

# AWS-Certified-Machine-Learning-Specialty Reliable Test Cost & AWS-Certified-Machine-Learning-Specialty Test Study Guide

P.S. Free 2026 Amazon AWS-Certified-Machine-Learning-Specialty dumps are available on Google Drive shared by PrepAwayTest: <https://drive.google.com/open?id=1ZfiFqkUcjyzA40itUuDWZ9whXbBF4rsr>

The AWS-Certified-Machine-Learning-Specialty certification exam is essential for future development, and the right to a successful AWS-Certified-Machine-Learning-Specialty exam will be in your own hands. As long as you pass the exam, you will take a step closer to your goal. However, unless you have updated AWS-Certified-Machine-Learning-Specialty exam materials, or passing the exam's mystery is quite challenging. Thousands of people tried the AWS-Certified-Machine-Learning-Specialty exams, but despite having good professional experience and being well-prepared, the regrettable exam failed. One of the main reasons for the failure may be that since practice and knowledge alone are not enough, people need to practice our PrepAwayTest AWS-Certified-Machine-Learning-Specialty Exam Materials, otherwise they cannot escape reading. Well, you are in the right place. The AWS-Certified-Machine-Learning-Specialty questions on our PrepAwayTest are one of the most trustworthy questions and provide valuable information for all candidates who need to pass the AWS-Certified-Machine-Learning-Specialty exam.

There is no doubt that if a person possesses the characteristic of high production in their workplace or school, it is inevitable that he or she will achieve in the AWS-Certified-Machine-Learning-Specialty exam success eventually. So will you. We have a lasting and sustainable cooperation with customers who are willing to purchase our AWS-Certified-Machine-Learning-Specialty Actual Exam. We try our best to renovate and update our AWS-Certified-Machine-Learning-Specialty study materials in order to help you fill the knowledge gap during your learning process, thus increasing your confidence and success rate in the AWS-Certified-Machine-Learning-Specialty exam.

**>> AWS-Certified-Machine-Learning-Specialty Reliable Test Cost <<**

**Newest Amazon AWS-Certified-Machine-Learning-Specialty Reliable Test Cost offer you accurate Test Study Guide | AWS Certified Machine Learning - Specialty**

Up to now we classify our AWS-Certified-Machine-Learning-Specialty exam questions as three different versions. They are pdf,

software and the most convenient one APP online. Though the content of these three versions is the same, but their displays are different. Each of them has their respective feature and advantage including new information that you need to know to pass the AWS-Certified-Machine-Learning-Specialty test. So you can choose the version of AWS-Certified-Machine-Learning-Specialty training quiz according to your personal preference.

## Amazon AWS Certified Machine Learning - Specialty Sample Questions (Q14-Q19):

### NEW QUESTION # 14

A machine learning (ML) developer for an online retailer recently uploaded a sales dataset into Amazon SageMaker Studio. The ML developer wants to obtain importance scores for each feature of the dataset. The ML developer will use the importance scores to feature engineer the dataset.

Which solution will meet this requirement with the LEAST development effort?

- A. Use the multicollinearity feature to perform a lasso feature selection to perform an importance scores analysis.
- **B. Use SageMaker Data Wrangler to perform a Gini importance score analysis.**
- C. Use a SageMaker notebook instance to perform principal component analysis (PCA).
- D. Use a SageMaker notebook instance to perform a singular value decomposition analysis.

**Answer: B**

Explanation:

SageMaker Data Wrangler is a feature of SageMaker Studio that provides an end-to-end solution for importing, preparing, transforming, featurizing, and analyzing data. Data Wrangler includes built-in analyses that help generate visualizations and data insights in a few clicks. One of the built-in analyses is the Quick Model visualization, which can be used to quickly evaluate the data and produce importance scores for each feature. A feature importance score indicates how useful a feature is at predicting a target label. The feature importance score is between [0, 1] and a higher number indicates that the feature is more important to the whole dataset. The Quick Model visualization uses a random forest model to calculate the feature importance for each feature using the Gini importance method. This method measures the total reduction in node impurity (a measure of how well a node separates the classes) that is attributed to splitting on a particular feature. The ML developer can use the Quick Model visualization to obtain the importance scores for each feature of the dataset and use them to feature engineer the dataset. This solution requires the least development effort compared to the other options.

