- B. The Service Level Manager
- C. The Configuration Manager
- D. The Change Manager

Answer: A

NEW QUESTION # 15
Sammy is the project manager for her organization. She would like to rate each risk based on its probability and affect on time, cost, and scope. Harry, a project team member, has never done this before and thinks Sammy is wrong to attempt this approach. Harry says that an accumulative risk score should be created, not three separate risk scores. Who is correct in this scenario?

- A. Sammy is correct, because organizations can create risk scores for each objective of the pr oject.
- B. Harry is correct, the risk probability and impact matrix is the only approach to risk assessment.
- C. Sammy is correct, because she is the project manager.
- D. Harry is correct, because the risk probability and impact considers all objectives of the proj ect.

Answer: A

Explanation:
Section: Volume C

NEW QUESTION # 16
Joan is the project manager of the BTT project for her company. She has worked with her project to create risk responses for both positive and negative risk events within the project. As a result of this process Joan needs to update the project document updates.
