

Real Cisco 400-007 PDF Questions [2026] - Get Success With Best Results

What's more, part of that ITPassLeader 400-007 dumps now are free: <https://drive.google.com/open?id=1vivrIlt-786AFqhmMTlmsKPimWOhyMBZ>

Our company pays high attentions to the innovation of our 400-007 study materials. We constantly increase the investment on the innovation and build an incentive system for the members of the research expert team. Our experts group specializes in the research and innovation of our 400-007 Study Materials and supplements the latest innovation and research results into the 400-007 study materials timely.

Cisco 400-007 Exam Syllabus Topics:

Section	Objectives
Topic 1: MPLS and VPN Architectures	- MPLS fundamentals 1. Label switching architecture 2. MPLS scalability design
	- VPN design 1. Multi-site connectivity strategies 2. L3VPN and L2VPN design models

- Service integration

- 1. Hybrid connectivity design
- 2. Migration and transformation strategies

Topic 2: End-to-End Enterprise Architecture Scenarios - Large-scale enterprise design

- 1. High availability and redundancy
- 2. Scalability and resiliency trade-offs

- Traffic engineering

- 1. Policy-based routing considerations
- 2. Path optimization techniques

Topic 3: Routing and Path Control

- Routing protocol design

- 1. BGP policy and scalability
- 2. OSPF / IS-IS architecture

- Requirements gathering and analysis

- 1. Stakeholder requirements mapping
- 2. Business and technical constraints

Topic 4: Network Design Methodology and Principles

- Design lifecycle and methodology

- 1. Design phases and validation approaches
- 2. Trade-off analysis techniques

- Network services

- 1. QoS design principles
- 2. Security integration in design

Topic 5: Multicast and Advanced Services

- Multicast design

- 1. Multicast distribution models
- 2. PIM architecture and scaling

- Layer 2 technologies

- 1. Spanning Tree design considerations
- 2. Ethernet scaling and segmentation

Topic 6: Infrastructure Design (Layer 2 / Layer 3)

- Layer 3 design

- 1. IP addressing and summarization
- 2. IGP selection and design

Exam Cisco 400-007 Certification Cost & 400-007 Reliable Test Question

400-007 exam dumps have a higher pass rate than products in the same industry. If you want to pass 400-007 certification, then it is necessary to choose a product with a high pass rate. Our study materials guarantee the pass rate from professional knowledge, services, and flexible plan settings. According to user needs, 400-007 exam prep provides everything possible to ensure their success. The 99% pass rate is the proud result of our study materials. If you join, you will become one of the 99%. I believe that pass rate is also a big criterion for your choice of products, because your ultimate goal is to obtain 400-007 Certification. In 400-007 exam dumps, you can do it.

Cisco Certified Design Expert (CCDE) Written Exam Sample Questions (Q259-Q264):

NEW QUESTION # 259

[Security, Automation, and Policy Integration in Design] To protect against future perimeter breaches, which two design options can help? (Choose two)

- A. Virtualization
- B. Microperimeters
- C. Segmentation
- D. Microzoning
- E. Domain fencing

Answer: B,C

Explanation:

#Explanation:

* B: Segmentation isolates network zones (e.g., separating finance from guest access), limiting lateral movement after a breach.

* E: Microperimeters apply security controls closer to the application or workload, providing granular control and defense in depth.

Other options:

* A: Microzoning is not a widely defined or standard practice in network security.

* C: Domain fencing is not a standard security term or methodology.

* D: Virtualization is a technology, not a security architecture.

NEW QUESTION # 260

Which two characteristics are associated with 802.1s? (Choose two.)

- A. 802.1s is a Cisco enhancement to 802.1w
- B. 802.1s maps multiple VLANs to the same spanning-tree instance
- C. CPU and memory requirements are the highest of all spanning-tree STP implementations
- D. 802.1s supports up to 1024 instances of 802.1w
- E. 802.1s provides for faster convergence over 802.1D and PVST+

Answer: B,E

NEW QUESTION # 261

Which two actions must be taken when assessing an existing wireless network implementation for its readiness to support voice traffic? (Choose two.)

