Microsoft AZ-140 Practice Test [2026]

Your eligibility of getting a high standard of career situation will be improved if you can pass the exam, and our AZ-140 practice materials are your most reliable ways to get it. You can feel assertive about your exam with our 100 guaranteed professional AZ-140 practice materials, let along various opportunities like getting promotion, being respected by surrounding people on your profession's perspective. All those beneficial outcomes come from your decision of our AZ-140 practice materials. We are willing to be your side offering whatever you need compared to other exam materials that malfunctioning in the market.

Microsoft Configuring and Operating Microsoft Azure Virtual Desktop Sample Questions (Q161-Q166):

NEW QUESTION # 161

You have a Windows Virtual Desktop deployment.

You need to ensure that all the connections to the managed resources in the host pool require multi-factor authentication (MFA).

Which two settings should you modify in a conditional access policy? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation

Reference:

<https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-enable-azure-mfa>

NEW QUESTION # 162

You have an Azure subscription that contains the resources shown in the following table.

You have a virtual machine named Server1 that runs Windows Server and is connected to VNet3.

You need to deploy the Azure Virtual Desktop host pools shown in the following table.

The solution must meet the following requirements:

- * The session hosts in Pool1 must access Server1 via the Microsoft backbone network.

- * The session hosts in Pool2 must access storage1 via the Microsoft backbone network.

What should you configure on the virtual networks? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

Explanation:

NEW QUESTION # 163

You have a Windows Virtual Desktop deployment.

You plan to create the host pools shown in the following table.

You need to recommend the virtual machine size for each host pool. The solution must minimize costs.

Which size should you recommend for each pool? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Answer:

Explanation:

NEW QUESTION # 165

Case Study 2 - Litware, Inc

Overview

Litware, Inc. is a pharmaceutical company that has a main office in Boston, United States, and a remote office in Chennai, India.

Existing Environment. Identity Environment

The network contains an on-premises Active Directory domain named litware.com that syncs to an Azure Active Directory (Azure AD) tenant named litware.com.

The Azure AD tenant contains the users shown in the following table.

All users are registered for Azure Multi-Factor Authentication (MFA).

Existing Environment. Cloud Services

Litware has a Microsoft 365 E5 subscription associated to the Azure AD tenant. All users are assigned Microsoft 365 Enterprise E5 licenses.

Litware has an Azure subscription associated to the Azure AD tenant. The subscription contains the resources shown in the following table.

Litware uses custom virtual machine images and custom scripts to automatically provision Azure virtual machines and join the virtual machines to the on-premises Active Directory domain.

Network and DNS

The offices connect to each other by using a WAN link. Each office connects directly to the internet.

All DNS queries for internet hosts are resolved by using DNS servers in the Boston office, which point to root servers on the internet. The Chennai office has caching-only DNS servers that forward queries to the DNS servers in the Boston office.

Requirements. Planned Changes

Litware plans to implement the following changes:

- * Deploy Azure Virtual Desktop environments to the East US Azure region for the users in the Boston office and to the South India Azure region for the users in the Chennai office.

- * Implement FSLogix profile containers.

- * Optimize the custom virtual machine images for the Azure Virtual Desktop session hosts.

- * Use PowerShell to automate the addition of virtual machines to the Azure Virtual Desktop host pools.

Requirements. Performance Requirements

Litware identifies the following performance requirements:

- * Minimize network latency of the Azure Virtual Desktop connections from the Boston and Chennai offices.

- * Minimize latency of the Azure Virtual Desktop host authentication in each Azure region.

- * Minimize how long it takes to sign in to the Azure Virtual Desktop session hosts.

Requirements. Authentication Requirements

Litware identifies the following authentication requirements:

- * Enforce Azure MFA when accessing Azure Virtual Desktop apps.

- * Force users to reauthenticate if their Azure Virtual Desktop session lasts more than eight hours.

Requirements. Security Requirements

Litware identifies the following security requirements:

- * Explicitly allow traffic between the Azure Virtual Desktop session hosts and Microsoft 365.

- * Explicitly allow traffic between the Azure Virtual Desktop session hosts and the Azure Virtual Desktop infrastructure.

- * Use built-in groups for delegation.

- * Delegate the management of app groups to Admin2, including the ability to publish app groups to users and user groups.

- * Grant Admin1 permissions to manage workspaces, including listing which apps are assigned to the app groups.

- * Minimize administrative effort to manage network security.

- * Use the principle of least privilege.

Requirements. Deployment Requirements

Litware identifies the following deployment requirements:

- * Use PowerShell to generate the token used to add the virtual machines as session hosts to a Azure Virtual Desktop host pool.

- * Minimize how long it takes to provision the Azure Virtual Desktop session hosts based on the custom virtual machine images.

- * Whenever possible, preinstall agents and apps in the custom virtual machine images.

User Profile Requirements

Litware identifies the following user profile requirements:

- * In storage1, store user profiles for the Boston office users.

- * Ensure that the user profiles for the Boston office users replicate synchronously between two Azure regions.

- * Ensure that Admin1 uses a local profile only when signing in to the Azure Virtual Desktop session hosts.

You need to recommend an authentication solution that meets the performance requirements.

Which two actions should you include in the recommendation? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

- A. Deploy domain controllers for the on-premises Active Directory domain on Azure virtual machines.
- B. Join all the session hosts to Azure AD.
- C. In each Azure region that will contain the Azure Virtual Desktop session hosts, create an Azure Active Directory Domain Service (Azure AD DS) managed domain.
- D. In each Azure region that will contain the Azure Virtual Desktop session hosts, create an Active Directory site.
- E. Deploy read-only domain controllers (RODCs) on Azure virtual machines.

Answer: A,D
