Exam 1Z0-1163-1 Discount & Exam 1Z0-1163-1 Review

The PDF version of our 1Z0-1163-1 guide quiz is prepared for you to print it and read it everywhere. It is convenient for you to see the answers to the questions and remember them. After you buy the PDF version of our 1Z0-1163-1 study material, you will get an E-mail from us in 5 to 10 minutes after payment. Once any new question is found, we will send you a link to download a new version of the 1Z0-1163-1 training engine. So don't worry if you are left behind the trend.

Oracle Fusion Cloud Applications SCM Foundations Associate - Rel 1 Sample Questions (Q43-Q48):

NEW QUESTION # 43

Which feature in Oracle Fusion Cloud SCM provides real-time order promising based on supply and demand constraints?

- A. Global Order Promising.
- B. Supplier Portal.

- C. Manufacturing Execution.
- D. Cost Accounting.

Answer: A

Explanation:

Global Order Promising (A) provides real-time order promising by analyzing supply (inventory, production) and demand (orders, forecasts) constraints across the enterprise. For instance, if a customer requests 100 units and only 80 are available with a 2-day production lead time, GOP promises delivery in 2 days. Option B (Supplier Portal) supports collaboration, not promising. Option C (Manufacturing Execution) tracks production, not order commitments. Option D (Cost Accounting) handles financials. GOP enhances customer trust and planning accuracy by delivering feasible, data-driven promises.

NEW QUESTION # 44

What role does the Inventory Management function play in Oracle Fusion Cloud SCM?

- A. It focuses on reducing supplier costs instead of stock levels.
- **B. It ensures optimal inventory levels by tracking stock movement and availability.**
- C. It manages only supplier shipments, not warehouse stock.

Answer: B

Explanation:

Inventory Management in Oracle Fusion Cloud SCM ensures optimal inventory levels by tracking stock movement, availability, and replenishment needs across warehouses and supply chains. It monitors quantities on hand, in transit, and on order, using real-time data to prevent overstocking or stockouts. For instance, if a product's stock drops below a reorder point, the system triggers a replenishment alert. Option A is incorrect-reducing supplier costs is a procurement goal, not Inventory Management's focus, which is stock optimization. Option B is wrong as it manages warehouse stock, not just supplier shipments. This function balances inventory costs with service levels, supporting efficient operations and customer satisfaction by ensuring products are available when needed without tying up excess capital.

NEW QUESTION # 45

What is the role of the Global Order Promising feature in Oracle Fusion Cloud SCM?

- A. It guarantees same-day delivery for all orders.
- B. It eliminates the need for supplier collaboration.
- C. It focuses only on local inventory availability.
- **D. It provides real-time order commitment dates based on supply and demand constraints.**

Answer: D

NEW QUESTION # 46

What is the role of automation in creating POs from contract fulfillment in Oracle Fusion Cloud Procurement?

- A. It enhances supplier qualification by providing visibility into supplier responses.
- **B. It ensures that POs are created accurately based on contract terms, reducing manual errors, and improving efficiency.**
- C. It facilitates the approval process by routing POs to the appropriate approvers, based on invoice rules and limits.

Answer: B

Explanation:

In Oracle Fusion Cloud Procurement, automation plays a critical role in creating purchase orders (POs) from contract fulfillment by ensuring that POs are generated directly from agreed contract terms with high accuracy and minimal manual intervention. This process leverages predefined contract data-such as item details, pricing, quantities, and delivery schedules-to populate POs automatically, reducing errors like incorrect pricing or quantities that often occur in manual entry. For instance, if a contract specifies 100 units of a product at \$10 each, automation ensures the PO reflects this exactly, bypassing the need for manual rekeying. Option A is incorrect because routing POs for approval is a subsequent step, not the primary role of automation in PO creation. Option C is unrelated, as supplier qualification pertains to evaluating suppliers, not PO generation. This automation improves efficiency by speeding up the procurement cycle, ensures compliance with contract terms, and frees procurement staff to focus on strategic tasks.

rather than clerical work. It also integrates with supplier collaboration tools to confirm details, further enhancing accuracy.

NEW QUESTION # 47

What is the function of Receipt Accounting in Oracle Fusion Cloud SCM?

- A. It records the receipt of goods and services, creating accounting entries for financial reporting.
- B. It validates contract terms for procurement.
- C. It ensures supplier invoices are paid on time.

Answer: A

Explanation:

Receipt Accounting in Oracle Fusion Cloud SCM records the receipt of goods and services, generating accounting entries for financial reporting and cost tracking. Option A (timely payments) is a downstream process, not its core function. Option C (contract validation) pertains to procurement, not receipt accounting. This ensures accurate financial records and compliance.

NEW QUESTION # 48

.....

1Z0-1163-1 also offers free demos, allowing users to test the quality and suitability of the 1Z0-1163-1 exam dumps before purchasing. The demo provides access to a limited portion of the material, providing users with a better understanding of the content. Additionally, 1Z0-1163-1 provides three months of free updates to ensure that candidates have access to the latest questions.