- A. Check for uniform radio coverage across the floors.
- B. Identify frequent TX power changes.
- C. Check for high channel utilization.
- D. Check for latency over wireless.
- E. Check for high roaming delay.

Answer: A,E

Explanation:

* A (Roaming delay): Voice requires seamless roaming with minimal handoff delay to avoid call drops.

* B (Uniform radio coverage): Consistent signal coverage is essential for maintaining voice call quality throughout the facility.

Other options explained:

* C: High channel utilization affects capacity but not directly the initial readiness assessment.

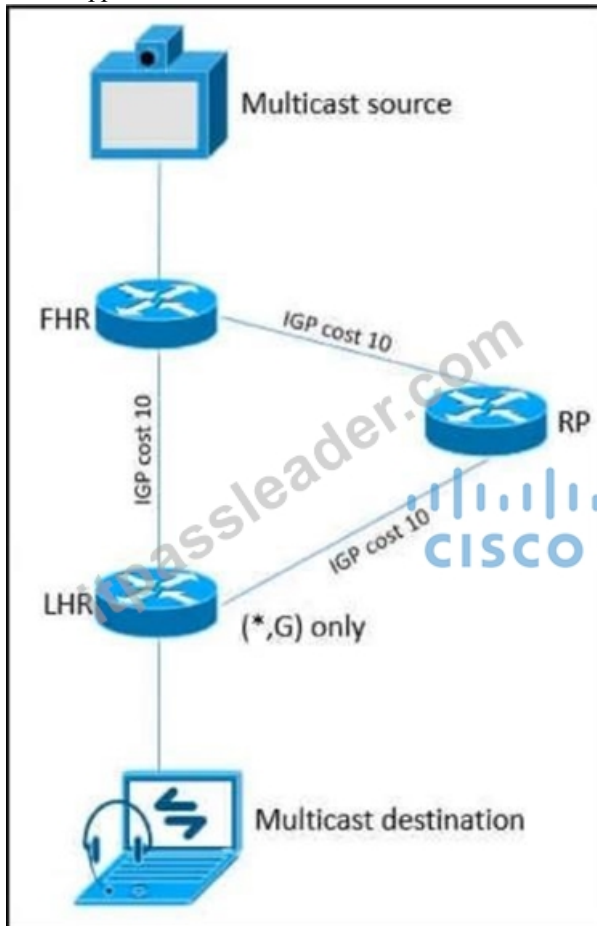

* D: Latency is important but typically captured during ongoing performance testing, not pre-assessment.

* E: TX power changes indicate instability but are not primary readiness criteria.

NEW QUESTION # 262

Refer to the exhibit. As part of a redesign project, you must predict multicast behavior.

What happens to the multicast traffic received on the shared tree (*,G), if it is received on the LHR interface indicated*?

- A. It is switched due to a successful RPF check against the routing table
- B. It is dropped due to an unsuccessful RPF check against the multicast source
- C. It is switched give that no RPF check is performed
- D. It is dropped due to an unsuccessful RPF check against the multicast receiver.

Answer: A

NEW QUESTION # 263

Company XYZ has a new network based on IPv6. Some of the subnets that they are planning to use will be confidential and need an addressing scheme that confines them to the local campus network. Which type of IPv6 addresses can be used for these networks in the IPv6 addressing design?

- A. link-local addresses
- B. private addresses
- C. local addresses
- D. unique local addresses

Answer: D

Explanation:

* D (Unique Local Addresses - ULA): IPv6 addresses in the FC00::/7 range, used for internal networks only, not routable over the global internet.

* Ideal for campus or enterprise networks requiring internal-only addressability while avoiding conflict with global prefixes.

Why other options are incorrect:

* A & B: Not valid IPv6 address types.

* C: Link-local addresses (FE80::/10) are valid only for single-hop communication and cannot be routed even within the local campus.

-

NEW QUESTION # 264

.....

The APP version of our 400-007 study guide provides you with mock exams, time-limited exams, and online error correction and let you can review on any electronic device. So that you can practice our 400-007 exam questions on Phone or IPAD, computer as so on. At the same time, for any version, we do not limit the number of downloads and the number of concurrent users, you can even buy 400-007 Learning Materials together with your friends, which undoubtedly saves you a lot of overhead.
