DP-100 Reliable Dumps Ppt - PDF DP-100 VCE

There are three versions for DP-100 exam braindumps, all three have free demo for you to have a try. DP-100 PDF materials are printable, and instant download. DP-100 Soft taes engine offer you the realest test environment for you, it supports MS operating system and has two modes for practice, it can also change the order of the DP-100 Training Materials, so that you can perform well in the real exam. DP-100 Online test engine have the test history and performance review.

Conclusion

Data science is a lucrative career option and you can explore it without any hassle if you've managed to taste success in the Microsoft DP-100 exam, which is known to create a skilled workforce of Azure data scientists. However, a great outcome in such a test will only come if the aspirant is referring to the updated and recent study resources like the official courses provided by the exam vendor itself.

Obtaining the DP-100 certification demonstrates the candidate's proficiency in designing and implementing data science solutions on Azure. Designing and Implementing a Data Science Solution on Azure certification provides a competitive edge in the job market and opens up various career opportunities for the candidate. The DP-100 Certification is also a prerequisite for other advanced Azure-based data science certifications, such as the DP-200 (Implementing an Azure Data Solution) and DP-201 (Designing an Azure Data Solution) certifications.

Microsoft Designing and Implementing a Data Science Solution on Azure Sample Questions (Q182-Q187):

NEW QUESTION # 182
A company manufactures automobile parts. The company installs IoT sensors on manufacturing machinery.

You must design a solution that analyzes data from the sensors.
You need to recommend a solution that meets the following requirements:
- Data must be analyzed in real-time.
- Data queries must be deployed using continuous integration.
- Data must be visualized by using charts and graphs.
- Data must be available for ETL operations in the future.
- The solution must support high-volume data ingestion.
Which three actions should you recommend? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

- A. Develop an application that sends the IoT data to an Azure Event Hub.
- B. Develop an Azure Stream Analytics application that queries the data and outputs to Power BI. Use Azure Data Factory to deploy the Azure Stream Analytics application.
- C. Configure an Azure Event Hub to capture data to Azure Data Lake Storage.
- D. Develop an application that sends the IoT data to an Azure Data Lake Storage container.
- E. Develop an Azure Stream Analytics application that queries the data and outputs to Power BI. Use Azure Pipelines to deploy the Azure Stream Analytics application.
- F. Use Azure Analysis Services to query the data. Output query results to Power BI.

Answer: A,B,C

NEW QUESTION # 183
You plan to implement an Azure Machine Learning solution. You have the following requirements:
* Run a Jupyter notebook to interactively tram a machine learning model.
* Deploy assets and workflows for machine learning proof of concept by using scripting rather than custom programming.
You need to select a development technique for each requirement
Which development technique should you use? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:
Explanation:

NEW QUESTION # 184
You publish a batch inferencing pipeline that will be used by a business application.
The application developers need to know which information should be submitted to and returned by the REST interface for the published pipeline.
You need to identify the information required in the REST request and returned as a response from the published pipeline.
Which values should you use in the REST request and to expect in the response? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 185
You are implementing hyperparameter tuning for a model training from a notebook. The notebook is in an Azure Machine Learning workspace. You add code that imports all relevant Python libraries.
You must configure Bayesian sampling over the search space for the num_hidden_layers and batch_size hyperparameters.
You need to complete the following Python code to configure Bayesian sampling.
Which code segments should you use? To answer, select the appropriate options in the answer area NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 186
You manage an Azure Machine Learning workspace. You train a model named model1.
You must identify the features to modify for a differing model prediction result.
You need to configure the Responsible Al (RAI) dashboard for model1.
Which three actions should you perform in sequence? To answer move the appropriate actions from the list of actions to the answer area and arrange them in the correct order.

Answer:

Explanation:
1 - Load and configure the Responsible AI Insights...
2 - Add the counterfactuals component to the...
3 - Use the Gather Responsible AI Insights dashboard...

NEW QUESTION # 187
.....

Another version of Designing and Implementing a Data Science Solution on Azure (DP-100) practice exams is also available at Lead2PassExam and that is web-based. It has all specifications we have discussed above in the section of the Microsoft DP-100 desktop practice test software. But the only difference is that this web-based DP-100 practice exam software works online and needs no software installation. Furthermore, this DP-100 Practice Exam is supported by both Windows and iOS, Android, Mac, and Linux. Since it is the web-based DP-100 practice exam, you can take it from Opera, Chrome, Safari, Firefox, or any other popular browser.
