NEW QUESTION # 22

Adaptive Security Policies allow the deployment of new cloud based resources without

- A. Paying for new resources
- B. Changing the cloud environment
- C. Installing New Applications
- **D. Installing New Policies**

Answer: D

Explanation:

Adaptive Security Policy

Creating a Security Policy for public cloud environments requires an adaptive framework that responds to the dynamic changes of the Workload. An adaptive Security Policy uses the CloudGuard Controller to establish a unified policy that granularly defines cloud-based resources. This policy format broadens the scope of network security by protecting resources created from one or more CSPs.

Check Point
SOFTWARE TECHNOLOGIES

An adaptive Security Policy assists Security and Development teams with streamlining their operations. Administrators may import cloud objects at any time and without the need to schedule a formal system change request to implement a new policy installation to update the rulebase enforced on the Security Gateway. As a result, application owners gain control of their application deployments since they can add and remove resources without impacting security.
