

JN0-481 PDF Download, Guaranteed JN0-481 Passing

2025 Latest ActualtestPDF JN0-481 PDF Dumps and JN0-481 Exam Engine Free Share: <https://drive.google.com/open?id=1NSRazEeAEmhw-Z1bluY1oorUWnAwL6YL>

Before the clients purchase our JN0-481 study materials, they can have a free trial freely. The clients can log in our company's website and visit the pages of our products. The pages of our products lists many important information about our JN0-481 study materials and they include the price, version and updated time of our products, the exam name and code, the total amount of the questions and answers, the merits of our JN0-481 Study Materials and the discounts. You can have a comprehensive understanding of our JN0-481 study materials after you see this information. Then you can look at the free demos and try to answer them to see the value of our JN0-481 study materials and finally decide to buy them or not.

The validation of expertise, more career opportunities, salary enhancement, instant promotion, and membership of Juniper certified professional community. In this way, the Data Center, Specialist (JNCIS-DC) (JN0-481) can not only validate their skills and knowledge level but also put their careers on the right track. By doing this you can achieve your career objectives.

Practical JN0-481 Question Dumps is Very Convenient for You - ActualtestPDF

ActualtestPDF provides a web-based Juniper Practice Test that includes all of the desktop software's functionality. The only difference is that this Data Center, Specialist (JNCIS-DC) online practice test is compatible with Linux, Mac, Android, IOS, and Windows. To take this JN0-481 mock test, you do not need to install any Juniper JN0-481 Exam Simulator software or plugins. All browsers, including Internet Explorer, Firefox, Safari, Google Chrome, Opera, and Microsoft Edge, are supported by the web-based JN0-481 practice test. With this format, you can simulate the Juniper JN0-481 real-world exam environment.

Juniper Data Center, Specialist (JNCIS-DC) Sample Questions (Q19-Q24):

NEW QUESTION # 19

In the Juniper Apstra UI, which two resource types would be created in the Resources menu? (Choose two.)

- A. DHCP pools
- B. bridge domain identifier (BDI)
- C. ASN pools
- D. IP pools

Answer: C,D

Explanation:

The Resources menu in the Juniper Apstra UI allows you to create and manage various types of resources that are assigned to different elements of the network.

Resources include the following types:

- IPv4 (including Host IPv4)
- IPv6 (including Host IPv6)
- ASN (autonomous system number)
- VNI (virtual network identifier)
- VLAN (virtual local area network)

Integer (used for pool type VLAN in local pools in Freeform blueprints) Therefore, the correct answer is C and D. ASN pools and IP pools are two types of resources that can be created in the Resources menu. Bridge domain identifier (BDI) and DHCP pools are not applicable in this scenario, because they are not part of the resources types supported by Juniper Apstra.

NEW QUESTION # 20

Which two statements are correct about probes? (Choose two.)

- A. Default probes can be cloned, modified, and saved.
- B. Default probes are enabled, based on the intent for a blueprint.
- C. All default probes are enabled for all blueprints.
- D. Only the variable parameters for default probes can be edited and saved.

Answer: A,B

Explanation:

Probes are the basic unit of abstraction in Intent-Based Analytics (IBA). They are used to collect, process, and analyze data from the network and raise anomalies based on specified conditions.

Probes are composed of processors and stages that form a directed acyclic graph (DAG) of data flow.

NEW QUESTION # 21

You are working with a three-stage IP fabric using EBGp for peering. In this scenario, which two actions are required to implement ECMP? (Choose two.)

- A. Use a load balancing policy applied to the forwarding table as an export policy.
- B. Use a load balancing policy applied to BGP as an export policy.
- C. Use the multipath multiple-as BGP parameter.
- D. Use a load balancing policy applied to BGP as an import policy.

Answer: B,C

Explanation:

To implement ECMP in IP fabric using EBGp, you need to enable BGP to install multiple equal- cost paths in the routing table and to advertise them to the peers.

NEW QUESTION # 22

In Juniper Apstra, which three modes are available for devices? (Choose three.)

- A. Drain
- B. Active
- C. Ready
- D. Deploy
- E. Stopped

Answer: A,C,D

Explanation:

Juniper Apstra supports three deploy modes for devices: Deploy, Drain, and Ready. These modes determine the configuration and state of the devices in the data center fabric.

Deploy: This mode applies the full Apstra-rendered configuration to the device, according to the Apstra Reference Design. The device state becomes IS-ACTIVE and the device is ready to carry traffic in the fabric.

Drain: This mode adds a "drain" configuration to the device, which prevents any new traffic from entering the device. The device state becomes IS-READY and the device is prepared for maintenance or decommissioning.

Ready: This mode removes the Apstra-rendered configuration from the device, leaving only the basic configuration such as device hostname, interface descriptions, and port speed/breakout.

The device state becomes IS-READY and the device is not part of the fabric.

NEW QUESTION # 23

You are receiving cable, interface, and BGP anomalies from several devices within the data center fabric. In Juniper Apstra, how would you troubleshoot these types of errors?

- A. In the UI, go to Time Voyager and revert to the last working version.
- B. In the UI, go to Devices and confirm that agent connectivity is fine.
- **C. In the UI, verify device connectivity by consulting the cable map.**
- D. In the UI, access the console to the devices and review the interface states.

Answer: C

Explanation:

The cable map is a graphical representation of the physical connections between the devices in the data center fabric. It shows the status of the cables, interfaces, and BGP sessions for each device. You can use the cable map to identify and troubleshoot any cable, interface, or BGP anomalies that may occur in the fabric. You can also filter the cable map by device name, device type, device role, device state, cable state, interface state, or BGP state.

NEW QUESTION # 24

.....

If you are now determined to go to research, there is still a little hesitation in product selection. JN0-481 exam prep offers you a free trial version! You can choose one or more versions that you are most interested in, and then use your own judgment. JN0-481 Exam Materials really hope that every user can pick the right JN0-481 study guide for them. If you really lack experience, you do not know which one to choose. You can consult our professional staff.