References:

\* Analyze and Visualize

\* Detect multicollinearity, target leakage, and feature correlation with Amazon SageMaker Data Wrangler

### NEW QUESTION # 15

A Machine Learning Specialist uploads a dataset to an Amazon S3 bucket protected with server-side encryption using AWS KMS. How should the ML Specialist define the Amazon SageMaker notebook instance so it can read the same dataset from Amazon S3?

- A. Define security group(s) to allow all HTTP inbound/outbound traffic and assign those security group(s) to the Amazon SageMaker notebook instance.
- B. Assign the same KMS key used to encrypt data in Amazon S3 to the Amazon SageMaker notebook instance.
- **C. Assign an IAM role to the Amazon SageMaker notebook with S3 read access to the dataset. Grant permission in the KMS key policy to that role.**
- D. #onfigure the Amazon SageMaker notebook instance to have access to the VPC. Grant permission in the KMS key policy to the notebook's KMS role.

**Answer: C**

Explanation:

\* To read data from an Amazon S3 bucket that is protected with server-side encryption using AWS KMS, the Amazon SageMaker notebook instance needs to have an IAM role that has permission to access the S3 bucket and the KMS key. The IAM role is an identity that defines the permissions for the notebook instance to interact with other AWS services. The IAM role can be assigned to the notebook instance when it is created or updated later.

\* The KMS key policy is a document that specifies who can use and manage the KMS key. The KMS key policy can grant permission to the IAM role of the notebook instance to decrypt the data in the S3 bucket. The KMS key policy can also grant permission to other principals, such as AWS accounts, IAM users, or IAM roles, to use the KMS key for encryption and decryption operations.

\* Therefore, the Machine Learning Specialist should assign an IAM role to the Amazon SageMaker notebook with S3 read access

to the dataset. Grant permission in the KMS key policy to that role. This way, the notebook instance can use the IAM role credentials to access the S3 bucket and the KMS key, and read the encrypted data from the S3 bucket.

References:

- \* Create an IAM Role to Grant Permissions to Your Notebook Instance
- \* Using Key Policies in AWS KMS

### NEW QUESTION # 16

A Data Scientist is developing a machine learning model to classify whether a financial transaction is fraudulent. The labeled data available for training consists of 100,000 non-fraudulent observations and 1,000 fraudulent observations.

The Data Scientist applies the XGBoost algorithm to the data, resulting in the following confusion matrix when the trained model is applied to a previously unseen validation dataset. The accuracy of the model is 99.1%, but the Data Scientist has been asked to reduce the number of false negatives.

Which combination of steps should the Data Scientist take to reduce the number of false positive predictions by the model? (Select TWO.)

- A. Increase the XGBoost `scale_pos_weight` parameter to adjust the balance of positive and negative weights.
- B. Change the XGBoost `eval_metric` parameter to optimize based on AUC instead of error.
- C. Decrease the XGBoost `max_depth` parameter because the model is currently overfitting the data.
- D. Increase the XGBoost `max_depth` parameter because the model is currently underfitting the data.
- E. Change the XGBoost `eval_metric` parameter to optimize based on rmse instead of error.

**Answer: A,B**

Explanation:

\* The XGBoost algorithm is a popular machine learning technique for classification problems. It is based on the idea of boosting, which is to combine many weak learners (decision trees) into a strong learner (ensemble model).

\* The XGBoost algorithm can handle imbalanced data by using the `scale_pos_weight` parameter, which controls the balance of positive and negative weights in the objective function. A typical value to consider is the ratio of negative cases to positive cases in the data. By increasing this parameter, the algorithm will pay more attention to the minority class (positive) and reduce the number of false negatives.

\* The XGBoost algorithm can also use different evaluation metrics to optimize the model performance.

The default metric is error, which is the misclassification rate. However, this metric can be misleading for imbalanced data, as it does not account for the different costs of false positives and false negatives.

