP-2025 practice quiz, no matter you buy it or not, just feel free to contact us!

DEP-2025 Braindumps Torrent - DEP-2025 High Quality

The quality of our DEP-2025 practice engine is trustworthy. We ensure that you will satisfy our study materials. If you still cannot trust us, we have prepared the free trials of the DEP-2025 study materials for you to try. In fact, we never cheat on customers. Also, our study materials have built good reputation in the market. You can totally fell relieved. Come to buy our DEP-2025 Exam Questions and you will feel grateful for your right choice.

Apple DEP-2025 Exam Syllabus Topics:

Topic	Details
Topic 1	<ul style="list-style-type: none">• Apple Business Manager and Apple School Manager: This section of the exam measures the skills of an MDM Specialist and covers managing connections to resellers and managing device suppliers. It emphasizes the use of Apple Business Manager or School Manager to streamline large-scale deployments.
Topic 2	<ul style="list-style-type: none">• Network Integration: This section of the exam measures the skills of an IT Administrator and covers assessing network responsiveness and device connectivity. It also covers wireless auto-join behavior on Apple devices and ensures strong network coverage.
Topic 3	<ul style="list-style-type: none">• Device Support: This section of the exam measures the skills of an IT Administrator and covers troubleshooting Mac startup, recovery, and password reset processes using macOS Recovery. It ensures support professionals can maintain and restore device functionality.
Topic 4	<ul style="list-style-type: none">• Planning Device Ownership and Enrollment: This section of the exam measures the skills of an IT Administrator and covers enrollment planning strategies based on ownership models. It focuses on data separation and appropriate deployment paths based on user and organizational requirements.
Topic 5	<ul style="list-style-type: none">• Manage Content and Data Flow: This section of the exam measures the skills of an IT Administrator and covers app distribution methods including managed, custom, and proprietary apps. It focuses on content purchasing and delivery through Apple Business or School Manager.
Topic 6	<ul style="list-style-type: none">• Software Updates: This section of the exam measures the skills of an MDM Specialist and covers update management strategies using MDM. It includes handling deadlines, updating behavior, and ensuring that updates are properly delivered and installed.
Topic 7	<ul style="list-style-type: none">• Identity Services: This section of the exam measures the skills of an MDM Specialist and covers supported identity services on Apple devices, including Platform SSO and Single Sign-On, helping users manage secure access and authentication.
Topic 8	<ul style="list-style-type: none">• Device Configuration: This section of the exam measures the skills of an IT Administrator and covers declarative configuration properties and how they relate to the device enrollment type. It ensures that configurations align with organizational needs.
Topic 9	<ul style="list-style-type: none">• Apple Configurator: This section of the exam measures the skills of an IT Administrator and covers the usage of Apple Configurator in enrollment, supervision, and deployment of Apple devices. It includes an overview of its features and setup processes.
Topic 10	<ul style="list-style-type: none">• Device Setup: This section of the exam measures the skills of an MDM Specialist and covers strategies and use cases for managing Setup Assistant via MDM. It also covers the configuration of enrollment-related settings and pane options.
Topic 11	<ul style="list-style-type: none">• Prepare Your Environment: This section of the exam measures the skills of an IT Administrator and covers the important factors involved in evaluating and preparing the environment for a successful MDM implementation. It emphasizes strategic planning before rollout.

Apple Deployment and Management Exam Sample Questions (Q100-Q105):

NEW QUESTION # 100

What's required to unenroll a supervised device from an MDM solution?

- A. A wipe command
- B. An administrator's approval
- C. User acceptance
- D. An Apple ID

Answer: B

Explanation:

Unenrolling a supervised device from an MDM solution requires an administrator's approval, typically executed by removing the MDM profile via the MDM server. For supervised devices (via ADE or Apple Configurator), users cannot remove the profile themselves, ensuring organizational control. An Apple ID (option B) isn't required for unenrollment, though it may relate to Activation Lock. User acceptance (option C) isn't needed for supervised devices. A wipe command (option D) may accompany unenrollment but isn't mandatory. The Apple Platform Deployment Guide outlines this process for supervised devices.

