New Analytics-Con-201 Exam Practice | Analytics-Con-201 Exam Dumps Free

So many candidates have encountered difficulties in preparing to pass the Analytics-Con-201 exam. But our study materials will help candidates to pass the exam easily. Our Analytics-Con-201 guide questions can provide statistics report function to help the learners to find weak links and deal with them. The Analytics-Con-201 Test Torrent boost the function of timing and simulating the exam. They set the timer to simulate the exam and help the learners adjust the speed and keep alert.

Salesforce Certified CRM Analytics and Einstein Discovery Consultant Sample Questions (Q62-Q67):

NEW QUESTION # 62

Cloud Kicks has informed CRM Analytics developers that they have two scenarios with restricted row-level security. The parameters being:

1. Non-CXOs and VPs working in EMEA can have access to EMEA records only.
2. CXOs and VPs should have access to all data irrespective of the region (APAC, EMEA, etc.).

Which sharing method works for this scenario?

- A. Create two separate datasets; one for EMEA, and one for CXOs and VPs.
- **B. Use a field on the user record like Department/Region, and apply row-level security based on that field.**
- C. Create two sets of dashboards; one for EMEA, and one for CXOs and VPs while filtering the dashboard on the region.

Answer: B

Explanation:

For Cloud Kicks' requirements regarding access to data based on roles and geographic regions, the most efficient and scalable approach is to implement row-level security using fields on the user record, like Department or Region. Here's the rationale for choosing this approach:

* **Scalability and Maintenance:** By applying security rules based on user record fields, Cloud Kicks can manage access dynamically without needing to maintain multiple dashboards or datasets. This reduces administrative overhead and simplifies updates as roles or regional structures change.

* **Flexibility:** Using a field on the user record to control access allows for easy expansion or modification of security policies as new regions or roles are added.

* **Simplicity:** This method ensures a clear and straightforward security model that can be easily audited and understood by administrators and compliance teams.

NEW QUESTION # 63

A CRM Analytics consultant has prepared a CSV file to be uploaded to CRM Analytics. By mistake, one of the column headers is modified as random non-alphanumeric characters "&*&*&*(%)", which went unnoticed prior to uploading the file.

What is the expected behavior of the uploaded CSV column?

- **A. The column header is prefixed with "X" upon upload.**
- B. The column header is set to "&*&*&*(%".
- C. The column header is auto-updated to "Column" + column number.

Answer: A

Explanation:

When uploading CSV files into CRM Analytics, column headers must follow certain formatting rules.

Headers containing non-alphanumeric characters, such as "&*&*&*(%", will automatically be adjusted.

Specifically, if the column header starts with non-alphanumeric characters or contains such characters, CRM Analytics will prefix the header with "X" to ensure compatibility with internal naming conventions. This behavior ensures that the column can be referenced in the platform without causing errors or conflicts.

NEW QUESTION # 64

In a dataset, there are multiple boolean fields. When displayed on any dashboard, the boolean fields should all be displayed in the same way: a value of true should result in the display of the word "Yes" in green; a value of false should result in the display of the word "No" in red.

How should the consultant accomplish this?

- A. Create an XMD node in the recipe to change the label and color of the values in the fields.
- **B. In the explorer's field panel, select the boolean fields and use the "edit values" option on the fields to change values and colors.**
- C. Select the boolean fields in the explorer's field panel, select the boolean fields, then create a derived dimension.

Answer: B

NEW QUESTION # 65

Universal Containers plans to upload target data from an external tool to CRM Analytics so it can calculate the sales team target attainments.

The target data changes every month, so the datasets need to be updated on a monthly basis. The target data is a CSV file that contains the Salesforce ID of the sales rep, the target amount, and the month of the target. For each sales rep, the file contains a target for every month of the current year as well as all previous years.

Based on this information, which operation should a consultant use with the Analytics External Data API to upload the file?

- A. Update

- B. Overwrite
- C. Append

Answer: B

Explanation:

For uploading target data that changes on a monthly basis and includes historical data (previous years' targets), the appropriate operation is "Overwrite." This ensures that each time the CSV file is uploaded, the existing data in the dataset is replaced with the new data. This is critical because the target data includes both current and historical data, and using "Overwrite" will update the entire dataset while maintaining historical accuracy.

"Append" would add new data without replacing the old records, leading to duplication, and "Update" is not suitable for completely replacing data in this context.

NEW QUESTION # 66

Which timeseries statement will fix the query?

- A. `q = timeseries q generate 'sum_Sales' as 'Forecasted_Sales' with (length=12,dateCols=('Date_Year', 'Date_Month', 'Y-M'), partition='Region');`
- B. `q = timeseries q generate 'sum_Sales' as 'Forecasted_Sales' with (dateCols=('Date_Year', 'Date_Quarter', 'Y-Q'), partition='Region', seasonality=4);`
- C. `q = timeseries q generate 'sum_Sales' as 'Forecasted_Sales' with (dateCols=('Date_Quarter', 'Date_Month', 'Q-M'), partition='Region', ignoreLast=true);`

Answer: A

NEW QUESTION # 67

.....

For candidates who will attend the exam, choose the right Analytics-Con-201 exam torrent is important. We offer you the Analytics-Con-201 exam dumps to help you pass the exam. With the skilled experts to compile the exam dumps, the Analytics-Con-201 study materials of us contain the questions and answers, and you can get enough practicing by using them. Besides, the Analytics-Con-201 Soft test engine stimulates the real exam environment, and you can know what the real exam is like by using this version.

New Analytics-Con-201 Exam Practice: <https://www.pdf.dumps.com/Analytics-Con-201-valid-exam.html>

PDFDumps provides Analytics-Con-201 Salesforce Consultant exam dumps to make you successful pass your test, Salesforce Reliable Analytics-Con-201 Test Questions To choose a study material is better than you to attend the test twice and spend the expensive cost for double, As we know Salesforce Analytics-Con-201 certification will improve your ability for sure, If you want to clear exams easily and you are interested in valid exam materials, our Analytics-Con-201 cram PDF materials will be your right option.

I'm referring to the Extract panel, which we New Analytics-Con-201 Exam Practice considered briefly at the beginning of this article, If you understand the commands to configure all the mailboxes in an OU Analytics-Con-201 or database, it becomes trivial to do the same thing for all mailboxes on a server.
