100% Pass 2026 1Y0-204: Trustable Exam Citrix Virtual Apps and Desktops 7 Administration Guide Materials

Exam 1Y0-204 tests your professional talent and expertise. This is the reason that passing this Citrix Virtual Apps certification exam has been a tough challenge for professionals. But it is made easy now to ace it! The recently developed Dumpexams's 1Y0-204 Exam Questions dumps aim at to deliver you the shortest possible route to obtaining 1Y0-204 without any chance of losing the exam.

Citrix 1Y0-204 exam covers a range of topics related to Citrix Virtual Apps and Desktops 7 administration, including installation, configuration, and management of Citrix Virtual Apps and Desktops 7 sites, delivery groups, and virtual desktops and applications. 1Y0-204 Exam also tests the candidate's knowledge of Citrix policies, load balancing, monitoring, and troubleshooting techniques.

Citrix Virtual Apps and Desktops 7 Administration Sample Questions (Q188-Q193):

NEW QUESTION # 188

Scenario: A Citrix Administrator needs to grant permissions to a contractor to manage an inventory application in Citrix Virtual Apps and Desktops Service managed in Citrix Cloud. The administrator needs to minimize the access granted to the contractor to only administer the inventory application.

Which two permissions will the administrator need to grant to the contractor? (Choose two.)

- A. Help Desk Administrator in Citrix Virtual Apps and Desktops Service
- B. Custom access in Citrix Cloud
- C. Cloud Administrator in the Citrix Virtual Apps and Desktops Service

- D. Full Administrator in Citrix Cloud
- E. Delivery Group Administrator in the Citrix Virtual Apps and Desktops Service

Answer: B,E

NEW QUESTION # 189

Which three functionalities will NetScaler Gateway provide to allow access to internal resources on behalf of external users?
(Choose three.)

- A. Aggregate resources
- B. Allow secured access to internal hosted applications (HDX Proxy)
- C. Enumerate resources
- D. Allow secured external connections from Citrix Workspace app (Reverse Web Proxy)
- E. Authenticate Users

Answer: B,D,E

Explanation:

Authenticate Users

NetScaler Gateway performs user authentication (LDAP, RADIUS, etc.) at the perimeter before granting any access.
Allow secured external connections from Citrix Workspace app (Reverse Web Proxy) It acts as a reverse web proxy, terminating and inspecting incoming SSL/TLS connections from Citrix Workspace app.

Allow secured access to internal hosted applications (HDX Proxy)

It proxies HDX traffic over TLS, securely tunneling ICA sessions to internal XenApp/XenDesktop resources.

NEW QUESTION # 190

Which Citrix ADC Access Control List (ACL) command can a Citrix Administrator use to bridge traffic originating from 192.168.10.200?

- A. add ns simpleacl6
- B. add ns acl6
- C. add ns acl
- D. add ns simpleacl

Answer: C

Explanation:

According to the Access Control Lists documentation, the add ns acl command is used to create an extended ACL that can filter packets based on various parameters, such as source IP address, source port, action, and protocol. An extended ACL can define the conditions that a packet must satisfy for the Citrix ADC to process the packet, bridge the packet, or drop the packet. Therefore, to bridge traffic originating from 192.168.10.200, a Citrix Administrator can use the following command:

add ns acl bridge_192.168.10.200 BRIDGE -srcIP 192.168.10.200

This command creates an extended ACL named bridge_192.168.10.200 with the action BRIDGE and the source IP address 192.168.10.200. Any packet that matches these conditions will be bridged to the destination without processing by the Citrix ADC.

NEW QUESTION # 191

What must a Citrix Administrator do to encrypt XML traffic between StoreFront and the Delivery Controllers?

- A. Install a private server certificate on each StoreFront server and then add a new Internet Information Services (IIS) binding for HTTPS.
- B. Install a private server certificate on each StoreFront server. Open the StoreFront console and use the https:// prefix with the base URL.
- C. Install a private server certificate on each Delivery Controller and bind the certificates to port 443.
- D. Install a private certificate on each Delivery Controller and StoreFront server. Restart each server to force XML communication to be encrypted.

Answer: C

Explanation:

To secure XML traffic between StoreFront and Delivery Controllers, a Citrix Administrator must install a private server certificate on each Delivery Controller and bind the certificates to port 443.

NEW QUESTION # 192

Which layer contains the Site database in a Citrix Virtual Apps and Desktops Architecture model?

- A. Resource
- B. Access
- C. User
- D. Control

Answer: D

Explanation:

The Control layer contains the Site database in a Citrix Virtual Apps and Desktops Architecture model. The Site database stores the running site configuration, plus the current session state and connection information.

The Access layer contains the components that users need to connect to their apps and desktops, such as StoreFront and Citrix Gateway. The User layer contains the user profiles, policies, and data. The Resource layer contains the machines that host the apps and desktops, such as VDAs and hypervisors
