You are not required to pay any amount or getting registered with us for downloading free dumps.

Scrum SAFe Practitioner Exam (6.0) Sample Questions (Q154-Q159):

NEW QUESTION # 154
What is the next step in the SAFe Implementation Roadmap after organizing around value?

- A. Enhance the Portfolio
- B. Create the implementation plan
- C. Train teams and launch ARTs
- D. Prepare for ART launch

Answer: D

Explanation:
= The SAFe Implementation Roadmap is a series of 12 critical moves that guide enterprises in implementing SAFe successfully. The roadmap is based on the experience and best practices of hundreds of SAFe transformations. The roadmap is not a one-size-fits-all approach, but rather a suggested sequence of steps that can be adapted to the specific context and needs of each organization. The sixth step in the roadmap is Organize Around Value, which involves identifying the value streams and Agile Release Trains (ARTs) that deliver value to the customers. The next step after that is Prepare for ART Launch, which involves planning and preparing for the first Program Increment (PI) planning event, where the ART members align on a common vision, mission, and backlog, and commit to a set of PI objectives. This step is crucial for establishing the cadence, synchronization, and collaboration of the ART, and setting the stage for delivering value in an Agile way. References: = Implementation Roadmap - Scaled Agile Framework, Prepare for ART Launch - Scaled Agile Framework, Exam Study Guide: SP (6.0) - SAFe Practitioner

NEW QUESTION # 155
How does SAFe describe Customer Centricity?

- A. As a way of working to include the Customer in daily work processes and planning
- B. As a strategy to meet the needs of an ever-changing Customer market
- C. As a mindset focused on Customer behaviors that produce the best innovations
- D. As a set of practices employed to make products focused on the Customer

Answer: C

Explanation:
Customer Centricity is a mindset that helps organizations make decisions that are based on a deep understanding of its effect on customers and end-users. It motivates teams to focus on the customer, understand their needs, think and feel like them, build whole product solutions, and know their lifetime value.
Customer Centricity is related to Design Thinking, which provides the tools and practices to support creating desirable products that are profitable and sustainable over their lifecycle. References: Customer Centricity - Scaled Agile Framework, Design Thinking - Scaled Agile Framework, What is Customer Centricity in SAFe 5.0? - Praecipio

NEW QUESTION # 156
What is the basic building block when organizing around value?

- A. Individuals
- B. Hierarchies
- C. Agile Release Trains
- D. Agile Teams

Answer: D

Explanation:
Agile Teams are the basic building block when organizing around value in SAFe. They are cross-functional, self-organizing, and empowered to deliver value in short iterations. They are aligned to a common mission and vision through the Agile Release Train (ART), which is a long-lived team of Agile Teams that delivers value streams. Agile Teams apply Scrum, Kanban, and XP practices to collaborate and deliver solutions that meet customer needs and provide business value. References: Agile Teams, Agile Release Trains, Exam Study Guide: SP (6.0) - SAFe Practitioner

NEW QUESTION # 157
What is ART sync event at program level?

- A. Sync of all people on the ART
- B. Combined PO Sync and Scrum of Scrums
- C. Sync between the ScrumMasters and the Business Owners
- D. There is no such event in SAFe

Answer: B

NEW QUESTION # 158
Which of the following types of work is found within the Agile Team Backlog?

- A. Features
- B. Epics
- C. Capabilities
- D. User Stories

Answer: D

Explanation:
User Stories are the types of work that are found within the Agile Team Backlog. User Stories are short descriptions of a small piece of functionality that provides value to a user or customer. They are written from the perspective of the user or customer and follow the format: "As a <role>, I want <goal>, so that
<benefit>". User Stories are the primary way of expressing the requirements and features in the Agile Team Backlog. They are estimated, prioritized, and implemented by the Agile Team in Iterations. User Stories are derived from Features in the Program Backlog, as well as from the team's local context and other stakeholders. References: Team Backlog, User Stories, Story

NEW QUESTION # 159
......
