SAP Certified Associate - SAP Business Data Cloud Sample Questions (Q58-Q63):

NEW QUESTION # 58

What features does the SAP Analytics Cloud calendar provide?

Please choose the correct answer.

Response:

- A. Schedule a file
- B. Create a project plan
- C. Assign Reviewer
- **D. Collaborate**

Answer: D

NEW QUESTION # 59

Which steps are executed when an SAP Business Data Cloud Intelligent Application is installed? Note: There are 2 correct answers to this question.

- A. Execution of a machine-learning algorithm
- **B. Replication of data from the business applications to Foundation Services**
- **C. Connection of SAP Datasphere with SAP Analytics Cloud**
- D. Creation of a dashboard for visualization

Answer: B,C

Explanation:

When an SAP Business Data Cloud (BDC) Intelligent Application is installed, two key foundational steps are executed to ensure its operational readiness. Firstly, there is the connection of SAP Datasphere with SAP Analytics Cloud (SAC). This establishes the vital link that allows the intelligent application's analytical models, which reside and are managed within SAP Datasphere, to be consumed and visualized in SAC. SAC serves as the front-end for analytical consumption, enabling users to interact with the insights generated by the intelligent application. Secondly, the installation process involves the replication of data from the business applications to Foundation Services. Foundation Services act as the initial landing zone for raw business data within the BDC architecture. This data replication ensures that the intelligent application has access to the necessary operational data from source systems to perform its functions, whether it involves data processing, enrichment, or feeding machine learning models. These steps are crucial for the intelligent application to ingest, process, and ultimately present valuable business insights.

NEW QUESTION # 60

- C. Styling panel

Answer: B

NEW QUESTION # 62

In an SAP Analytics Cloud planning data model, which dimensions are included by default? Note: There are 2 correct answers to this question.

- **A. Date**
- B. Organization
- C. Entity
- **D. Version**

Answer: A,D

Explanation:

When creating a planning data model in SAP Analytics Cloud (SAC), certain dimensions are included by default to facilitate common planning scenarios. The two key dimensions automatically present are Version and Date. The Version dimension is crucial for distinguishing between different planning scenarios, such as "Actual," "Budget," "Forecast," or "Plan 2025," allowing users to compare and manage various iterations of their planning data. The Date dimension, on the other hand, is essential for time-based planning and analysis, enabling data entry, aggregation, and reporting across different time granularities like years, quarters, months, or days. These default dimensions provide a robust framework for financial and operational planning, serving as foundational elements around which planning activities are structured, and ensuring consistency and comparability across different planning versions and time periods.