A better metric to use is AUC, which is the area under the receiver operating characteristic (ROC) curve. The ROC curve plots the true positive rate against the false positive rate for different threshold values. The AUC measures how well the model can distinguish between the two classes, regardless of the threshold. By changing the `eval_metric` parameter to AUC, the algorithm will try to maximize the AUC score and reduce the number of false negatives.

\* Therefore, the combination of steps that should be taken to reduce the number of false negatives are to increase the `scale_pos_weight` parameter and change the `eval_metric` parameter to AUC.

### NEW QUESTION # 17

A company is using Amazon Textract to extract textual data from thousands of scanned text-heavy legal documents daily. The company uses this information to process loan applications automatically. Some of the documents fail business validation and are returned to human reviewers, who investigate the errors. This activity increases the time to process the loan applications.

What should the company do to reduce the processing time of loan applications?

- A. Configure Amazon Textract to route low-confidence predictions to Amazon SageMaker Ground Truth. Perform a manual review on those words before performing a business validation.
- B. Use an Amazon Textract synchronous operation instead of an asynchronous operation.
- C. Configure Amazon Textract to route low-confidence predictions to Amazon Augmented AI (Amazon A2I). Perform a manual review on those words before performing a business validation.
- D. Use Amazon Rekognition's feature to detect text in an image to extract the data from scanned images. Use this information to process the loan applications.

**Answer: C**

### NEW QUESTION # 18

An office security agency conducted a successful pilot using 100 cameras installed at key locations within the main office. Images from the cameras were uploaded to Amazon S3 and tagged using Amazon Rekognition, and the results were stored in Amazon ES. The agency is now looking to expand the pilot into a full production system using thousands of video cameras in its office locations globally. The goal is to identify activities performed by non-employees in real time. Which solution should the agency consider?

- A. Install AWS DeepLens cameras and use the DeepLens\_Kinesis\_video module to stream video to Amazon Kinesis Video Streams for each camera. On each stream, use Amazon Rekognition Video and create a stream processor to detect faces from a collection on each stream, and alert when non-employees are detected.
- B. Install AWS DeepLens cameras and use the DeepLens\_Kinesis\_video module to stream video to Amazon Kinesis Video Streams for each camera. On each stream, run an AWS Lambda function to capture image fragments and then call Amazon Rekognition Image to detect faces from a collection of known employees, and alert when non-employees are detected.
- C. Use a proxy server at each local office and for each camera, and stream the RTSP feed to a unique Amazon Kinesis Video Streams video stream. On each stream, use Amazon Rekognition Image to detect faces from a collection of known employees and alert when non-employees are detected.
- D. Use a proxy server at each local office and for each camera, and stream the RTSP feed to a unique Amazon Kinesis Video Streams video stream. On each stream, use Amazon Rekognition Video and create a stream processor to detect faces from a collection of known employees, and alert when non-employees are detected.

**Answer: A**

### NEW QUESTION # 19

.....

Our AWS-Certified-Machine-Learning-Specialty test questions are compiled by domestic first-rate experts and senior lecturer and the contents of them contain all the important information about the test and all the possible answers of the questions which maybe appear in the test. Our AWS-Certified-Machine-Learning-Specialty test practice guide' self-learning and self-evaluation functions, the statistics report function, the timing function and the function of stimulating the test could assist you to find your weak links and have a warming up for the Real AWS-Certified-Machine-Learning-Specialty Exam. You will feel your choice to buy AWS-Certified-Machine-Learning-Specialty reliable exam torrent is too right.

**AWS-Certified-Machine-Learning-Specialty Test Study Guide:** <https://www.prepawaytest.com/Amazon/AWS-Certified-Machine-Learning-Specialty-practice-exam-dumps.html>

Take a look at the development of AWS-Certified-Machine-Learning-Specialty guide quiz and you will certainly be attracted to it, Amazon AWS-Certified-Machine-Learning-Specialty Reliable Test Cost You can see our reviews and testimonials to make sure how genuine is our company, Navigate to the following folder: C:\ProgramData\ (If you do not see the ProgramData folder, make sure that you have the folder options to show hidden folders.) Right click on the PrepAwayTest AWS-Certified-Machine-Learning-Specialty Test Study Guide folder, Amazon AWS-Certified-Machine-Learning-Specialty Reliable Test Cost We have strict information system.
