

NCP-EUC Latest Exam Answers & NCP-EUC Exam Discount

P.S. Free & New NCP-EUC dumps are available on Google Drive shared by Itexamguide: https://drive.google.com/open?id=1viRw-dwjm77jB_VIqzAcU4lrfSph0Ye

Itexamguide beckons exam candidates around the world with our attractive characters. Our experts made significant contribution to their excellence. So we can say bluntly that our NCP-EUC simulating exam is the best. Our effort in building the content of our NCP-EUC study materials lead to the development of learning guide and strengthen their perfection. So our simulating exam is definitely making your review more durable. To add up your interests and simplify some difficult points, our experts try their best to design our NCP-EUC Study Material to help you pass the NCP-EUC exam.

Nutanix NCP-EUC (Nutanix Certified Professional - End-User Computing) Certification Exam is a highly respected certification in the field of end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification is designed to validate the skills and knowledge required to deploy, manage, and support Nutanix infrastructure for end-user computing solutions. NCP-EUC exam includes a range of topics, such as desktop and application virtualization, end-user management, and endpoint security.

Nutanix NCP-EUC Certification Exam is designed for IT professionals who aspire to become experts in end-user computing. Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam certification validates the skills of an individual in deploying and managing virtual desktop infrastructure (VDI) and application virtualization solutions using the Nutanix Enterprise Cloud Platform. NCP-EUC exam evaluates your knowledge of end-user computing concepts, Nutanix VDI solutions, and application virtualization.

NCP-EUC Exam Discount - Premium NCP-EUC Exam

The pass rate of the NCP-EUC training materials is 99%, we pass guarantee, and if you can't pass, money guarantee for your failure, that is money will return to your account. You just need to send the participation and the failure scanned, money will be returned. We can ensure that your money will be returned, either the certification or the money back. Besides the NCP-EUC Training Materials include the question and answers with high-quality, you will get enough practice.

Nutanix Certified Professional - End User Computing (NCP-EUC) 6.10 Exam Sample Questions (Q98-Q103):

NEW QUESTION # 98

A user has been migrated from a legacy desktop environment to the company's new Citrix VDI solution. Performance on the new VDI architecture is good, but the user experiences long login and logoff times for every session. What is the primary cause of this issue?

- A. The user has a legacy roaming profile configured.
- B. There are not enough GPUs available in the cluster.

- C. The cluster needs additional network connectivity.
- D. The home folder has too much archived data.

Answer: A

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Citrix on Nutanix Best Practices for Profile Management:

* Legacy Roaming Profiles: A "Legacy Roaming Profile" (Windows Roaming User Profiles) functions by downloading the entire profile (files, folders, AppData, etc.) from the network share to the local VM at logon, and uploading changes back at logoff.

* Impact on Performance: If a user has a large existing profile (common in legacy migrations), this copy process creates massive network and disk I/O activity during the logon/logoff phase, resulting in extended wait times (the "Applying User Settings" or "Waiting for User Profile Service" screens).

* Contrast with Modern Solutions: Modern VDI solutions use Profile Containers (like FSLogix or Citrix Profile Management containers) which mount the profile as a virtual disk (VHDX) almost instantly, rather than copying files.

* Why not Home Folder (C)? A home folder is typically a mapped network drive. It does not copy data to the desktop at logon; it simply maps a pointer. Therefore, having "too much data" in a mapped drive does not slow down the logon process itself.

NEW QUESTION # 99

The migration has been completed, but in order for the administrator to start deploying the VDI desktops, which last step is needed?

- A. PC Xi Leap
- B. Citrix Delivery Controllers
- C. PE Citrix Connection
- D. PC leap

Answer: C

Explanation:

One of them is Nutanix Frame, which is a cloud-based service that delivers virtual apps and desktops from any cloud provider or on-premises datacenter.

Nutanix Frame simplifies VDI deployment by providing automated cloud resource orchestration, user session brokering, and environment administration.

Another solution is Nutanix Citrix Cloud, which is a hybrid cloud solution that integrates Nutanix HCI with Citrix Virtual Apps and Desktops service.

