## **CrowdStrike Falcon Administrator Sample Questions (Q192-Q197):**

### **NEW QUESTION # 192**

On which page of the Falcon console can one locate the Customer ID (CID)?

- A. Sensor Downloads
- B. Sensor Dashboard
- C. Hosts Management
- D. **API Clients and Keys**

**Answer: D**

Explanation:

The page of the Falcon console where one can locate the Customer ID (CID) is API Clients and Keys. The API Clients and Keys page allows you to create and manage API clients and keys for accessing the Falcon platform programmatically. The Customer ID (CID) is a unique identifier for your organization that is required for authenticating your API requests. You can find your CID at the top of the API Clients and Keys page.

### **NEW QUESTION # 193**

Which of the following best describes the Default Sensor Update policy?

- A. The Default Sensor Update policy does not have the "Uninstall and maintenance protection" feature
- B. The Default Sensor Update policy is disabled by default
- C. The Default Sensor Update policy is only used for testing sensor updates
- D. **The Default Sensor Update policy is a "catch-all" policy**

**Answer: D**

Explanation:

The Default Sensor Update policy is a "catch-all" policy. This means that any host that is not assigned to a specific sensor update policy will inherit the settings from the Default Sensor Update policy. The Default Sensor Update policy is enabled by default and has the "Uninstall and maintenance protection" feature turned on. You can modify the settings of the Default Sensor Update policy, but you cannot delete or disable it.

### **NEW QUESTION # 194**

You are tasked with creating a group for hosts running Windows 10.

What kind of group should you create to make sure all applicable hosts are included in your environment?

- A. Create a static group with the assignment rule criteria for OS Version set to Windows 10
- B. Create a static group with the assignment rule criteria set to OS Type Workstation
- C. Create a dynamic group with the assignment rule criteria set to OS Type Workstation
- D. **Create a dynamic group with the assignment rule criteria for OS Version set to Windows 10**

**Answer: D**

### **NEW QUESTION # 195**

Which of the following is TRUE regarding Falcon Next-Gen AntiVirus (NGAV)?

- A. Falcon NGAV relies on signature-based detections
- B. Falcon NGAV is not a replacement for Windows Defender or other antivirus programs
- C. **The Detection sliders cannot be set to a value less aggressive than the Prevention sliders**
- D. Activating Falcon NGAV will also enable all detection and prevention settings in the entire policy

**Answer: C**

#### Explanation:

The Detection sliders cannot be set to a value less aggressive than the Prevention sliders in Falcon Next-Gen AntiVirus (NGAV). This is because prevention is a subset of detection, and it would not make sense to prevent threats that are not detected. The other options are either incorrect or not true of Falcon NGAV.

#### NEW QUESTION # 196

Which report can assist in determining the appropriate Machine Learning levels to set in a Prevention Policy?

- A. Sensor Report
- B. Machine Learning Debug
- **C. Machine Learning Prevention Monitoring**
- D. Falcon UI Audit Trail

#### Answer: C

#### Explanation:

The Machine Learning Prevention Monitoring report in the Prevention Policy Management option allows you to monitor the impact of machine learning (ML) prevention settings on your environment. You can view the number of ML detections and preventions by severity, policy, and host group. You can also drill down into specific events and hosts to see more details. This report can help you determine the appropriate ML levels to set in a prevention policy based on your risk tolerance and security posture1.

#### NEW QUESTION # 197

.....

Passing an exam requires diligent practice, and using the right study CrowdStrike Certification Exams material is crucial for optimal performance.
