## **FCP\_FCT\_AD-7.4 examkiller valid study dumps & FCP\_FCT\_AD-7.4 exam review torrents**

Our company is considerably cautious in the selection of talent and always hires employees with store of specialized knowledge and skills on our FCP\_FCT\_AD-7.4 exam questions. All the members of our experts and working staff maintain a high sense of responsibility, which is why there are so many people choose our FCP\_FCT\_AD-7.4 Exam Materials and to be our long-term partner. Believe in our FCP\_FCT\_AD-7.4 study guide, and you will have a brighter future!

## **Fortinet FCP - FortiClient EMS 7.4 Administrator Sample Questions (Q41-Q46):**

### **NEW QUESTION # 41**

An administrator has lost web access to the FortiClient EMS console, and the web page to access to the console is timing out. How can the administrator gather information to investigate the issue? (Choose one answer)

- A. Use the CLI diagnostic tool on the EMS server.
- B. Use the diagnostic logs option from the FortiClient EMS GUI.
- C. Download the log generator from the support site and run it on the EMS server.
- D. Download the webserver logs from the PostgreSQL server.

**Answer: A**

Explanation:

According to the FortiClient EMS Administrator Study Guide and official Technical Tips from Fortinet, when the web console is inaccessible (e.g., timing out), the administrator must use tools available directly on the server's operating system (CLI) to gather diagnostic information.

1. Why the CLI Diagnostic Tool (Answer A) is the Correct Choice:

\* Availability during Outage: When the GUI is unreachable, the standard "Generate Diagnostic Logs" option within the EMS interface is also unavailable.

\* Windows-based EMS: The administrator can manually run the EMSDiagnosticTool.exe located at C:

\Program Files (x86)\Fortinet\FortiClientEMS\. This tool collects server information, Windows events, and EMS-specific logs into a compressed file for investigation.

\* Linux-based EMS (v7.4+): For newer versions running on Linux, the administrator can use the CLI command: sudo /opt/forticlientems/bin/diagnostic\_tool -o /tmp/diag to generate a diagnostic package.

\* Service Verification: The CLI also allows administrators to verify if critical services (like fcems, apache2, or postgres) are running or if remote access has been disabled using the emscli utility.

2. Why Other Options are Incorrect:

\* B. Download webserver logs from PostgreSQL: PostgreSQL is the database engine for EMS, not the web server. While database logs are useful, they are not the primary method for gathering general "diagnostic information" and would typically be collected as part of the CLI diagnostic tool output rather than downloaded directly from the DB.

\* C. Diagnostic logs option from the GUI: This option is impossible to use if the administrator has lost web access and the page is timing out.

\* D. Download log generator from support site: While Fortinet provides various tools on their support site, the EMS Diagnostic Tool is natively installed with the FortiClient EMS software and is the primary, documented method for troubleshooting the EMS server itself.

**NEW QUESTION # 42**

An administrator has a requirement to add user authentication to the ZTNA access for remote or off-fabric users. Which FortiGate feature is required in addition to ZTNA?

- A. FortiGate certificates
- B. C. FortiGate explicit proxy
- C. FortiGate FSSO
- D. FortiGate endpoint control

**Answer: B**

Explanation:

For adding user authentication to the ZTNA access for remote or off-fabric users, the following FortiGate feature is required in addition to ZTNA:

\* FortiGate explicit proxy allows FortiGate to intercept web traffic for authentication purposes.

\* ZTNA integrates with various FortiGate features to provide secure access and ensure that users are authenticated before accessing resources.

\* By using an explicit proxy, FortiGate can handle web traffic and enforce authentication policies for remote users who are not directly on the corporate network (off-fabric).

Thus, the correct feature to use for this requirement is the FortiGate explicit proxy.

**NEW QUESTION # 43**

Refer to the exhibit.

Based on the FortiClient logs shown in the exhibit which application is blocked by the application firewall?

- A. Internet Explorer
- B. Twitter
- C. Facebook
- D. **Firefox**

**Answer: D**

Explanation:

Based on the FortiClient logs shown in the exhibit:

- \* The first log entry shows the application "firefox.exe" trying to access a destination IP, with the threat identified as "Twitter."
- \* The action taken by the application firewall is "blocked" with the event type "appfirewall." This indicates that the application firewall has blocked access to Twitter.

#### NEW QUESTION # 44

Refer to the exhibit.

Based on the CLI output from FortiGate. which statement is true?

- A. **FortiGate is configured to pull user groups from FortiClient EMS**
- B. FortiGate is configured with local user group
- C. FortiGate is configured to pull user groups from FortiAuthenticator
- D. FortiGate is configured to pull user groups from AD Server.

**Answer: A**

Explanation:

Based on the CLI output from FortiGate:

- \* The configuration shows the use of "type fortiems," indicating that FortiGate is set up to interact with FortiClient EMS.
- \* The "server" field points to an IP address (10.0.1.200), which is typically the address of the FortiClient EMS server.
- \* The configuration includes an SSL-enabled connection, which is a common setup for secure communication between FortiGate and FortiClient EMS.

Thus, the configuration indicates that FortiGate is set up to pull user groups from FortiClient EMS.

#### NEW QUESTION # 45

Refer to the exhibit.

Based on The settings shown in The exhibit, which statement about FortiClient behaviour is True?

- A. FortiClient blocks and deletes infected files after scanning them.
- B. FortiClient quarantines infected files and reviews later, after scanning them.
- C. FortiClient copies infected files to the Resources folder without scanning them.
- D. **FortiClient scans infected files when the user copies files to the Resources folder.**

**Answer: D**

Explanation:

Based on the settings shown in the exhibit, FortiClient is configured to scan files as they are downloaded or copied to the system. This means that if a user copies files to the "Resources" folder, which is not listed under exclusions, FortiClient will scan these files for infections. The exclusion path mentioned in the settings, "C:

\Users\Administrator\Desktop\Resources", indicates that any files copied to this specific folder will not be scanned, but since the question implies that the "Resources" folder is not the same as the excluded path, FortiClient will indeed scan the files for infections.

## NEW QUESTION # 46

Time and tide wait for no man, if you want to save time, please try to use our FCP\_FCT\_AD-7.4 preparation exam, it will cherish every minute of you and it will help you to create your life value. With the high pass rate of our FCP\_FCT\_AD-7.4 exam questions as 98% to 100% which is unbeatable in the market, we are proud to say that we have helped tens of thousands of our customers achieve their dreams and got their FCP\_FCT\_AD-7.4 certifications. Join us and you will be one of them.
