You just need to spend 20-30 hours on studying with our Health-Cloud-Accredited-Professional exam questions; you will have more free time to do other things.

## Salesforce Health Cloud Accredited Professional Sample Questions (Q17-Q22):

### NEW QUESTION # 17

If a Health Cloud administrator wanted to consume the content of an HL7 v2 - Simple Application message, which step would they need to take?

- A. Use salesforce Connect
- **B. Use an HL7 broker/engine to transform the text based HL7 message into JSON and pass it to the Health Cloud.**
- C. Write a custom apex class to consume parse and store a native HL7 message
- D. Do Nothing - Health Cloud works out of the box with native HL7 message

**Answer: B**

Explanation:

Health Cloud does not support native HL7 messages out of the box, so option A is incorrect. Option B is also incorrect, because Salesforce Connect is not designed to handle HL7 messages. Option C is possible, but it would require a lot of custom code and maintenance, and it is not recommended by Salesforce. Option D is the best option, because it uses an external HL7 broker/engine to convert the HL7 message into JSON, which can be easily consumed by Health Cloud using the standard REST API or the Health Cloud Data Loader12.

### NEW QUESTION # 18

A customer is looking to implement Discovery Framework to manage their intake and clinical assessments.

Which three capabilities should a consultant configure with Health Cloud out-of-the-box to enhance their assessment functionality?

Choose 3 answers

- **A. FHIR Question Bank**
- B. Adding a QR Code
- C. SMS Assessment Completion
- **D. Digital Signature Capture**
- **E. Using Previously Submitted Responses**

**Answer: A,D,E**

Explanation:

Step 1: Understanding the Discovery Framework in Health Cloud

The Discovery Framework in Salesforce Health Cloud is designed to streamline intake and clinical assessments by providing reusable, modular, and compliant tools for healthcare organizations. It enables organizations to collect, store, and reuse responses to assessment questions efficiently and securely.

Reference:

"Discovery Framework provides a way to design, distribute, and reuse forms and assessments for clinical and non-clinical scenarios. It leverages reusable question banks, digital data capture, and integration with Health Cloud objects." Administer Health Cloud - Assessments and Discovery Framework Step 2: FHIR Question Bank Capability: The use of a FHIR-based Question Bank allows healthcare organizations to standardize questions and reuse them across multiple assessments. This ensures consistency and regulatory compliance in data collection.

Extract:

"The Question Bank leverages the FHIR Questionnaire resource, making it easy to define, store, and reuse question sets for various clinical assessments." Administer Health Cloud - Discovery Framework: Question Bank Step 3: Digital Signature Capture Capability: Digital Signature Capture is supported natively in Health Cloud assessments, ensuring consent, authenticity, and regulatory compliance.

Extract:

"Out-of-the-box support for digital signature capture in assessment forms allows for secure, auditable consent capture, which is often required for clinical or legal compliance." Administer Health Cloud - Discovery Framework Features Step 4: Using Previously

Submitted Responses Capability: The ability to use previously submitted responses enhances user experience and speeds up the intake process by pre-populating assessments with earlier responses where relevant.

Extract:

"You can configure assessments to pre-fill questions with responses from prior assessments, supporting both efficiency and patient engagement." Administer Health Cloud - Reuse of Data in Assessments Step 5: Options Not Natively Supported Out-of-the-Box A . Adding a QR Code: Not natively supported in Health Cloud Discovery Framework out-of-the-box for assessments. This would require custom development or external integrations.

B . SMS Assessment Completion: Not supported out-of-the-box; may require integration with Marketing Cloud or external SMS services and customization.

Reference for non-supported features:

"Features such as QR code generation or SMS completion notifications are not available out of the box and would require customizations or integrations." Administer Health Cloud

### NEW QUESTION # 19

How can Code Sets be managed in Health Cloud?

- A. Health Cloud does not provide a Code Sets data model
- **B. Health Cloud provides a Code Sets data model that must be populated from an external source.**
- C. Health Cloud provides a Code Sets data model that is pre-populated with industry standard procedures and diagnostic code sets.
- D. Health Cloud provides a Code Sets data model that is pre-integrated to authoritative sources to ensure the latest code sets are always available.

**Answer: B**

Explanation:

Reference and details below.

□

### NEW QUESTION # 20

Which two health cloud specific setting must be configuration ..... Health cloud org has lightning experience enabled person account..... (Choose two)

- **A. Under Custom Metadata Types, Create a mapping records for Person accounts.**
- B. Under Custom Metadata Types, Update the Health cloud 'HCFeature'...
- **C. Enable "Use Person Accounts" custom setting.**
- D. Disable "Use Individual Data Model" in custom setting
- E. Under Custom Metadata Types, enable the Health cloud Setting

**Answer: A,C**

### NEW QUESTION # 21

An external provider wants to get a patient's allergy information from Bloomington Caregivers' Health Cloud system. Which Health Cloud API should a consultant recommend?

- A. Clinical Summary Healthcare API
- B. Allergy/Medication API
- C. Patient Healthcare API
- **D. Q Interoperability API**

**Answer: D**

Explanation:

Step-by-Step

Requirement:

External provider needs access to patient allergy information.

Interoperability API:

Salesforce Health Cloud provides FHIR-based Interoperability APIs that expose clinical data, including Allergy/Intolerance

resources.

"Use the Health Cloud Interoperability API (FHIR R4) to retrieve AllergyIntolerance resources and other clinical data for a patient."

- Health Cloud Interoperability API Guide

Other Options:

Clinical Summary Healthcare API: Provides a summary but not structured, granular allergy data.

AllergyMedication API: Not a standard Salesforce API.

Patient Healthcare API: Broader resource, but allergies specifically are available through the Interoperability API.

Reference:

Health Cloud Interoperability API Guide

## NEW QUESTION # 22

.....
