Salesforce Certified Administrator Sample Questions (Q99-Q104):

NEW QUESTION # 99

The Cloud kicks sales manager wants to boost productivity by providing insights at the start of each day.

Which three sales-specific standard Lightning components should administrator add to the homepage to meet this requirement?
Choose 3 Answers.

- A. Activities
- B. Key Deals
- C. Performance chart.

- **D. Path**
- E. Assistant

Answer: D

NEW QUESTION # 100

Which two solutions could an administrator find on the AppExchange to enhance their organization?

Choose 2 answers

- **A. Components**
- **B. Consultants**
- C. Communities
- D. Customers

Answer: A,B

Explanation:

Explanation

The AppExchange is an online marketplace where you can find solutions to enhance your Salesforce organization. Some of the solutions you can find on the AppExchange are consultants and components.

Consultants are certified professionals who can help you with your Salesforce projects, such as implementation, customization, integration, training, etc. Components are reusable building blocks that you can use to create apps or pages in Salesforce, such as charts, calendars, maps, buttons, etc. References:

NEW QUESTION # 101

The IT manager at universal Containers is doing an audit of the systems security.

How should the administrator provide a summary of the org's security health?

- A. Download the last six months of user login data.
- **B. Run a Health Check to identify vulnerabilities.**
- C. Change the Organization-Wide Default to private to restrict visibility.
- D. Turn on Event Monitoring to track user events.

Answer: B

Explanation:

Explanation

To provide a summary of org's security health, an administrator should run a Health Check that compares org's settings against baseline settings defined by Salesforce Security Baseline Standard or industry standards such as CIS (Center for Internet Security) Benchmark Standard. Health Check generates an overall health score based on how org's settings match with baseline settings for various security categories such as Password Policies, Network Access, Session Settings etc. Health Check also provides recommendations for improving org's security health score by adjusting settings that do not match with baseline settings. Changing Org-Wide Default to private, turning on Event Monitoring, or downloading user login data will not provide a summary of org's security health. References:

NEW QUESTION # 102

The standard Lead Rating field has picklist values of Hot, Warm, and Cold. A list of new leads was imported without errors even though several records had the value of Unrated in the Rating field.

How were these records added without error?

- A. Field-level security was set to Visible for all profiles.
- **B. The Restricted picklist checkbox was unchecked.**
- C. The Add to All Record Types checkbox was selected.
- D. A global picklist value set was used to populate the picklist.

Answer: B

NEW QUESTION # 103

New Leads needs to be routed to the correct sales person based on the lead address. How should the administrator configure this requirement?

- A. Create formula field.
- B. Assign with an escalation rule.
- C. Configure a validation rule
- **D. Use lead assignment rules.**

Answer: D

NEW QUESTION # 104

.....