Reference: Apple Platform Deployment Guide (Chapter: Managing Enrollment).

NEW QUESTION # 101

What does MDM need to operate, specifically for APNs and SSL?

- A. Restrictions
- B. Enrollment profiles
- **C. Certificates**

Answer: C

Explanation:

For an MDM solution to operate effectively, it relies on certificates, particularly for secure communication with Apple Push Notification service (APNs) and for establishing encrypted connections via SSL/TLS. An APNs certificate is required to authenticate the MDM server with Apple's APNs infrastructure, enabling it to send push notifications to managed devices. Additionally, an SSL certificate secures the communication channel between the MDM server and the devices, ensuring data privacy and integrity. Restrictions (option B) are policies enforced by MDM but are not prerequisites for its operation. Enrollment profiles (option C) are necessary to link devices to MDM, as discussed in Question 1, but they do not specifically address the APNs and SSL requirements. Apple's documentation, such as the MDM Protocol Reference, explicitly states that certificates are essential for APNs and SSL functionality in MDM deployments.

Reference: MDM Protocol Reference (Section: Certificates and Authentication).

NEW QUESTION # 102

What can you include when you use Return to Service?

- A. Home Screen layout
- **B. Wi-Fi profile**
- C. Installed apps list
- D. Device wallpaper

Answer: B

Explanation:

The Return to Service workflow is designed for quickly redeploying supervised devices without IT staff manually setting them up. Apple notes that when initiating Return to Service with the EraseDevice command, administrators can optionally include items such as a Wi-Fi profile. This ensures that the freshly erased device reconnects to the organization's network automatically, allowing enrollment and setup to proceed without user intervention. Other items like wallpapers, installed apps, or Home Screen layouts are restored later through MDM after enrollment. Including a Wi-Fi payload is particularly critical for devices that do not have cellular connectivity.

References: Apple Platform Deployment - "Return to Service workflow in MDM."

NEW QUESTION # 103

Users report that after they move from one conference room to another, they experience slow Wi-Fi. You discover that the devices don't join the closest access point. Why do user devices remain associated with the first access point?

- A. Fast roaming isn't turned on for the wireless controller.
- **B. The signal strength hasn't met the device's trigger threshold.**
- C. The broadcast signal of the first access point has a higher maximum data rate.
- D. The trigger thresholds aren't properly configured in the Wi-Fi profile.

Answer: B

Explanation:

Apple devices follow specific roaming behavior standards. Instead of automatically connecting to the nearest access point, iPhone, iPad, and Mac remain on their current access point until the received signal strength indicator (RSSI) drops below a defined roam trigger threshold. For example, Apple documents that iOS devices typically consider roaming when the RSSI falls around -70 dBm. Until this threshold is reached, the device does not initiate roaming, even if a stronger access point is nearby. This design avoids excessive roaming, which could degrade performance. Therefore, users may stay connected to the initial AP until the signal strength truly weakens.

References: Apple Platform Deployment - "Wi-Fi roaming support in Apple devices."

NEW QUESTION # 104

A device doesn't meet your MDM configured minimum operating system, and it tries to enroll using Automated Device Enrollment. What happens?

- A. The device doesn't enroll.
- **B. The device updates and resumes Setup Assistant automatically.**
- C. The device updates after completing Setup Assistant.
- D. The device enrolls and allows the update to be deferred up to seven days.

Answer: B

Explanation:

ADE enforces OS requirements. The Apple Platform Deployment Guide states, "When a device attempts ADE and doesn't meet the minimum OS version specified in the MDM profile, it will download and install the required update during Setup Assistant, then resume the enrollment process automatically." Options B, C, and D don't align with this process.
