Candidates who pass the exam will have a deep understanding of how to configure Cisco ISE to enforce network access policies, authenticate users and devices, and provide secure access to network resources. With this certification, IT professionals can demonstrate their expertise in network security and enhance their career prospects in the field of cybersecurity.

Cisco Implementing and Configuring Cisco Identity Services Engine Sample Questions (Q70-Q75):

NEW QUESTION # 70

An engineer is configuring 802.1X and is testing out their policy sets. After authentication, some endpoints are given an access-reject message but are still allowed onto the network.

What is causing this issue to occur?

- A. The authorization results for the endpoints include a dACL allowing access.
- B. The authorization results for the endpoints include the Trusted security group tag.
- C. The switch port is configured with authentication open.
- D. The switch port is configured with authentication event server dead action authorize vlan.

Answer: C

NEW QUESTION # 71

An administrator is configuring cisco ISE to authenticate users logging into network devices using

Which action ensures the users are able to log into the network devices?

- A. Enable the session services in the administration persona
- B. Enable the service sessions in the PSN persona.
- C. Enable the device administration service in the PSN persona.
- D. Enable the device administration service in the Administration persona

Answer: C

Explanation:

It is important to know your intended design before you enable the TACACS+ functionality, and you should only enable the Device Admin service on the PSNs that will handle TACACS+ and leave it disabled on any PSNs that are supposed to be dedicated for RADIUS (and vice versa).

You should keep the remainder of the session services disabled on the dedicated TACACS+ PSNs.

NEW QUESTION # 72

A security engineer has a new TrustSec project and must create a few static security group tag classifications as proof of concept.

Which two classifications must the engineer configure?

(Choose two.)

- A. MAC address
- B. switch ID
- C. interface
- D. user ID
- E. VLAN

Answer: A,E

NEW QUESTION # 73

An engineer is designing a new distributed deployment for Cisco ISE in the network and is considering failover options for the admin nodes. There is a need to ensure that an admin node is available for configuration of policies at all times. What is the requirement to enable this feature?

- A. one primary admin node and one monitoring and troubleshooting node
- B. one policy services node and one secondary admin node
- C. one policy services node and one monitoring and troubleshooting node
- **D. one primary admin and one secondary admin node in the deployment**

Answer: D

NEW QUESTION # 74

An administrator is configuring endpoint profiling and needs to enable CoA for devices that change profiles. Which two actions must be taken to accomplish this goal? (Choose two.)

- **A. Ensure that the firewall is not blocking port 1700**
- B. Use an API to detect when profile changes occur and send instructions to ISE to provide a CoA
- **C. Define "reauth" in the default CoA action to be used**
- D. Modify the RADIUS endpoint attribute filters to send CoA actions as the profiles change
- E. Enable the CoA policy and create rules for each type

Answer: A,C

NEW QUESTION # 75

.....

In the learning process, many people are blind and inefficient for without valid 300-715 exam torrent and they often overlook some important knowledge points which may occupy a large proportion in the Cisco 300-715 exam, and such a situation eventually lead them to fail the exam. While we can provide absolutely high quality guarantee for our Implementing and Configuring Cisco Identity Services Engine 300-715 practice materials, for all of our learning materials are finalized after being approved by industry experts.
