Verified CompTIA XK0-006 Answers, 100% XK0-006 Accuracy

The name of these formats are CompTIA XK0-006 PDF dumps file, desktop practice test software, and web-based practice test software. All these three CompTIA Cloud XK0-006 practice test formats are easy to use and perfectly work with all devices, operating systems, and web browsers. The XK0-006 PdfDumps file is a simple collection of Real and Updated CompTIA Linux+ Certification Exam (XK0-006) exam questions in PDF format and it is easy to install and use.

CompTIA Linux+ Certification Exam Sample Questions (Q68-Q73):

NEW QUESTION # 68

A systems administrator wants to review the logs from an Apache 2 error.logfile in real time and save the information to another file for later review. Which of the following commands should the administrator use?

- A. `tail -f /var/log/apache2/error.log > logfile.txt`
- B. `tail -f /var/log/apache2/error.log | logfile.txt`
- C. `tail -f /var/log/apache2/error.log >> logfile.txt`
- **D. `tail -f /var/log/apache2/error.log | tee logfile.txt`**

Answer: D

Explanation:

Using tee allows output to be viewed in real time on the terminal while simultaneously writing it to logfile.txt. This meets both requirements: monitoring live updates and saving them for later review.

NEW QUESTION # 69

A user on a Linux VM is running /work/test.sh Bash script and receives the following error:

bash: /work/test.sh: Permission denied

After further investigation, the user receives the following outputs:

```
# ls -l /work/test.sh
-rwxr--r--. 1 testuser test          512 Jul 12 2023 /work/test.sh

# mount
/dev/mapper/work on /work type xfs (rw, nosuid, nodev, noexec, relatime, seclabel, attr2, noquota)
```

Which of the following commands should a systems administrator run to fix the issue?

- A. `chmod o+x /work/test.sh`
- B. `mount -o remount,suid /work`
- **C. `mount -o remount,exec /work`**
- D. `chmod g+x /work/test.sh`

Answer: C

Explanation:

The script /work/test.sh already has execute permissions (-rwxr--r--), but the filesystem is mounted with the noexec option, which prevents execution of binaries and scripts. Remounting the filesystem with the exec option allows execution of the script.

NEW QUESTION # 70

While hardening a system, an administrator runs a port scan with Nmap, which returned the following output:

```
# nmap 104.21.75.76
Starting Nmap 7.80 ( https://nmap.org ) at 2024-07-09 18:09 UTC
Nmap scan report for 104.21.75.76
Host is up (0.00087s latency).
Not shown: 996 closed ports
PORT STATE SERVICE
23/tcp open telnet
80/tcp open http
443/tcp open https
8080/tcp open http-proxy

Nmap done: 1 IP address (1 host up) scanned in 4.93 seconds
```

Which of the following is the best way to address this security issue?

- A. Configuring a firewall to block traffic on port 23 on the server

- B. Disabling and removing the Telnet service on the server
- C. Changing the systems administrator's password to prevent unauthorized access
- D. Closing port 80 on the network switch to block traffic

Answer: B

Explanation:

Port 23/tcp indicates Telnet, which is insecure because it transmits data in plaintext. The best hardening approach is to disable and remove the Telnet service entirely, eliminating the vulnerability rather than just blocking it at the firewall. Secure alternatives like SSH should be used instead.

NEW QUESTION # 71

An administrator receives the following output while attempting to unmount a filesystem:

```
umount /data1: target is busy.
```

Which of the following commands should the administrator run next to determine why the filesystem is busy?

- A. ps -f/data1
- B. du -sh /data1
- C. top -d /data1
- D. lsof | grep /data1

Answer: D

Explanation:

The lsof command lists open files and the processes using them. Running `lsof | grep /data1` will show which processes are keeping the /data1 filesystem busy, preventing it from being unmounted.

NEW QUESTION # 72

Which of the following best describes JSON?

- A. A file format for exchanging information or data between systems
- B. An open-source platform that facilitates the creation and administration of isolated environments
- C. A software-based technique that allows a computer to simulate one or more machines so they appear to be real
- D. A programming language that developers use to build dynamic websites

Answer: A

Explanation:

JSON (JavaScript Object Notation) is a lightweight data-interchange format that is easy for humans to read and write, and easy for machines to parse and generate. JSON is commonly used to transmit data between a server and a client, as it is language-independent and can be used in many environments.

NEW QUESTION # 73

.....

When you decide to pass the XK0-006 exam and get relate certification, you must want to find a reliable exam tool to prepare for exam. That is the reason why I want to recommend our XK0-006 prep guide to you, because we believe this is what you have been looking for. We guarantee that you can enjoy the premier certificate learning experience under our help with our XK0-006 Prep Guide since we put a high value on the sustainable relationship with our customers.

Verified XK0-006 Answers: <https://www.examcollectionpass.com/CompTIA/XK0-006-practice-exam-dumps.html>

CompTIA Answers XK0-006 Free If you have the certificate, you can enjoy many advantages: you can enter a big enterprise and double your salary and buy things you want, CompTIA Answers XK0-006 Free How to prepare for the exam in a short time with less efforts, The most professional and accurate XK0-006 test braindump, Dear examinee, as one of the candidates of XK0-006 exam, the importance of this test to you is self-evident, it is useful not only to your aim job, but also to your future plans in related careers.