Nutanix Citrix Cloud enables VDI deployment by providing centralized management and delivery of virtual apps and desktops through Citrix Cloud Services.

According to Nutanix best practices², one of the steps needed for deploying VDI with Nutanix Citrix Cloud is to configure the PE Citrix Connection.

This step involves creating a connection between the Nutanix Prism Element (PE) cluster and the Citrix Cloud account, which allows Nutanix to register as a resource location for Citrix Cloud Services.

This connection also enables Nutanix to provide performance metrics, alerts, and actions for the virtual apps and desktops running on Nutanix HCI.

NEW QUESTION # 100

An administrator has finished setting up a Frame environment and has to finish preparing the Sandbox image.

During the publishing and testing phase, the administrator notices issue with the Sysprep process.

Which tool can the administrator use to prepare the Sysprep of the sandbox with error parsing?

- A. Frame Guest Agent 7
- B. Frame Guest Agent 8
- C. Windows Sysprep Built in tool
- D. Frame Sysprep Helper Tool

Answer: D

Explanation:

Sysprep is a Microsoft tool that prepares a Windows installation for cloning, auditing, and customer delivery²

3. The Frame Sysprep Helper Tool is designed to simplify the Microsoft Sysprep process by parsing errors reported by sysprep

and immediately repairing them when possible. Therefore, the tool that the administrator can use to prepare the Sysprep of the sandbox with error parsing is A (Frame Sysprep Helper Tool).

NEW QUESTION # 101

An EUC environment is being deployed with non-persistent desktops.

How should an administrator configure OS updates via group policy for the non-persistent desktops organizational unit?

- A. Enable - Always automatically restart at the scheduled time
- B. Disable - Configure automatic updates
- C. Enable - Allow automatic updates immediate installation
- **D. Disable - Allow automatic updates immediate installation**

Answer: D

Explanation:

Comprehensive and Detailed Explanation From Exact Extract of Nutanix End User Computing documents:

According to Nutanix and Microsoft Best Practices for Non-Persistent VDI images:

* Policy Setting: The Group Policy setting "Allow Automatic Updates immediate installation" should be set to Disabled.

* Reasoning: In a non-persistent environment, desktops revert to their base state upon reboot. Allowing automatic updates to install immediately during a user session consumes system resources (CPU/IOPS) and any changes made are discarded when the user logs off and the VM reboots.

* Correct Management: Updates should be applied solely to the Master/Gold Image during a maintenance window. Once the master image is updated and sealed, it is redeployed to the pool.

Disabling immediate installation prevents the "Windows Update" service from attempting to patch transient clones unnecessarily.

NEW QUESTION # 102

An administrator has deployed a pool of non-persistent Windows 11 virtual desktops configured with local profiles. Users have complained about application settings not being retained between sessions and slow initial login times.

What solution would best resolve the user complaints?

- A. Enable Microsoft Roaming Profiles
- B. Implement Mandatory Profiles
- **C. Enable Virtual Disk-based profile solution**
- D. Incorporate application settings in base image

Answer: C

Explanation:

To resolve issues with persistence (retaining settings) and login performance in a non-persistent VDI environment, the industry standard and Nutanix-recommended solution is to Enable a Virtual Disk-based profile solution (such as FSLogix Profile Containers or Citrix Profile Management containers).

* Retaining Settings: Unlike local profiles (wiped on reboot) or mandatory profiles (read-only), containerized profiles capture all user writes and persist them to a VHD/VHDX file on a file share (e.g., Nutanix Files).

* Speed: Microsoft Roaming Profiles (Option A) require copying files over the network at login, causing slowness. Virtual Disk-based solutions mount the profile disk instantly over the network, making the login process nearly as fast as a local profile while ensuring data persistence.

NEW QUESTION # 103

.....

In order to provide the most effective NCP-EUC exam materials which cover all of the current events for our customers, a group of experts in our company always keep an close eye on the changes of the NCP-EUC exam even the smallest one, and then will compile all of the new key points as well as the latest types of exam questions into the new version of our NCP-EUC Practice Test, and you can get the latest version of our study materials for free during the whole year. Do not lose the wonderful chance to advance with times.
