## **Fantastic Amazon - DVA-C02 - Practice AWS Certified Developer - Associate Mock**

Amazon trained experts have made sure to help the potential applicants of Amazon DVA-C02 certification to pass their Amazon DVA-C02 exam on the first try. Our PDF format carries real AWS Certified Developer - Associate exam dumps. You can use this format of Amazon DVA-C02 Actual Questions on your smart devices.

## **Amazon AWS Certified Developer - Associate Sample Questions (Q340-Q345):**

#### NEW QUESTION # 340

A developer has an application that makes batch requests directly to Amazon DynamoDB by using the BatchGetItem low-level API operation. The responses frequently return values in the UnprocessedKeys element. Which actions should the developer take to increase the resiliency of the application when the batch response includes values in UnprocessedKeys? (Choose two.)

- A. Increase the provisioned read capacity of the DynamoDB tables that the operation accesses.
- B. Retry the batch operation with exponential backoff and randomized delay.
- C. Update the application to use an AWS software development kit (AWS SDK) to make the requests.
- D. Retry the batch operation immediately.
- E. Increase the provisioned write capacity of the DynamoDB tables that the operation accesses.

**Answer: A,B**

#### NEW QUESTION # 341

A developer is building the authentication mechanism for a new mobile app. Users need to be able to sign up, sign in, and access secured backend AWS resources. Which solution will meet these requirements?

- A. Use AWS Identity and Access Management Access Analyzer to generate IAM policies. Create an IAM role. Attach the policies to the role. Integrate the IAM role with an identity provider that the mobile app uses.
- B. Create an Amazon Cognito identity pool. Configure permissions by choosing a default IAM role for authenticated users or guest users in the identity pool. Associate the identity pool with an identity provider. Integrate the identity pool with the mobile app.
- C. Create an IAM policy that grants access to the backend resources. Create an IAM role. Attach the policy to the role. Create an Amazon API Gateway endpoint. Attach the role to the endpoint. Integrate the endpoint with the mobile app.
- D. Create an Amazon Cognito user pool. Configure the security requirements by choosing a password policy, multi-factor authentication (MFA) requirements, and user account recovery options. Create an app client. Integrate the app client with the mobile app.

**Answer: B**

Explanation:

Amazon Cognito is designed specifically to handle user authentication and authorization for web and mobile applications. An identity pool allows the app to authenticate users via different identity providers (such as social logins, enterprise logins, or custom authentication). Once authenticated, Cognito assigns roles and permissions through IAM roles, granting access to secured AWS resources. This is the most efficient and scalable solution for managing user authentication and access to backend resources in a mobile app.

#### NEW QUESTION # 342

A company has an AWS Step Functions state machine named myStateMachine. The company configured a service role for Step Functions.

The developer must ensure that only the myStateMachine state machine can assume the service role.

Which statement should the developer add to the trust policy to meet this requirement?

- A.

```
"Condition": {
  "ArnLike": {
    "aws:SourceArn": "arn:aws:states:ap-south-1:111111111111:stateMachine:myStateMachine"
  }
}
```

```

"Condition": {
  "StringEquals": {
    "aws:SourceAccount": "111111111111"
  }
}

```

- B.
- C.

```

"Condition": {
  "StringNotEquals": {
    "aws:SourceArn": "arn:aws:states:ap-south-1:111111111111:stateMachine:myStateMachine"
  }
}

```

```

"Condition": {
  "ArnLike": {
    "aws:SourceArn": "arn:aws:states:ap-south-1:*:stateMachine:myStateMachine"
  }
}

```

- D. }

**Answer: A**

Explanation:

The ArnLike condition with aws:SourceArn specifically matches the ARN of the myStateMachine state machine. It restricts access to only the specific state machine with the ARN arn:aws:states:ap-south-1:111111111111:stateMachine:myStateMachine.

### NEW QUESTION # 343

A developer is troubleshooting an application in an integration environment. In the application, an Amazon Simple Queue Service (Amazon SQS) queue consumes messages and then an AWS Lambda function processes the messages. The Lambda function transforms the messages and makes an API call to a third-party service.

There has been an increase in application usage. The third-party API frequently returns an HTTP 429 Too Many Requests error message. The error message prevents a significant number of messages from being processed successfully.

How can the developer resolve this issue?

- A. Configure provisioned concurrency for the Lambda function based on the third-party API's documented rate limits.
- B. Configure maximum concurrency on the SQS event source based on the third-party service's documented rate limits.
- C. Increase the retry attempts and maximum event age in the Lambda function's asynchronous configuration.
- D. Increase the SQS event source's batch size setting.

**Answer: C**

Explanation:

Provisioned concurrency will not solve the problem as the number of instances can increase till it reaches the max number of unreserved limit (this is not reserved concurrency).

### NEW QUESTION # 344

A developer has code that is stored in an Amazon S3 bucket. The code must be deployed as an AWS Lambda function across multiple accounts in the same AWS Region as the S3 bucket an AWS CloudFormation template that runs for each account will deploy the Lambda function.

What is the MOST secure way to allow CloudFormation to access the Lambda Code in the S3 bucket?

- A. Grant the CloudFormation service role the S3 ListBucket and GetObject permissions. Add a bucket policy to Amazon S3 with the principal of "AWS" (account numbers)
- B. Use a service-based link to grant the Lambda function the S3 ListBucket and GetObject permissions by explicitly adding the S3 bucket's account number in the resource.
- C. Use a service-based link to grant the Lambda function the S3 GetObject permission Add a resource of "\*" to allow access to the S3 bucket.
- D. Grant the CloudFormation service row the S3 GetObfct permission. Add a Bucket policy to Amazon S3 with the principal of ""

**Answer: D**

## NEW QUESTION # 345

.....

They work together and put all their expertise to ensure the top standard of Channel Partner Program AWS Certified Developer - Associate DVA-C02 valid dumps. Now the AWS Certified Developer - Associate DVA-C02 exam dumps have become the first choice of Amazon DVA-C02 Exam candidates. With the top-notch and updated Amazon DVA-C02 test questions you can pass your AWS Certified Developer - Associate DVA-C02 exam successfully

**DVA-C02 Valid Exam Topics:** <https://www.passleadervce.com/AWS-Certified-Associate/reliable-DVA-C02-exam-learning-guide.html>

You will be able to deal with the actual exam pressure better when you have already experienced it in our Amazon DVA-C02 practice exams, In contrast, being venerated for high quality and accuracy rate, our DVA-C02 training quiz received high reputation for their efficiency and accuracy rate originating from your interests, and the whole review process may cushioner than you have imagined before, Our AWS Certified Developer - Associate (DVA-C02) practice exam simulator mirrors the DVA-C02 exam experience, so you know what to anticipate on DVA-C02 certification exam day.

Tools for Editing Photos, otherwise, I skip DVA-C02 Lens Correction unless chromatic aberration is present, You will be able to deal with the actual exam pressure better when you have already experienced it in our Amazon DVA-C02 Practice Exams.

## Professional Practice DVA-C02 Mock & Leading Offer in Qualification Exams & Trustable DVA-C02 Valid Exam Topics

In contrast, being venerated for high quality and accuracy rate, our DVA-C02 training quiz received high reputation for their efficiency and accuracy rate originating from Practice DVA-C02 Mock your interests, and the whole review process may cushioner than you have imagined before.

Our AWS Certified Developer - Associate (DVA-C02) practice exam simulator mirrors the DVA-C02 exam experience, so you know what to anticipate on DVA-C02 certification exam day, Maybe you always thought study was too boring for you.

Become a DVA-C02 and become a project hero with our DVA-C02 dumps.
