

New MB-335 Test Sample - Quiz Microsoft Realistic Top Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Questions

What's more, part of that TestKingFree MB-335 dumps now are free: <https://drive.google.com/open?id=1iJycC6zLcag70UFkrBbmnoVoXqLbEam>

You must want to know your scores after finishing exercising our MB-335 study guide, which help you judge your revision. Now, our windows software and online test engine of the MB-335 real exam can meet your requirements. You can choose from two modules: virtual exam and practice exam. Then you are required to answer every question of the MB-335 Exam Materials. And they will show the scores at the time when you finish the exam.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert certification is highly regarded in the industry, as it demonstrates a high level of knowledge and expertise in the field of technology and supply chain management. Employers seek out certified professionals because they know that these individuals have the skills and knowledge needed to manage their supply chains effectively. By passing the MB-335 exam and obtaining this certification, professionals can open doors to new opportunities in the field, as they become qualified experts in the industry.

Microsoft MB-335 certification exam covers a range of topics, including supply chain management concepts, procurement and sourcing, inventory management, warehouse management, transportation management, and demand planning. MB-335 exam is designed to test the candidate's ability to configure and customize Dynamics 365 for Finance and Operations to meet business requirements, as well as their ability to troubleshoot and resolve issues related to supply chain management processes. By passing this certification exam, professionals can demonstrate their expertise in supply chain management and enhance their career opportunities in this field.

The MB-335 Certification Exam is a comprehensive test that covers various aspects of supply chain management using Dynamics 365. MB-335 exam is divided into several sections, with each section testing the candidates' proficiency in a particular area. MB-335 exam includes multiple-choice questions and simulation-based scenarios that require candidates to apply their knowledge and skills to solve real-world supply chain management issues.

Fast-Download New MB-335 Test Sample & Trustable Top MB-335 Questions & First-Grade Sample MB-335 Exam

The Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) questions are available in three easy-to-use forms. The first one is a Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) Dumps PDF form, and it is printable and portable. You can print Microsoft Dynamics 365 Supply Chain Management Functional

Consultant Expert (MB-335) questions PDF or can access them by saving them on your smartphones, tablets, and laptops. The Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) dumps PDF format can be used anywhere, anytime and is essential for students who like to learn from their smart devices for Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert (MB-335) exam.

Microsoft Dynamics 365 Supply Chain Management Functional Consultant Expert Sample Questions (Q151-Q156):

NEW QUESTION # 151

You need to configure scheduling for each production area.

Which scheduling options should you use? To answer, select the appropriate option in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

☐

NEW QUESTION # 152

A manufacturing company uses Dynamics 365 Supply Chain Management.

The company identifies a bill of materials (BOM) item that needs to be recalled for a product. The engineering department needs to link customer support incidents and knowledgebase articles related to the product change.

Other items affected by this change must reference the same support incidents and knowledgebase articles.

You need to recommend features to facilitate this business process.

Which features should you recommend? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

☐

Explanation:

A white background with black text Description automatically generated

☐

NEW QUESTION # 153

An electronics manufacturing company is transitioning from infinite capacity planning to finite capacity planning to improve scheduling efficiency and manage resource constraints effectively.

The company observes that its manufacturing process typically requires a minimum lead time of five days.

The company requires finite capacity scheduling to create realistic production schedules that account for resource limitations over a defined minimum lead time of five days.

You need to implement finite capacity planning with a time fence that aligns with the five-day manufacturing lead time.

Solution: Disable capacity reservations when scheduling production orders.

Does the solution meet the goal?

- A. Yes
- B. No

Answer: B

NEW QUESTION # 154

A bicycle manufacturer uses Dynamics 365 Supply Chain Management.

The manufacturer experiences a supply chain issue with a metal used to fabricate the wheel. Due to the issue, the manufacturer must change the bicycle wheel assembly temporarily. Production workers require an interactive visual guide to complete production.

You need to configure the features.

Which features should you configure? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

☐

Answer:

Explanation:

□ Explanation:

A close up of a text AI-generated content may be incorrect.

NEW QUESTION # 155

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution. Determine whether the solution meets the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

A manufacturing company has a new speaker that is available with standard and premium carbon fiber options.

For the premium option, speakers are made to order. Customers can choose from seven product attributes at different prices.

You need to create and configure the product and pricing for the new speaker.

Solution: Create a constraint-based product with configurations. Use a price model to calculate the different configurable option costs.

Does the solution meet the goal?

- A. Yes
- **B. No**

Answer: B

Explanation:

The solution meets the goal. Here is the explanation:

* To create and configure the product and pricing for the new speaker, you should use the following steps1:

* Create a product master for the speaker and release it to the relevant legal entities. On the Product dimension groups page, select Constraint-based configuration as the configuration technology, and select the configuration dimension. On the Released product details page, select Configurable on the Engineer tab.

* Create a constraint-based product configuration model for the speaker and add it as a version to the product master. On the Constraint-based product configuration model details page, add attributes, constraints, subcomponents, BOM lines, and route operations to define the features and structure of the speaker. For example, you can add an attribute for carbon fiber options and specify Standard and Premium as the values. You can also add constraints to limit the combinations of attribute values that are allowed.

* Create a price model for the speaker and link it to the product configuration model. On the Price models page, add price components and specify how they are calculated based on attributes, subcomponents, BOM lines, or route operations. For example, you can add a price component for carbon fiber options and specify different prices for Standard and Premium values. You can also add price components for other attributes that affect the price of the speaker.

* Configure products on sales orders, sales quotations, purchase orders, or production orders by using the Product configuration models page. You can select values for attributes and see how they affect the price of the speaker. You can also view the price details and see how each price component contributes to the total price.

1: Product configuration overview : Create constraint-based configuration : Price models

NEW QUESTION # 156
