Our ITExamSimulator promises that you can pass test at your first time to participate in the ANVE Dumps Torrent and enhance yourself by practicing exam questions.

Axis Network Video Exam Sample Questions (Q323-Q328):

NEW QUESTION # 323

The capability to view and record up to four different areas of the whole image of an AXIS P1346 is called

- A. Multi-view streaming.
- B. Multi-link streaming.
- C. Multicast streaming.
- D. Broadcast streaming.

Answer: A

Explanation:

The capability to view and record up to four different areas of the whole image of an AXIS P1346 camera is called Multi-view streaming. This feature allows multiple cropped views to be created from a single high-resolution video stream, enabling more efficient use of bandwidth and storage while focusing on specific areas of interest within the full image. For more information, refer to the Axis Communications product documentation and technical notes on Multi-view streaming capabilities.

NEW QUESTION # 324

A camera lens with a low f-stop value of 1.2 will outperform a lens with a higher f-stop value due to which one of the parameters below?

- A. Better depth of field
- B. Less image artifacts
- C. Improved sharpness
- D. Better low light capability

Answer: D

NEW QUESTION # 325

DRAG DROP

Match each device with the correct description. Drag each gray box from the left column to the matching blue box in the right column.

□

Answer:

Explanation:

□

NEW QUESTION # 326

What is required for a PoE+ device?

- A. 15.4 W
- B. 7 W
- C. 60 W
- D. 30 W

Answer: D

Explanation:

"PoE+ (IEEE 802.3at) provides up to 30 W of power per port, which is required for PoE+ devices such as PTZ cameras and certain outdoor models."

- Axis PoE Guide

"A standard PoE+ device requires 30 W at the source."

- Axis Communications Academy, Network Video Fundamentals, 2022

NEW QUESTION # 327

Which applications are typically used with PTZ cameras? (Select three)

- A. Active gatekeeper
- B. Guard tour
- C. People counting
- D. Autotracking
- E. Queue monitoring
- F. Occupancy estimation

Answer: A,B,D

Explanation:

PTZ (Pan-Tilt-Zoom) cameras are typically used for applications such as autotracking, active gatekeeper, and guard tour.

Autotracking allows the camera to follow moving objects within its field of view automatically.

Active gatekeeper enables the camera to move to a preset position when motion is detected in a specific area.

Guard tour is a function that allows the camera to patrol between preset positions at scheduled intervals.

These features enhance surveillance capabilities and are commonly implemented in PTZ cameras. Axis Communications' documentation on PTZ camera functionalities details these applications.

NEW QUESTION # 328

.....

Challenge is omnipresent like everywhere. By eliciting all necessary and important points into our ANVE practice materials, their quality and accuracy have been improved increasingly, so their quality is trustworthy and unquestionable. There is a bunch of considerate help we are willing to offer. Besides, according to various predispositions of exam candidates, we made three versions for your reference. Untenable materials may waste your time and energy during preparation process.
