100% Pass 2026 CertiProf I27001F –Newest Technical Training

In the process of using the I27001F study training materials, once users have any questions about our study materials, the user can directly by E-mail us, our products have a dedicated customer service staff to answer for the user, they are 24 hours service for you, we are very welcome to contact us by E-mail and put forward valuable opinion for us. Our I27001F Latest Questions already have three different kinds of learning materials, what is the most suitable I27001F test guide for you? You can just follow the instructions for I27001F study guide on the web or ask our services about it.

CertiProf Certified ISO/IEC 27001:2022 Foundation Sample Questions (Q24-Q29):

NEW QUESTION # 24

Which of the following aspects is considered a critical success factor in the implementation of an Information Security Management System?

- A. Promoting good information security practices
- B. Satisfying social needs and expectations
- C. Completely avoiding all information security incidents
- **D. Increasing the confidence of interested parties in the organization**

Answer: D

Explanation:

A well-implemented ISMS helps build trust and confidence among interested parties by demonstrating that information security risks are being managed systematically and effectively. Completely preventing all incidents is unrealistic and not required by ISO/IEC 27001:2022. Promoting good practices is important, but the broader organizational outcome recognized as a major success factor is increased confidence by customers, partners, regulators, and other interested parties. Therefore, option D is the best answer.

NEW QUESTION # 25

According to ISO/IEC 27001:2022, is it necessary to ensure that successive information security risk assessments produce consistent, valid, and comparable results?

- A. None of the above
- **B. It is a requirement to be fulfilled**
- C. It is a recommendation, but not a requirement
- D. It is only an observation to keep in mind when auditing the management system

Answer: B

Explanation:

ISO/IEC 27001:2022 requires the organization to define and apply an information security risk assessment process that produces consistent, valid, and comparable results. This is not optional guidance and not merely an auditing suggestion. It is a formal requirement within the planning and risk assessment requirements of the standard. Therefore, option B is correct.

NEW QUESTION # 26

What details must be included in a Statement of Applicability?

- A. Justification for the exclusion of controls
- **B. All of the above**
- C. Justification for the inclusion of controls
- D. The controls considered necessary

Answer: B

Explanation:

In ISO/IEC 27001:2022, the Statement of Applicability is a required documented output of the information security risk treatment process. It must contain the necessary controls, including whether they are implemented, and the justification for their inclusion. It must also include justification for excluding controls from Annex A when they are not applicable. Therefore, all three elements listed in options A, B, and C are part of a proper Statement of Applicability, making option D the correct answer.

NEW QUESTION # 27

In ISO/IEC 27001:2022, what does the information security risk assessment process refer to?

- A. Establishing and maintaining information security risk criteria
- B. Identifying risk owners
- C. Identifying information security risks
- **D. All of the above**

Answer: D

Explanation:

ISO/IEC 27001:2022 requires the organization to establish and maintain information security risk criteria, identify information security risks, and identify risk owners as part of the risk assessment process. These activities are core elements of clause 6 on planning and risk assessment. Since all of the listed options are required parts of the process, the correct answer is D.

NEW QUESTION # 28

Within the ISMS, communicating the importance of effective information security management and of conforming to the ISMS requirements is a responsibility of:

- **A. Top management**
- B. The IT Security Manager
- C. The quality management representative
- D. The IT Manager

Answer: A

Explanation:

A specific leadership responsibility in ISO/IEC 27001:2022 is for top management to communicate the importance of effective information security management and of conforming to the ISMS requirements. This communication role is part of demonstrating leadership and commitment, helping create organizational awareness and support for the ISMS. Therefore, option B is correct.

NEW QUESTION # 29

.....

These I27001F exam question formats contain real, valid, and updated CertiProf I27001F exam questions that will assist you in CertiProf Certified ISO/IEC 27001:2022 Foundation exam preparation and enable you to pass the challenging CertiProf I27001F Exam with good scores. The CertiProf I27001F questions are prepared by highly experienced professionals and, thus, are kept to the point and concise.
